**INTRODUCTION**  
**Carpenter**

## Foreword

This revised Carpenter Program Outline is intended as a guide for instructors, apprentices, and employers of apprentices as well as for the use of industry organizations, regulatory bodies, and provincial and federal governments. It reflects updated standards based on the new Carpenter Occupational Analysis (2014) and British Columbia industry and instructor subject matter experts.

Practical instruction by demonstration and student participation should be integrated with classroom sessions. Safe working practices, even though not always specified in each operation or topic, are an implied part of the program and should be stressed throughout the apprenticeship.

This Program Outline includes a list of recommended reference textbooks that are available to support the learning objectives and the minimum shop requirements needed to support instruction.

The Program Outline was prepared with the advice and assistance of the Carpenter Review Committee and will form the basis for further updating of the British Columbia Carpenter Program and learning resources by the Construction Industry Training Organization on behalf of SkilledTradesBC.

Competencies are to be evaluated through written exams and practical assessments. A passing grade is achieved by getting an overall mark of 70%. See the Assessment Guidelines in the Appendix for more details. The types of questions used on these exams must reflect the cognitive level indicated by the learning objectives and the learning tasks listed in the related competencies.

Achievement Criteria are included for those competencies that require a practical component. The intent of including Achievement Criteria in the Program Outline is to ensure consistency in training across the many training institutions in British Columbia. Their purpose is to reinforce the theory and to provide a mechanism for evaluation of the learner's ability to apply the theory to practice. It is important that these performances be observable and measurable and that they reflect the skills spelled out in the competency as those required of a competent journeyman. The conditions under which these performances will be observed and measured must be clear to the learner as well as the criteria by which the learner will be evaluated. The learner must also be given the evaluation criteria.

The performance spelled out in the Achievement Criteria is a suggested performance and is not meant to stifle flexibility of delivery. Training providers are welcome to substitute other practical performances that measure similar skills and attainment of the competency. Multiple performances may also be used to replace individual performances where appropriate.

### **SAFETY ADVISORY**

Be advised that references to the WorkSafeBC safety regulations contained within these materials do not/may not reflect the most recent Occupational Health and Safety Regulation the current Standards and Regulation in BC can be obtained on the following website: <http://www.worksafebc.com>. Please note that it is always the responsibility of any person using these materials to inform him/herself about the Occupational Health and Safety Regulation pertaining to his/her work.

## How to Use this Document

This Program Outline has been developed for the use of individuals from several different audiences. The table below describes how each section can be used by each intended audience.

Section	Training Providers	Employers/ Sponsors	Apprentices	Challengers
<b>Program Credentialing Model</b>	Communicate program length and structure, and all pathways to completion	Understand the length and structure of the program	Understand the length and structure of the program, and pathway to completion	Understand challenger pathway to Certificate of Qualification
<b>OAC</b>	Communicate the competencies that industry has defined as representing the scope of the occupation	Understand the competencies that an apprentice is expected to demonstrate in order to achieve certification	View the competencies they will achieve as a result of program completion	Understand the competencies they must demonstrate in order to challenge the program
<b>Training Topics and Suggested Time Allocation</b>	Shows proportionate representation of general areas of competency (GACs) at each program level, the suggested proportion of time spent on each GAC, and percentage of time spent on theory versus practical application	Understand the scope of competencies covered in the technical training, the suggested proportion of time spent on each GAC, and the percentage of that time spent on theory versus practical application	Understand the scope of competencies covered in the technical training, the suggested proportion of time spent on each GAC, and the percentage of that time spent on theory versus practical application	Understand the relative weightings of various competencies of the occupation on which assessment is based
<b>Program Content</b>	Defines the objectives, learning tasks, high level content that must be covered for each competency, as well as defining observable, measurable achievement criteria for objectives with a practical component	Identifies detailed program content and performance expectations for competencies with a practical component; may be used as a checklist prior to signing a recommendation for certification (RFC) for an apprentice	Provides detailed information on program content and performance expectations for demonstrating competency	Allows individual to check program content areas against their own knowledge and performance expectations against their own skill levels
<b>Training Provider Standards</b>	Defines the facility requirements, tools and equipment, reference materials (if any) and instructor requirements for the program	Identifies the tools and equipment an apprentice is expected to have access to; which are supplied by the training provider and which the student is expected to own	Provides information on the training facility, tools and equipment provided by the school and the student, reference materials they may be expected to acquire, and minimum qualification levels of program instructors	Identifies the tools and equipment a tradesperson is expected to be competent in using or operating; which may be used or provided in a practical assessment

**PROGRAM OVERVIEW**  
**Carpenter**

# Program Credentialing Model

## Apprenticeship Pathway

This graphic provides an overview of the Carpenter apprenticeship pathway.

C of Q = Certificate of Qualification  
 C of A = Certificate of Apprenticeship  
 C of C = Certificate of Completion  
 WBT = Work-Based Training

\*Suggested duration based on a 30-hour week

**CROSS-PROGRAM CREDITS**

Individuals who hold the credentials listed below are entitled to receive partial credit toward the completion requirements of this program

## Occupational Analysis Chart

### CARPENTER

**Occupation Description:** “Carpenter” means a person who performs all work in connection with the assembly and erection of false work and forms for concrete, wood and metal frame construction, and installs interior and exterior finishing metals for residential, commercial, and industrial projects, while conforming to plans and specifications and local building codes. Other trade skills include layout, rigging/signalling, cutting/welding and the erection and dismantling of scaffolding.

**Carpenter**

# **Level 1 Carpenter**

**Line (GAC):**                **A     SAFE WORK PRACTICES**  
**Competency:**            **A1 Apply Shop and Site Safety Practices**

**Objectives**

To be competent in this area, the individual must be able to:

- Describe safe work practices used in a shop and on a construction site.
- Apply safe work practices used in a shop and on a construction site.

**LEARNING TASKS**

1. Describe Occupational Health and Safety (OHS) Regulation and related materials
  
2. Use OHS Regulation and related materials
  
3. Describe safe work practices

**CONTENT**

- OHS Regulation and WorkSafeBC Standards
- Legal responsibilities
  - Education and training
  - Orientation processes
  - Toolbox meetings
- Inspections and investigations
- WorkSafeBC assessment and penalty costs affecting employers
  
- Safety committees
  - Purpose
  - Membership
  - Role of members
  - Meetings and minutes
- Conduct site inspections
- Conduct toolbox meetings
  - Purpose
  - Content
  - Timing
- Conduct site inspections
  - Identification of hazards
  - Recommendations
  - Remedies
  
- Safety gear
- Inspect condition of tools
- Use proper tools
- Guards and barriers
- Operating hazardous equipment
- Using hazardous materials and harmful substances
- Flammable, explosion, and electrical hazards
- Grounding of tools and equipment
- Lockout procedures
- Housekeeping
- Using compressed air

- Sound and light signals
  - Entering confined spaces
  
- 4. Apply safe work practices
  - Use OHS Regulation and WorkSafeBC Standards
  - Site-specific
  - Harmful substances
  - Health hazards and work environment controls
  - Personal protective equipment
  - Powder-actuated tools
  - Electrical systems
  - Temporary lighting
  - Ladders
  - Scaffolds, swing stages and miscellaneous stages
  - Construction procedures
  - Excavation
  - Demolition
  - Rigging
  - Woodworking machinery and processing
  
- 5. Describe fire safety procedures
  - Component and causes of fire
    - Fuel
    - Heat
    - Oxygen
  - Solvent flammability
    - Flash points
  - Types of fires
    - Class A, B, C and D fires
  - Use of fire extinguishers
  - Fire prevention equipment
    - Welding blanket
    - Emergency fire blanket
  - Precautions when working with flammable substances
  - Safe use of temporary heating
  
- 6. Use Workplace Hazardous Materials Information System (WHMIS)
  - WHMIS
  - Labelling
  - MSDS
  - Symbols
  - Storage

**Achievement Criteria**

Performance	The learner will interpret information from OHS Regulation.
Conditions	The learner will be given: <ul style="list-style-type: none"><li>• Assignment sheet</li></ul>
Criteria	The individual will be evaluated on: <ul style="list-style-type: none"><li>• Interpretation of OHS Regulation</li></ul>

**Line (GAC):**            **A     SAFE WORK PRACTICES**  
**Competency:**         **A2     Apply Personal Safety Practices**

**Objectives**

To be competent in this area, the individual must be able to:

- Control the stresses on the body caused by physical work.
- List the hazards associated with working in confined spaces.
- Select and use fall protection as outlined by the OHS Regulation and WorkSafeBC Standards.
- Select and use personal protective equipment.
- Apply the concepts of personal safety awareness and practices.

