	Task 22 – Decommissions fuel systems, appliances and ancillary equipment	3
		100

Details: The Interprovincial Red Seal exam is a summative assessment intended to test an apprentice's trade knowledge gained through both on-the-job experience and technical training. Exam questions are developed by certified trade worker subject matter experts (SMEs) as well as instructors and are intended to reflect trade practices in Canada. The exams are edited, translated, and peer reviewed by additional SMEs before they are implemented. The exams are developed to test the sub-tasks of the most recent Red Seal Occupational Standard.

SkilledTradesBC will provide:

- B149.1:20 Natural Gas and Propane Installation Code
- B149.2:20 Propane Storage and Handling Code
- B149.3:20 Code for the field approval of fuel-burning appliances and equipment

The Gasfitter – Class A 2024 RSOS can be downloaded here.

A comparative analysis of the sub-task changes from the previous standard can be found on the SkilledTradesBC trade page.