**LEARNING TASKS**

**CONTENT**

- |  |  |
|--|--|
| 1. Describe roles and responsibilities related to workplace safety | <ul style="list-style-type: none"> <li>• Personal safety rules</li> <li>• Responsibilities affecting you and others</li> </ul>   |
| 2. Describes hazard identification in the workplace                | <ul style="list-style-type: none"> <li>• Hazardous materials</li> <li>• Falls</li> <li>• Working at heights</li> <li>• Overhead dangers</li> <li>• Confined spaces</li> <li>• Excavations</li> <li>• Working around equipment</li> <li>• Uneven ground</li> <li>• Changes in conditions</li> </ul>   |
| 3. **LEARNING TASKS**

5. Use fall protection systems

**CONTENT**

- Fall protection systems
  - Guardrails
  - Fall restraint
  - Fall arrest
- Rope grabs and shock-limiting devices
- Using safety harness, lanyard, and lifeline
- Safety equipment inspection

**Achievement Criteria**

**Performance** The learner will apply personal safety practices during all shop activities.

- Conditions** The learner will be given:
- Workplace orientation
  - Access to personal safety equipment
  - Clear expectations
  - Access to OHS Regulation and WorkSafeBC Standards

**Criteria** The learner will start with 100% and a demerit system will deduct a given percentage for safety infractions. A weighting system will be applied to individual safety infractions.

**Line (GAC):**                **B**    **DOCUMENTATION AND ORGANIZATIONAL SKILLS**  
**Competency:**            **B1**   **Use Construction Drawings and Specifications**

**Objectives:**

To be competent in this area, the individual must be able to:

- Describe types of drawings.
- Interpret and extract information from a set of construction drawings.
- Use drawing instruments to create working drawings.

**LEARNING TASKS**

**CONTENT**

- |  |   |
|--|---|
| 1. Describe drawings                     | <ul style="list-style-type: none"> <li>• Views</li> <li>• Types of drawings</li> </ul>  |
| 2. Describe the parts of drawings        | <ul style="list-style-type: none"> <li>• Line types</li> <li>• Symbols</li> <li>• Abbreviations</li> <li>• Title block</li> <li>• Borders</li> <li>• Revisions</li> <li>• Legends</li> <li>• Notes</li> </ul>   |
| 3. Describe the use of scale in drawings | <ul style="list-style-type: none"> <li>• Ratio and proportion</li> </ul>  |
| 4. Describe construction documents       | <ul style="list-style-type: none"> <li>• Plot plan</li> <li>• Foundation plan</li> <li>• Floor plans</li> <li>• Elevations</li> <li>• Sections</li> <li>• Details</li> <li>• Schedules</li> <li>• Legal descriptions</li> <li>• Survey plans</li> <li>• Subdivision plans</li> <li>• Surveyor’s Certificate</li> <li>• Terms</li> </ul> |

**LEARNING TASKS**

**CONTENT**

5. Use drafting tools and materials

- Drafting board
- Drafting table
- T- square
- Set squares
- Scales
- Drawing pencils
- Templates
- Compasses
- Erasers
- Dusting cloth or brush
- Drawing paper
- Tracing paper
- Drafting or masking tape
- Computer-Aided Drafting and Design (CADD)

6. Use architectural drawings

- Building dimensions
- Construction type
- Room layout
- Fixture locations
- Finish details

**Achievement Criteria 1**

Performance The learner will use drafting tools to draw a project.

Conditions The learner will be given:

- Specifications
- Assignment sheet

Criteria The individual will be evaluated on:

- Drafting procedures

**Achievement Criteria 2**

Performance The learner will interpret information from a set of building plans.

Conditions The learner will be given:

- Drawings and specifications
- Assignment sheet

Criteria The individual will be evaluated on:

- Interpretation of plans

**Line (GAC):**                **B**     **DOCUMENTATION AND ORGANIZATIONAL SKILLS**  
**Competency:**            **B2**    **Interpret Building Codes and Bylaws**

**Objectives**

To be competent in this area, the individual must be able to:

- Identify building codes and bylaws for residential applications.
- Use building codes.
- Describe warranties and the Homeowners’ Protection Office.

**Line (GAC):**            **B**    **Documentation and Organizational Skills**  
**Competency:**        **B4**   **Perform Trade Math**

**Objectives**

To be competent in this area, the individual must be able to:

- Use trade mathematics.

**LEARNING TASKS**

1. Describe trade math concepts
  
  
  
  
  
  
  
  
  
  
2. Use trade math

**CONTENT**

- Mathematical concepts
- Application in carpentry trade
- Converting between metric and imperial measurements
- Use of calculators
  
- Fractions
- Ratio/proportion
- Percentage
- Order of operations (BEDMAS)
- Geometry
  - Circle math
  - Pythagorean theorem
  - Area and volume calculations
- Algebra
- Trigonometry

**Line (GAC):** C **TOOLS AND EQUIPMENT**  
**Competency:** C1 **Use Hand Tools**

**Objectives**

To be competent in this area, the individual must be able to:

- Describe the use of hand tools.
- Use hand tools.

**LEARNING TASKS**

1. Describe hand tools
  
2. Use measuring and layout tools

**CONTENT**

- Measuring and layout
- Cutting, boring and shaping
- Fastening
- Finishing
  
- Purpose
- Types
  - Squares
  - Rulers
  - Tape measures
  - Levels
  - Plumb bobs
  - String lines/chalk lines
  - Marking tools
- Parts
- Operation
- Safety
- Adjustment
- Maintenance
- Storage

**LEARNING TASKS**

**CONTENT**

3. Use cutting, boring and shaping tools

- Purpose
- Types
  - Hand saws
  - Planes
  - Chisels
  - Knives
  - Drill bits
  - Files
  - Rasps
  - Sandpaper
- Parts
- Operation
- Safety
- Adjustment
- Maintenance
- Storage

4. Use fastening tools

- Purpose
- Types
  - Hammers
  - Screwdrivers
  - Bars
  - Pliers and cutters
  - Wrenches
- Parts
- Operation
- Safety
- Adjustment
- Maintenance
- Storage

**Achievement Criteria**

**Performance** The learner will lay out and build a hand tool project.

**Conditions** The learner will be given:

- Drawings and specifications
- Tools

**Criteria** The learner will be evaluated on:

- Safety
- Tool use
- Calculations
- Accuracy of layout and cuts
- Quality of finished product

**Line (GAC):** C **TOOLS AND EQUIPMENT**  
**Competency:** C2 **Use Portable Power Tools**

**Objectives**

To be competent in this area, the individual must be able to:

- Describe portable power tools.
- Use portable power tools.

**LEARNING TASKS**

1. Describe portable power tools
  
2. Describe the use of portable power tools
  
3. Use portable circular saws

**CONTENT**

- Cutting
- Boring
- Shaping
- Fastening
  
- PPE
  - Electric
  - Pneumatic
  - Mechanical
- Operating procedures
- Following manufacturers' documentation
- Power supply
  - Disconnect while assembling
  - Check cord
- Grounding
- Condition of equipment
  - Guards in place
  - Attachments secure
  - Sharp blades
  - Batteries charged
- Storage of tools
- Battery disposal
  
- Purpose
- Safety
- Types and sizes
  - Corded
  - Cordless
- Parts
- Blade types
- Operations
- Accessories
- Adjustments
- Maintenance

**LEARNING TASKS**

**CONTENT**

4. Use portable mitre saws

- Purpose
- Safety
- Types, sizes and capacities
  - Mitre saws
  - Compound mitre saws
- Parts
- Operations
- Accessories
- Adjustments
- Maintenance

5. Use portable drills and drivers

- Purpose
- Safety
- Types, sizes and speeds
  - Corded
  - Cordless
- Parts
- Bit types
- Fastener types
- Operations
- Accessories
- Adjustments
- Maintenance

6. Use portable pneumatic tools

- Supply system
- Purpose
- Safety
- Types and sizes
  - Nail guns
  - Staplers
  - Impact wrenches
- Parts
- Fastener types
- Operations
- Accessories
- Adjustments
- Maintenance

**LEARNING TASKS**

7. Use jigsaws and reciprocating saws

**CONTENT**

- Purpose
- Safety
- Types, sizes and speeds
  - Jigsaws
  - Reciprocating saws
  - Multi tools
  - Corded/cordless
- Parts
- Blade types
- Operations
- Accessories
- Adjustments
- Maintenance

**Achievement Criteria**

Performance	The learner will lay out and build a project that includes cross, mitre and bevel cuts and ripping with a circular saw.
Conditions	The learner will be given: <ul style="list-style-type: none"> <li>• Drawings and specifications</li> <li>• Tools</li> </ul>
Criteria	The learner will be evaluated on: <ul style="list-style-type: none"> <li>• Safety</li> <li>• Tool use</li> <li>• Accuracy of layout and cuts</li> <li>• Quality of finished project</li> </ul>

**Line (GAC):** C **TOOLS AND EQUIPMENT**  
**Competency:** C3 **Use Stationary Power Tools**

**Objectives**

To be competent in this area, the individual must be able to:

- Describe stationary power tools.
- Use a table saw and bench grinder.

**LEARNING TASKS**

**CONTENT**

1. Describe stationary power tools

- Table saws
- Band saws
- Jointers
- Drill presses
- Thickness planers
- Sanding machines
- Bench grinders

2. Use table saws

- Purpose
- Types and sizes
- Parts
- Blade types and purpose
- Accessories
- Operations
- Types of cuts
- Safety
- Adjustments
- Maintenance
- Following manufacturers' documentation

3. Use bench grinders

- Purpose
- Wheel types, sizes and speed
- Parts
- Fastener types
- Operations
- Accessories
- Safety
- Adjustments
- Maintenance
- Following manufacturers' documentation

**Achievement Criteria 1**

Performance	The learner will perform procedures on a table saw including ripping cuts and cross cuts.
Conditions	The learner will be given: <ul style="list-style-type: none"><li>• Table saw</li></ul>
Criteria	The learner will be evaluated on: <ul style="list-style-type: none"><li>• Safety</li><li>• Tool use</li><li>• Accuracy of dimensions</li></ul>

**Achievement Criteria 2**

Performance	The learner will use a bench grinder to sharpen a chisel or plane iron.
Conditions	The learner will be given: <ul style="list-style-type: none"><li>• A chisel or plane iron</li><li>• Bench grinder</li><li>• Sharpening stones</li></ul>
Criteria	The learner will be evaluated on: <ul style="list-style-type: none"><li>• Safety</li><li>• Tool use</li><li>• Grinding procedure</li><li>• Whetting procedure</li><li>• Sharpness of finished edge</li></ul>

**Line (GAC):** D **SURVEY INSTRUMENTS AND EQUIPMENT**  
**Competency:** D1 **Use Levelling Instruments and Equipment**

**Objectives**

To be competent in this area, the individual must be able to:

- Use optical levels.

**LEARNING TASKS**

**CONTENT**

1. Describe levelling equipment

- Purpose
- Types of levelling instruments
- Builder’s levels
- Electronic levels
- Parts
- Types of equipment

2. Use levelling equipment

- Instrument set-up
- Testing level
- Levelling rods
  - Parts
  - Scales
  - Rod types
  - Hand signals
- Electronic and laser levels
  - Parts
  - Setting up procedures
  - Target use
  - Setting elevations
  - Measuring elevations
- Record elevations
- Common errors

3. Maintain levelling equipment

- Storage
- Transporting
- Protection from elements
- Cleaning and checking condition of parts

**Achievement Criteria 1**

Performance	The learner will complete a survey circuit identifying elevations at various locations including a turning point.
Conditions	The learner will be given: <ul style="list-style-type: none"><li>• Site plan including survey points</li><li>• Field book</li></ul>
Criteria	The learner will be evaluated on: <ul style="list-style-type: none"><li>• Safety</li><li>• Accuracy of rod readings</li><li>• Field book recordings</li><li>• Instrument set up</li></ul>

**Achievement Criteria 2**

Performance	The learner will transfer elevations.
Conditions	The learner will be given: <ul style="list-style-type: none"><li>• Electronic or optical level, receiver and rod</li><li>• Survey points</li></ul>
Criteria	The learner will be evaluated on: <ul style="list-style-type: none"><li>• Safety</li><li>• Tool use</li><li>• Accuracy of elevations</li></ul>

**Line (GAC):** E ACCESS, RIGGING, AND HOISTING EQUIPMENT  
**Competency:** E1 Use Ladders, Scaffolds and Access Equipment

**Objectives**

To be competent in this area, the individual must be able to:

- Describe ladders.
- Use a ladder.
- Describe scaffolds and temporary access structures.
- Use scaffolds and temporary access structures.

**LEARNING TASKS**

**CONTENT**

1. Describe ladders	<ul style="list-style-type: none"> <li>• OHS Regulation and WorkSafeBC Standards</li> <li>• Ladder ratings</li> <li>• Portable ladder safety</li> <li>• Ladder types               <ul style="list-style-type: none"> <li>○ Access ladder</li> <li>○ Performance ladder</li> <li>○ Job built ladder</li> </ul> </li> <li>• Accessories</li> </ul>
2. Use ladders	<ul style="list-style-type: none"> <li>• Safety</li> <li>• Procedure for use</li> <li>• Maintenance</li> <li>• Storage</li> </ul>
3. Use scaffolds and temporary access structures	<ul style="list-style-type: none"> <li>• OHS Regulation and WorkSafeBC Standards</li> <li>• General requirements</li> <li>• Construction and use</li> <li>• Scaffold types</li> <li>• Assembly procedures</li> <li>• Dismantling procedures</li> <li>• Temporary ramps, walkways and stairs               <ul style="list-style-type: none"> <li>○ Slope regulations</li> <li>○ Guards</li> </ul> </li> </ul>
4. Describe access equipment	<ul style="list-style-type: none"> <li>• OHS Regulation and WorkSafeBC Standards</li> <li>• Swing stages</li> <li>• Suspended power platform</li> <li>• Scissor lifts</li> <li>• Aerial lift</li> </ul>

**Achievement Criteria**

Performance	The learner will set up a scaffold system with an access ladder.
Conditions	The learner will be given: <ul style="list-style-type: none"><li>• A scaffold system</li><li>• A ladder</li></ul>
Criteria	The learner will be evaluated on: <ul style="list-style-type: none"><li>• Safety</li><li>• Tool use</li><li>• Assembly and disassembly of the scaffold system</li><li>• Use of an access ladder</li></ul>

**Line (GAC):** E ACCESS, RIGGING AND HOISTING EQUIPMENT  
**Competency:** E2 Use Rigging and Hoisting Equipment

**Objectives**

To be competent in this area, the individual must be able to:

- Describe the safe use and maintenance of hoisting equipment.
- Use hoisting equipment.
- Use hand signals to communicate with the hoist operator.

**LEARNING TASKS**

**CONTENT**

1. Describe ropes

- Purpose
- Rope types
  - Fibre
  - Wire
  - Stranding
- Use of ropes
- Rope terms
  - Breaking strength
  - Working Load Limits (WLL)
- Knots, bends and hitches
  - Bowline
  - Figure eight
  - Reef or square knot
  - Sheet bend
  - Round turn and two half-hitches
  - Clove hitch
  - Timber hitch
  - Trucker’s knot
- General rules for tying knots, bends and hitches

2. Describe rigging equipment

- Slings
- Web slings
- Turnbuckles
- Eyes
- Shackles
- Cable clips and thimbles
- Hooks
- Spreader bars
- Tag lines

**LEARNING TASKS**

**CONTENT**

3. Describe cranes and hoists

- Purpose
- Use
- Types of cranes
  - Tower
  - Self erect
  - Mobile
  - Boom truck
  - Overhead gantry
- Types of hoists
  - Forklifts
  - Telehandler
  - Power ladder
  - Come-along
  - Wire rope winch
  - Rollers

4. Describe safe methods of lifting loads with cranes and hoists

- OHS Regulation and WorkSafeBC Standards
- Certification
- Training
- Lift plan
- High voltage line clearance
- Overhead hazards
- Load stability
- Centre of gravity
- Sling locations
- Use of tag lines
  - OHS Regulation and WorkSafeBC Standards
  - Rope for tag lines
  - Length of rope
  - Use of two tag lines
  - Location of attachment for tag lines
- Use of hand signals
- Other means of communication
  - Sound signals
  - Radio communication
  - Video systems

5. Use rigging equipment

- OHS Regulation and WorkSafeBC Standards
- Safe rigging practices
- Unsafe practices
- Calculate weight of load

**LEARNING TASKS**

**CONTENT**

	<ul style="list-style-type: none"> <li>• Calculate sling angle and working load limit</li> <li>• Rigging structural shapes</li> <li>• Rigging complex shapes</li> <li>• Blocking and stacking</li> </ul>
6. Use hoisting equipment	<ul style="list-style-type: none"> <li>• OHS Regulation and WorkSafeBC Standards</li> <li>• Follow lift plan</li> <li>• Ground stability</li> <li>• Move and place load</li> </ul>
7. Maintain and store rigging and hoisting equipment	<ul style="list-style-type: none"> <li>• OHS Regulation and WorkSafeBC Standards</li> <li>• Care of slings and wire rope</li> <li>• Wire rope safety</li> <li>• Damages in wire rope</li> <li>• Hook safety</li> <li>• Safety of other hardware</li> <li>• Rings, links and swivels</li> <li>• Eye bolts and ring bolts</li> <li>• Turnbuckles</li> <li>• Shackles</li> <li>• Synthetic web slings</li> <li>• Inspection</li> </ul>

**Achievement Criteria 1**

Performance	The learner will use hand signals for communication with a Mobile Crane Operator.
Conditions	The learner will be given: <ul style="list-style-type: none"> <li>• A series of crane operations to be signaled</li> </ul>
Criteria	The learner will be evaluated on: <ul style="list-style-type: none"> <li>• Safety</li> <li>• Hand signalling</li> </ul>

**Achievement Criteria 2**

Performance	The learner will select and tie knots, bends and/or hitches.
Conditions	The learner will be given: <ul style="list-style-type: none"> <li>• Rope</li> </ul>
Criteria	The learner will be evaluated on: <ul style="list-style-type: none"> <li>• Safety</li> <li>• Tying techniques</li> </ul>

**Line (GAC):** F **SITE LAYOUT**  
**Competency:** F1 **Lay Out Building Locations**

**Objectives**

To be competent in this area, the individual must be able to:

- Describe layout, excavation and grading procedures.
- Build batter boards.

**LEARNING TASKS**

**CONTENT**

- |   |  |
|---|--|
| 1. Describe excavation and grading procedures | <ul style="list-style-type: none"> <li>• Clearing the site</li> <li>• Excavate</li> <li>• Cut and fill</li> <li>• Contour lines</li> <li>• Grades</li> <li>• Grade line and grade stakes</li> </ul>  |
| 2. Build batter boards                        | <ul style="list-style-type: none"> <li>• Location</li> <li>• Construction</li> <li>• Locating lines</li> <li>• Tying lines</li> <li>• Plumbing down from lines</li> <li>• Lay out square corners               <ul style="list-style-type: none"> <li>○ Measuring diagonals</li> <li>○ 3-4-5 Method</li> </ul> </li> </ul> |
| 3. Describe survey markers                    | <ul style="list-style-type: none"> <li>• Iron pin</li> <li>• Lead plug</li> <li>• Survey point</li> <li>• Hub</li> <li>• Corner stake</li> <li>• Witness stake</li> <li>• Benchmark</li> <li>• Datum point</li> <li>• Monument</li> <li>• Locate correct plot plans</li> </ul>   |

**Achievement Criteria**

Performance	The learner will set up batter boards and string lines for a foundation project.
Conditions	The learner will be given: <ul style="list-style-type: none"><li>• A foundation plan</li><li>• Reference points</li><li>• Tools</li></ul>
Criteria	The learner will be evaluated on: <ul style="list-style-type: none"><li>• Safety</li><li>• Tool use</li><li>• Setting of string lines</li><li>• Dimensioning</li><li>• Construction procedures</li></ul>

**Line (GAC):** G **CONCRETE FORMWORK**  
**Competency:** G1 **Use Concrete Types, Materials, Additives and Treatments**

**Objectives**

To be competent in this area, the individual must be able to:

- Describe concrete and its uses.

**LEARNING TASKS**

1. Describe concrete

**CONTENT**

- Safety
- Purpose
- Uses
- Materials
  - Portland cement
  - Water
  - Aggregates
  - Reinforcing steel
  - Embedded materials
- Handling
  - Transport
  - Placement
  - Finishing
  - Curing

**Line (GAC):** G **CONCRETE FORMWORK**  
**Competency:** G3 **Build Footing and Vertical Formwork**

**Objectives**

To be competent in this area, the individual must be able to:

- Describe the construction of footing, wall and column forms.
- Construct footing, wall and column forms.

**LEARNING TASKS**

**CONTENT**

1. Describe footing forms

- Strip footings
- Stepped footings
- Column footings
- Grade beams

2. Describe wall forms

- Built-in-place forms
  - Easy-strip forms
  - Snap tie forms
  - Insulated concrete forming (ICF)
- Form panels
- Form ties (wedges)
- Walers
- Strong backs
- Bracing
- Corner construction
- Pour strip
- Chamfer strip
- Bulkheads and door bucks
- Corbels
- Pilasters
- Methods of construction

3. Describe column forms

- Types
  - Fibre tubes
  - Engineered column
  - Job built
  - Capital
- Assembly of forms

4. Plan footing, wall and column forms

- Safety
- Code
- Select materials
- Material handling and storage

<b>LEARNING TASKS</b>	<b>CONTENT</b>
	<ul style="list-style-type: none"> <li>• Schedule</li> <li>• Access</li> </ul>
5. Calculate concrete volumes	<ul style="list-style-type: none"> <li>• Footings</li> <li>• Walls</li> <li>• Columns</li> <li>• Center line</li> </ul>
6. Build footing, wall and column forms	<ul style="list-style-type: none"> <li>• Layout</li> <li>• Assemble</li> <li>• Support</li> <li>• Align</li> <li>• Brace</li> </ul>
7. **Achievement Criteria 1**

Performance	The learner will build footing and wall forms using quick strip tie system.
Conditions	The learner will be given: <ul style="list-style-type: none"> <li>• A foundation plan which includes bucks, blockouts and pour strip</li> <li>• Tools</li> </ul>
Criteria	The learner will be evaluated on: <ul style="list-style-type: none"> <li>• Safety</li> <li>• Tool use</li> <li>• Use of material and hardware</li> <li>• Plumb and level</li> <li>• Dimensionally accurate, straight and square</li> <li>• Construction techniques</li> </ul>

**Achievement Criteria 2**

Performance	The learner will build footing, wall and column forms using snap tie system.
Conditions	The learner will be given: <ul style="list-style-type: none"> <li>• A foundation plan which includes chamfer strip</li> <li>• Forming material and hardware</li> <li>• Tools</li> </ul>
Criteria	The learner will be evaluated on: <ul style="list-style-type: none"> <li>• Use of material and hardware</li> <li>• Plumb and level</li> </ul> Dimensionally accurate, straight and square

**Line (GAC):**            **G**    **CONCRETE FORMWORK**  
**Competency:**        **G4**   **Build Slab-On-Grade Forms and Suspended Slab Forms**

**Objectives**

To be competent in this area, the individual must be able to:

- Describe slabs-on-grade.

**LEARNING TASKS**

1. Describe slabs-on-grade

**CONTENT**

- Types of slabs
- Ground preparation
- Strength and durability
- Reinforcement
- Form system

**Line (GAC):**           **G**   **CONCRETE FORMWORK**  
**Competency:**       **G5**   **Install Reinforcement and Embedded Items**

**Objectives**

To be competent in this area, the individual must be able to:

- Describe the installation of reinforcing bar in concrete.

**LEARNING TASKS**

1. Describe reinforcing for concrete

**CONTENT**

- Purpose
- Deformed bar
- Smooth bar
- Sheet or rolled mesh
- Size and spacing
- Cutting
- Splicing
- Tying
- Anchor bolts

**Line (GAC):**           **G**    **CONCRETE FORMWORK**  
**Competency:**       **G7**    **Place and Finish Concrete**

**Objectives**

To be competent in this area, the individual must be able to:

- Describe methods of placing concrete.

**LEARNING TASKS**

1. Describe the delivery and placement of concrete

**CONTENT**

- Safety
- Manufacture and delivery
- Placement methods
  - Concrete pumps
  - Chutes
  - Buggies
  - Wheelbarrow
  - Concrete bucket
  - Placement boom
  - Underwater placement
- Guidelines for placing concrete
  - Consolidation
  - Discharge
  - Weather considerations
  - Segregation
  - Rate of pour
  - Environmental considerations
- Screed
- Tools and equipment
  - Power trowels

**Line (GAC):** H **WOOD FRAME CONSTRUCTION**  
**Competency:** H1 **Describe Wood Frame Construction**

**Objectives**

To be competent in this area, the individual must be able to:

- Describe the systems and terminology in wood frame construction.

**LEARNING TASKS**

**Line (GAC):** H **WOOD FRAME CONSTRUCTION**  
**Competency:** H2 **Select Framing Materials**

**Objectives**

To be competent in this area, the individual must be able to:

- Describe standard sizes, species and grades of wood for framing.
- Describe fasteners and hardware for wood framing.

**LEARNING TASKS**

**CONTENT**

1. Describe characteristics of wood

- Structural
- Aesthetic
- Softwood species
  - Douglas fir
  - Fir
  - Larch
  - Hemlock
  - Spruce
  - Pine
  - Cedar
- Hard wood species
  - Maple
  - Cherry
  - Oak
  - Birch
- Tropical hardwoods

2. Describe wood production

- Production methods
  - Sawing
  - Drying
  - Moisture content
  - Planing
- Sizes
- Grading
  - Grade stamps
  - Board lumber
  - Light framing
  - Joists and planks
  - Beams and stringers
  - Posts and timbers
  - Decking
  - Siding

3. Describe common defects in wood

- Warp

**LEARNING TASKS**

**CONTENT**

- |  |   |
|--|---|
| <p>4. Describe manufactured products</p>                     | <ul style="list-style-type: none"> <li>• Compression wood</li> <li>• Mechanical defects</li> <li>• Split, check, shake</li> <li>• Knots</li> <li>• Wane</li> <li>• Pitch, streaks, stained wood</li> <li>• Decay</li> <li>• Insect damage</li> <li>• Manufacturing imperfections</li> </ul> |
| <p>5. Describe fasteners used in wood frame construction</p> | <ul style="list-style-type: none"> <li>• Veneers</li> <li>• Cross-banding</li> <li>• Cores</li> <li>• Adhesives</li> <li>• Softwood plywood grades</li> <li>• Plywood veneers and cores</li> <li>• Faces, backs and cores</li> <li>• Standard sizes and thicknesses</li> </ul>              |

|  | <ul style="list-style-type: none"> <li>• Framing connectors</li> <li>• Treated wood connectors</li> <li>• Seismic connectors</li> </ul>   |

**Line (GAC):** H **WOOD FRAME CONSTRUCTION**  
**Competency:** H3 **Build Floor Systems**

**Objectives**

To be competent in this area, the individual must be able to:

- Describe the construction of floors and support systems.
- Build floors and support systems.

**LEARNING TASKS**

**CONTENT**

1. Describe floor systems

- Purposes
- Uses
- Types of floor systems
  - Lumber
  - Engineered
- Components of a floor system
  - Pony walls
  - Posts/columns
  - Beams
  - Joists
  - Sheathing
  - Bridging

2. Plan floor systems

- Safety
- Code requirements
- Determine materials and sizes
- Spacing
- Spans
- Construction drawings
- Interpret engineering documents
  - Layout
  - Drilling holes
  - Blocking
  - Fastener selection
  - Temporary bracing
- Construction sequence
  - Stairwell openings

3. Calculate floor systems

- Spans
- Material quantities
- Components

4. Build pony walls

- Pony wall construction

**LEARNING TASKS**

**CONTENT**

5. Build posts/columns and beams

- Post/column anchorage
- Installing posts/columns and beams

6. Build floors

- Layout and installation of sill plates
- Layout and installation of joists
  - Stairwell openings
- Nailing requirements
- Joists supported by steel beams
- Layout and installation of bridging or blocking
- Installation of sheathing

**Achievement Criteria**

**Performance**      The learner will plan, lay out and build a floor system with a stairwell opening.

**Conditions**      The learner will be given:

- Drawings that include openings and provisions for mechanical services

**Criteria**          The learner will be evaluated on:

- Safety
- Tool use
- Joist layout reflecting needs of services
- Sequencing of joists around openings
- Compliance with building code
- Dimensionally accurate

**Line (GAC):** H **WOOD FRAME CONSTRUCTION**  
**Competency:** H5 **Build Stair Systems**

**Objectives**

To be competent in this area, the individual must be able to:

- Describe the construction of straight stairs and handrail.
- Build stairs and handrail.

**LEARNING TASKS**

**CONTENT**

5. Describe interior ceiling systems	<ul style="list-style-type: none"> <li>• Purpose</li> <li>• Types</li> <li>• Components</li> <li>• Methods</li> </ul>
6. Plan installation of interior ceiling systems	<ul style="list-style-type: none"> <li>• Safety</li> <li>• Code requirements</li> <li>• Construction drawings</li> <li>• Reflected ceiling plans</li> </ul>
7. Calculate materials	<ul style="list-style-type: none"> <li>• Wall systems</li> <li>• Ceiling systems</li> </ul>

8. Install interior ceiling systems
- Lay out
  - Cut
  - Assembly

**Achievement Criteria 1**

- Performance      The learner will build steel stud walls with openings.
- Conditions        The learner will be given:
- Drawings and specifications
- Criteria            The learner will be evaluated on:
- Safety
  - Tool use
  - Plumb and square
  - Cutting and fastening technique
  - Dimensional accuracy

**Achievement Criteria 2**

- Performance      The learner will build a suspended ceiling.
- Conditions        The learner will be given:
- Reflected ceiling plan
- Criteria            The learner will be evaluated on:
- Safety
  - Tool use
  - Layout
  - Level and square
  - Accurate dimensioning
  - Installation technique

# **Level 4 Carpenter**

**Line (GAC):**                **B**    **DOCUMENTATION AND ORGANIZATIONAL SKILLS**  
**Competency:**            **B2**    **Interpret Building Codes and Bylaws**

**Objectives**

To be competent in this area, the individual must be able to:

- Interpret building codes and bylaws.

**LEARNING TASKS**

**CONTENT**

1. Interpret building codes and bylaws

- Geometric stairs
- Wall systems
  - Sound transmission classification
  - Fire separations
  - Air, vapour and insulated assemblies

**Achievement Criteria 1**

**Performance**    The learner will interpret information from the building code.  
**Conditions**     The learner will be given:  
                           • Assignment sheet  
**Criteria**         The learner will be evaluated on:  
                           • Interpretation of building code

**Achievement Criteria 2**

**Performance**    The learner will complete documents for a building permit application.  
**Conditions**     The learner will be given:  
                           • Municipal bylaws and regulations  
                           • Construction drawings and specifications  
**Criteria**         The learner will be evaluated on:  
                           • Interpretation of bylaws, regulations, and permit processes

**Line (GAC):**                **B**    **DOCUMENTATION AND ORGANIZATIONAL SKILLS**  
**Competency:**            **B3**   **Plan and Organize Work**

**Objectives**

To be competent in this area, the individual must be able to:

- Describe contract documents.
- Use construction specifications.
- Use plans and drawings.
- Estimate costs from construction drawings.

**LEARNING TASKS**

**CONTENT**

1. Describe contract documents

- Types
- Articles of agreement
- Definitions
- General conditions
- Supplementary conditions
- General requirements
- Specifications
- Drawings
- Addenda

2. Describe the bidding process

- Invitation to tender
- Instruction to bidders
- Tender form

3. Describe estimating

- Rough estimate
- Detailed estimate
- Partial estimate
- Sub trades
- Quote pricing
- Target pricing
- Cost plus pricing
- Unit pricing
- Change orders
- Allowances

- 4. Describe financial considerations
  - Payment schedule
  - Bonds
  - Liens
  - Penalties/bonuses
  - Contingency funds
  
- 5. Plan work sequence
  - Construction sequence
  - Material delivery sequence
  - Coordination with sub-trades
  - Time estimates
  
- 6. Estimate the cost of a job
  - Labour
  - Material
  - Equipment
  - Subtrades
  - Overheads
  - Profit margin
  
- 7. Describe inspections for engineered applications
  - Architectural
    - Work completed
    - Quality of work
  - Engineering
    - Geotechnical
    - Formwork
    - Reinforcing steel
    - Embedded materials
    - Concrete
  - Municipal/Provincial
    - Plumbing
    - Electrical
    - Fire
    - Gas
    - Final/occupancy
    - Elevator
    - Health

**Achievement Criteria**

Performance     The learner will estimate and schedule a project.

Conditions       The learner will be given:

- Drawings and specifications
- Cost guides

Criteria           The learner will be evaluated on:

- Project schedule
- Documentation
- Accuracy

**Line (GAC):** D **SURVEY INSTRUMENTS AND EQUIPMENT**  
**Competency:** D2 **Use Site Layout Equipment**

**Objectives**

To be competent in this area, the individual must be able to:

- Describe total stations.

**LEARNING TASKS**

**CONTENT**

1. Describe total stations

- Calculations
- Set-up
- Adjustment
- Readings
- Layout
- Maintenance
- Storage

2. Calculate layout of curves

- Types
- Chord lengths
- Arc lengths
- Offsets

**Achievement Criteria**

**Performance** The learner will lay out curved shapes.

**Conditions** The learner will be given:

- Drawings and specifications

**Criteria** The learner will be evaluated on:

- Safety
- Tool use
- Calculations and layout
- Accuracy

**Line (GAC):** F **SITE LAYOUT**  
**Competency:** F2 **Prepare Building Site**

**Objectives**

To be competent in this area, the individual must be able to:

- Describe site considerations.
- Describe site preparation.
- Describe hoarding.
- Describe pre-excavation preparation.
- Describe drainage systems.
- Describe backfilling.

**LEARNING TASKS**

1. Describe site considerations

**CONTENT**

- Building location
- Temporary facilities
  - First Aid
  - Tool storage
  - Site offices
  - Fuel storage
  - Muster station
  - Parking
  - Wheel wash
  - Sediment control
- Temporary services
- Water
- Gas
- Electrical
- Material lay down services
- Delivery areas
- Temporary road ways
- Demobilization

**LEARNING TASKS**

**LEARNING TASKS****CONTENT**

6. Describe sumps, catch basins and septic tanks

- Code regulations
- De-watering systems
- Sumps
- Trapping hoods
- Storm drains
- Sanitary sewer
- Catch basins
- Backwater valves
- Septic tanks
- Perimeter drains

7. Describe backfilling

- Safety
- Code requirements
- Procedures
  - Backfilling concrete foundations
  - Backfilling preserved wood foundations
  - Backfilling service trenches
- Foundation protection
- Water/damp proofing

**Line (GAC):** H **WOOD FRAME CONSTRUCTION**  
**Competency:** H5 **Build Stair Systems**

**Objectives**

To be competent in this area, the individual must be able to:

- Describe geometric stairs.
- Build geometric stairs.
- Build balustrades.

| 2. Plan an unequal slope intersecting roof      | <ul style="list-style-type: none"> <li>• Safety</li> <li>• Code requirements</li> <li>• Drawings and specifications</li> <li>• Construction sequence</li> </ul> |
| 3. Calculate an unequal slope intersecting roof | <ul style="list-style-type: none"> <li>• Theoretical lengths</li> <li>• Materials</li> </ul>  |
| 4. Build an unequal slope intersecting roof     | <ul style="list-style-type: none"> <li>• Layout</li> <li>• Cut</li> <li>• Assembly</li> </ul>   |

**Achievement Criteria**

Performance	The learner will build an unequal slope intersecting roof.
Conditions	The learner will be given: <ul style="list-style-type: none"> <li>• Drawings and specifications</li> </ul>
Criteria	The learner will be evaluated on: <ul style="list-style-type: none"> <li>• Safety</li> <li>• Tool use</li> <li>• Compliance with Code</li> <li>• Drawing for adjustments</li> <li>• Accuracy</li> </ul>

**Line (GAC):** H **WOOD FRAME CONSTRUCTION**  
**Competency:** H7 **Build Specialized Framing Systems**

**Objectives**

To be competent in this area, the individual must be able to:

- Describe specialized framing systems.
- Build specialized framing systems.

**LEARNING TASKS**

1. Describe specialized framing systems

**CONTENT**

- Types
- Bay windows
- Bow windows
- Window boxes
- Drop ceiling
- Valences
- Pony walls
- Bulkheads
- Cornices
- Access floors
- Purpose
- Styles

2. Describe specialized roof systems

- Types
  - Polygon roofs
  - Gambrel
  - Mansard
  - Flat
  - Dormer
  - Cupola
  - Turret
  - Canopy
  - Spire
  - Saw tooth
  - Butterfly roof
- Components
  - False gable
  - Cricket/saddle
  - Parapet
  - Cant strip
  - Hidden gutters

- Methods of construction
    - Openings
    - Wall frame
    - Roof frame
    - Curbs
    - Vaulted ceilings
  
- 3. Plan specialized framing systems
  - Safety
  - Code requirements
  - Scale drawing
  - Construction sequence
  
- 4. Calculate specialized framing systems
  - Theoretical lengths
  - Materials
  
- 5. Build specialized framing systems
  - Layout
  - Cut
  - Assembly

**Achievement Criteria**

Performance	The learner will build a specialized framing, such as polygon roofs, bay windows, or dormers.
Conditions	The learner will be given: <ul style="list-style-type: none"> <li>• Drawings and specifications</li> </ul>
Criteria	The learner will be evaluated on: <ul style="list-style-type: none"> <li>• Safety</li> <li>• Tool use</li> <li>• Accuracy</li> <li>• Framing technique</li> </ul>

**Line (GAC):**            **H       WOOD FRAME CONSTRUCTION**  
**Competency:**       **H9 Build Timber and Engineered Wood Construction**

**Objectives**

To be competent in this area, the individual must be able to:

- Describe timber and engineered wood construction.

**LEARNING TASKS**

1. Describe timber construction

**CONTENT**

- Purpose
- Types
  - Traditional post and beam
  - Heavy timber
  - Engineered
  - Logs
  - Cross-laminated timber (CLT)
- Uses
- Hardware
- Tools
- Connections

**Line (GAC):** H **WOOD FRAME CONSTRUCTION**  
**Competency:** H10 **Build Decks and Exterior Structures**

**Objectives**

To be competent in this area, the individual must be able to:

- Describe exterior structures.
- Plan exterior structures.

**LEARNING TASKS**

1. Describe exterior structures

2. Plan exterior structures

**CONTENT**

- Purpose
- Types
  - Fences
  - Pergola
  - Gazebos
  - Privacy screens
  - Accessory buildings
- Components
- Methods
  
- Safety
- Code requirements
- Drawings and specifications
- Sequence

**Line (GAC):** I **FINISHING MATERIALS**  
**Competency:** I5 **Install Interior Finishes**

**Objectives**

To be competent in this area, the individual must be able to:

- Describe finished floors.
- Describe interior wall finishes and trims.
- Install interior wall finishes and trims.

**LEARNING TASKS**

**CONTENT**

- |   |   |
|---|---|
| 1. Describe finished floors                 | <ul style="list-style-type: none"> <li>• Types</li> </ul>   |
| 2. Plan the installation of finished floors | <ul style="list-style-type: none"> <li>• Safety</li> <li>• Code requirements</li> <li>• Material calculations</li> <li>• Storage and handling</li> <li>• Acclimatization</li> <li>• Subfloor preparation</li> <li>• Installation of sleepers</li> <li>• Layout procedures</li> <li>• Fasteners</li> <li>• Adhesives</li> <li>• Sanding/finishing</li> </ul> |
| 3. Describe interior finishes               | <ul style="list-style-type: none"> <li>• Types</li> <li>• Components</li> <li>• Materials</li> </ul>  |
| 4. Plan interior finishes                   | <ul style="list-style-type: none"> <li>• Safety</li> <li>• Code requirements</li> <li>• Drawings and specifications</li> <li>• Calculations</li> <li>• Sequence</li> <li>• Temporary protection</li> </ul>  |
| 5. Install interior finishes                | <ul style="list-style-type: none"> <li>• Layout</li> <li>• Cut</li> <li>• Assembly</li> </ul>   |

**Achievement Criteria 1**

- Performance    The learner will scribe fit paneling.
- Conditions     The learner will be given:
- Specifications
- Criteria        The learner will be evaluated on:
- Safety
  - Tool use
  - Fit

**Achievement Criteria 2**

- Performance    The learner will install casing and crown moulding.
- Conditions     The learner will be given:
- Specifications
- Criteria        The learner will be evaluated on:
- Safety
  - Tool use
  - Fit and finish

**Line (GAC):** I **FINISHING MATERIALS**  
**Competency:** I7 **Install Interior Floor, Ceiling and Wall Systems**

**Objectives**

To be competent in this area, the individual must be able to:

- Describe specialized floor systems.

**LEARNING TASKS**

1. Describe specialized floor systems

**CONTENT**

- Access flooring
- Sports surfaces

**Line (GAC):** J **BUILDING SCIENCE**  
**Competency:** J1 **Control the Forces Acting on a Building**

**Objectives**

To be competent in this area, the individual must be able to:

- Describe the forces acting on a building.
- Describe the construction details for wood frame seismic applications.
- Determine construction practices based on design loads and bearing capacities of soils.

**LEARNING TASKS**

**CONTENT**

- |   |  |
|---|--|
| 1. Describe forces acting on the building structure | <ul style="list-style-type: none"> <li>• Types of loads</li> <li>• Types of stress</li> <li>• Bearing capacities of soil</li> </ul>  |
| 2. Describe forces acting on the building envelope  | <ul style="list-style-type: none"> <li>• Weather/climate</li> <li>• Temperature</li> <li>• Wind</li> <li>• Water</li> <li>• Building orientation</li> <li>• Ultra violet radiation/sun</li> <li>• Relative humidity</li> <li>• Hydrostatic forces</li> <li>• Atmospheric pressure</li> <li>• Pressure differential</li> </ul>                      |
| 3. Describe seismic applications                    | <ul style="list-style-type: none"> <li>• Code requirements               <ul style="list-style-type: none"> <li>○ Brace wall panels</li> <li>○ Brace wall bands</li> <li>○ Sheathing types</li> <li>○ Nailing patterns</li> <li>○ Nail types</li> <li>○ Blocking and backing</li> <li>○ Bracing</li> <li>○ Floor diaphragms</li> </ul> </li> </ul> |
| 4. Describe seismic hardware and steel frames       | <ul style="list-style-type: none"> <li>• Hold down anchors</li> <li>• Straps</li> <li>• Bolts</li> <li>• Nails</li> <li>• Drag struts</li> <li>• Steel moment frames</li> </ul>  |
| 5. Describe live and dead load calculation          | <ul style="list-style-type: none"> <li>• Tributary area</li> <li>• Soil bearing capacities</li> <li>• Footing sizes</li> </ul>   |

# **Section 4**

## **TRAINING PROVIDER STANDARDS**

## Facility Requirements

### Classroom Area

- Comfortable seating and tables suitable for learning
- Compliance with the local and national fire code and occupational safety requirements
- Overhead and multimedia projectors with a projection screen
- Whiteboard with marking pens and erasers, or chalkboard with chalk and erasers
- Lighting controls to allow easy visibility of the projection screen while allowing students to take notes
- Windows must have shades or blinds to adjust sunlight
- In-room temperature control to ensure comfortable room temperature
- Acoustics in the room must allow audibility of the instructor
- Access to a computer lab complete with 16 computers and internet access
- Access to a library complete with reference material for student and instructor use

### Shop Area

- 2,400 square feet of workshop space per class of 16 students with a minimum ceiling height of 16 feet
  - This includes space for a tool crib
- Adequate lighting and lighting control
- Ventilation as per WorkSafeBC Standards
- Refuse and recycling bins for used shop materials
- First-aid facilities

### Lab Requirements

- N/A

### Student Facilities

- Adequate lunch room as per WorkSafeBC requirements
- Adequate washroom facilities as per WorkSafeBC requirements
- Personal storage lockers

### Instructor's Office Space

- Desk and filing space
- Computer

## Tools and Equipment

### Shop Equipment

#### *Required*

#### All Levels:

Eye protection  
Fall protection systems  
First aid kit  
Foot protection  
Hand protection

#### Standard Safety Equipment

Hard hat (head protection)  
Hearing protection  
Lung protection  
Reflective vest

#### Stationary Equipment

Dust collection equipment

#### Level-Specific:

#### Survey Instruments

1	Optical levels	2	Theodolite
---	----------------	---	------------

#### Rigging and Hoisting Equipment

1	Chokers	1	Ropes
1	Come-alongs	1	Skid ramps
1	Eyebolts	1	Tirfors
1	Nylon lifting straps	1	Turnbuckles
1	Pinch bar		

#### Stationary Equipment

3	Band saw	2	Sanders
1	Bench grinder	1	Table saw
3	Drill press	2	Thickness planer
2	Jointer		

**Shop (Facility) Tools**

***Standard Tools***

**All Levels:**

**Hand tools**

- |                              |  |
|------------------------------|--|
| Adjustable wrench            | Nail puller                                  |
| Allen wrenches               | Nail set                                     |
| Chalk line                   | Pencil/marketing instrument                  |
| Clamps                       | Pliers and side cutter                       |
| Combination square           | Plumb bob                                    |
| Cordless drill               | Pry bars                                     |
| Dry line                     | Scale rulers                                 |
| Framing square               | Screwdrivers (Robertson, Phillips, straight) |
| Hammers (framing, finishing) | Sliding T-bevel square                       |
| Hand saws                    | Speed square                                 |
| High speed drill set         | Stair gauges                                 |
| Knives                       | Try square                                   |
| Levels                       | Wrecking bar                                 |
| Measuring tape               |  |

**Portable Power Tools and Portable Equipment**

- |                         |                                 |
|-------------------------|---------------------------------|
| Calculator              | Mitre saw                       |
| Circular saw            | Portable power tool accessories |
| Cordless drill and bits | Power nailer/fastener           |
| Electric drill          | Reciprocating saw               |
| Extension cords         | Step ladders                    |
| Grinder                 | Wet/dry vacuum                  |
| Ladders                 | Wheelbarrow                     |

**Level-Specific:**

**Hand tools**

1,3	Angle divider	1,3	Plane (compass)
1	Aviation snips	1,3	Plane (fore)
1	Back saw	1,3	Plane (jack)
2,3	Butt gauge	1,3	Plane (jointer)
2,3,4	Caulking gun	1,3	Plane (rabbet)
1	Circle cutter	1,3	Plane (router)
1,3	Concrete bits	1,3	Plane (smooth)
3	Cone/tie wrench	1,3	Plane (universal)
3	Coping saw	1,3	Putty knife
3	Dividers	1,3	Rasp
3	Drywall T-square	1,3	Scriber
1	File	1,3	Scribing compass
1	Hack saw	1,3	Set of chisels
2	Hand shears	1,2	Stapler
2,3	Hinge gain template	1,3	Stones (oil and water)
3	Hole saw	1,2	Tape measure 100 ft.
3	“J” rollers	3	Trammel points
3	Keyhole saw	1,3	Wood boring bits
3	Laminate knives	1,3	Wood chisels
1,3	Plane (bench)	1,3	Wood spade bit set
1,3	Plane (block)		

**Portable Power Tools and Portable Equipment**

1	Air compressor	1	Ladder jacks
2	Belt sander	3	Laminate trimmer
2	Biscuit joiner	2	Oxy-fuel outlet
3	Concrete cutting saw	2	Palm sander
3	Concrete vibrator	2	Planer
3	Construction heaters	1	Pneumatic tools
3	Cut-off saw	1,3	Powder actuated tools
3	Drywall gun	1,2	Roof jack
3	Electric chipping hammer	2	Router and bits
1	Generator	2	Sander
3	Grinder	1	Scaffold
3	Hammer drill	3	Stapler
3	Jackhammer	1	Wall jack
1	Jigsaw		

**Student Tools (supplied by student)*****Required***

- Contact training facility for required tools and equipment

***Recommended***

- Steel toed boots
- Safety glasses
- Scientific calculator with trigonometry functions
- Weather appropriate clothing
- Carpenter's apron
- Hammer
- Metric and imperial tape measures
- Drafting supplies – drawing pencils, metric and imperial scales, T-square, set-squares, geometry set
- Squares
- Knives
- Hard Hat
- Gloves

## Reference Materials

### Required Reference Materials

- Contact training facility for required reference material

#### Level 1:

- **Carpenter Apprenticeship Program: Year 1: (2 Binder Set) – BC Trade Modules** ([www.crownpub.bc.ca](http://www.crownpub.bc.ca))
- Carpentry: Third Canadian Edition by Floyd Vogt and Michael Nauth
- British Columbia Building Code

#### Level 2:

- **Carpenter Apprenticeship Program: Year 2: (2 Binder Set) – BC Trade Modules** ([www.crownpub.bc.ca](http://www.crownpub.bc.ca))
- Carpentry: Third Canadian Edition by Floyd Vogt and Michael Nauth
- British Columbia Building Code

#### Level 3:

- **Carpenter Apprenticeship Program: Year 3: (2 Binder Set) – BC Trade Modules** ([www.crownpub.bc.ca](http://www.crownpub.bc.ca))
- Carpentry: Third Canadian Edition by Floyd Vogt and Michael Nauth
- British Columbia Building Code

#### Level 4:

- **Carpenter Apprenticeship Program: Year 4: (2 Binder Set) – BC Trade Modules** ([www.crownpub.bc.ca](http://www.crownpub.bc.ca))
- Carpentry: Third Canadian Edition by Floyd Vogt and Michael Nauth
- British Columbia Building Code

### Recommended Resources

- *Occupational Health & Safety Regulation*, Worker's Compensation Board (1989) ISBN 0-8269-0403-3  
All carpenters in British Columbia are required to use and adhere to this regulation. The OHS Regulation is always changing to meet the needs of the construction industry. Use the WorkSafeBC website to keep up-to-date with changes to the regulation and to be informed of new workplace hazards. [www.worksafebc.com](http://www.worksafebc.com)
- *Concrete Formwork* by Leonard Koel, 4<sup>th</sup> Edition ISBN 9780826907103
- *Principles and Practices of Commercial Concrete*
- *Understanding Construction Drawings* Tom Stephenson
- Workplace Hazardous Materials Information System (WHMIS) and First Aid, <http://www.hc-sc.gc.ca/ewh-semt/occup-travail/whmis-simdut/index-eng.php>
- WorkSafeBC, [www.worksafebc.com](http://www.worksafebc.com)

**Codes**

- National Fire Code of Canada <http://www.nrc-cnrc.gc.ca>
- BC Ministry of Housing <http://www.gov.bc.ca/buildingcodes> Queen’s Printer for BC Code books
  - BC Building Code
  - BC Fire Code
  - BC Electrical Code
- National Fire Protection Association [www.nfpa.org](http://www.nfpa.org)
  - NFPA 80 – Standards for Fire Doors and Fire Windows
  - NFPA 101 – Life Safety Code
- Canadian National Building Code <http://www.nrc-cnrc.gc.ca>

**Suggested Texts**

- *Building Trades Blueprint Reading* Sandberg – Copp Clark (1982)  
ISBN 0-7730-2900-1

This text is suggested to complete the technical training component of the carpentry apprenticeship program. It describes blueprint-reading techniques for the construction of residential buildings. Available online at: <https://www.amazon.ca/Building-Trades-Blueprint-Reading-Residential/dp/0773029001>

- *Principles and Practices of Commercial Construction, 9<sup>th</sup> Edition* Smith – Prentice-Hall (2000)  
ISBN 0-13-026162-9

This text is suggested to complete the technical training component of the carpentry apprenticeship program. It covers construction techniques for the construction of large buildings. Available online at: <https://www.pearsonhighered.com/program/Andres-Principles-Practices-of-Commercial-Construction-9th-Edition/PGM223960.html>

- *Building Trades Dictionary 4<sup>th</sup> Edition* Toenjes – American Technical Publishers (1989)  
ISBN-13: 978-0-8269-0406-5

The Building Trades Dictionary explains the meaning of many construction terms. The text makes good use of diagrams. It is useful as an auxiliary reference text that may be available at the public library. CD Rom is available. Available online at: <http://www.atplearning.com/Building-Trades-Dictionary-P41.aspx>

- *Practical Problems in Mathematics For Carpenters* Huth – Delmar (1991)  
ISBN 0-8273-4579-8

Harry Huth, the author of this text, uses many diagrams and sample problems to lead the learner through the methods used to solve carpentry related math problems. The text is useful as an auxiliary reference text that may be available at the public library. Available online at: <http://www.amazon.com/Practical-Problems-Mathematics-Carpenters-Series/dp/1111313423>

- *Permanent Wood Foundations* Canadian Wood Council (1992)  
ISBN 0-921628-19-6

The Canadian Wood Council publishes this text. It includes many diagrams and does an excellent job of describing wood foundations. It is useful as an auxiliary reference text that may be available at the public library. Available online at: <https://webstore.cwc.ca/technical-books/pwf001e-permanent-wood-foundations>

- *Formwork for Concrete* Hurd – American Concrete Institute SP-4 (1989)  
LCC 89-81442

Formwork for Concrete, Principals and Practices of Commercial Construction is the definitive text on the construction of formwork. The explanations and diagrams are excellent. It is useful as an auxiliary reference text that may be available at the public library.

Available online at: <http://www.amazon.com/Formwork-Concrete-ACI-SP4-M-K-Hurd/dp/B0034W2LVW>

- *Concrete Technology* White - Delmar (1991)  
ISBN 0-8273-3635-7

Concrete Technology is a simplified version of Design and Control of Concrete Mixtures. It is useful as an auxiliary reference text that may be available at the public library. Available online at:

<http://www.amazon.com/Concrete-Technology-Trade-Industry/dp/0827336357>

- *Hand Woodworking Tools* McDonnell - Delmar (1978)  
ISBN 0-8273-1098-6

Hand Woodworking Tools gives a wonderful description of the traditional hand woodworking tools used in carpentry. It is an older text that may be out of print but is listed here because of the quality of the diagrams used in the text. It is useful as an auxiliary reference text that may be available at the public library. Available online at: [http://www.abebooks.com/servlet/BookDetailsPL?bi=11800428479&cm\\_sp=seedet- -plp- -bdp](http://www.abebooks.com/servlet/BookDetailsPL?bi=11800428479&cm_sp=seedet- -plp- -bdp)

- *Design and Control of Concrete Mixtures, 8<sup>th</sup> Canadian Edition* ISBN-13: 978-0893122720

*The Design and Control of Concrete Mixtures* gives a thorough description of the components of concrete and how they work together. It is useful as an auxiliary reference text that may be available at the public library.

Available online at: <http://www.cement.org/for-concrete-books-learning/concrete-technology/concrete-design-production/design-and-control-mixtures-landing-page>

- *Understanding Wood* Hoadley - Taunton Press (2005)  
ISBN 978-1-56158-358-4

Understanding Wood is a very well written text on the properties of wood. It describes how the properties of wood can be predicted and controlled. It is useful as an auxiliary reference text that may be available at the public library. Available online at: <http://www.tauntonstore.com/understanding-wood-2nd-edition-r-bruce-hoadley-070490.html>

- *Canadian Woodframe House Construction, CMHC, Revised 2013*

The Central Mortgage and Housing Corporation (CMHC) publish this useful book. It describes all aspects of wood frame construction. It is useful as an auxiliary reference text that may be available at the public library and is also available on CD-ROM. It is available for free download on the CMHC website. Available online at: <http://www03.cmhc-schl.gc.ca/catalog/productDetail.cfm?cat=178&itm=1&lang=en&sid=gp9iTS>

- *National Building Code of Canada*

The National Building Code (NBC) is the main building regulation text for Canada. Local Building Codes are based on this text. When working in British Columbia, it is useful to be aware of the difference between the BC Code and the NBC. This text is available at public libraries and at the college library and is also available on CD-ROM. Available online at: [http://www.nrc-cnrc.gc.ca/eng/solutions/advisory/codes\\_centre\\_index.html](http://www.nrc-cnrc.gc.ca/eng/solutions/advisory/codes_centre_index.html)

- *Construction Materials, Methods and Techniques* [William P. Spence](#), [Eva Kultermann](#) (2016)

This text does an excellent job of describing the properties of construction materials. It is useful as an auxiliary reference text that may be available at the public library or at the college library. Available online at: <https://www.amazon.ca/Construction-Materials-Methods-Techniques-Sustainable/dp/1435481089>

- *Why Buildings Stand Up* [Salvadori](#), Norton Publishing (2002)  
ISBN 978-0-393-30676-7

Why Buildings Stand Up does a great job of describing the physics of building construction. It uses many historical references and truly simplifies the forces acting on a building. It is useful as an auxiliary reference text that may be available at the public library or at the college library. Available online at: <http://books.wwnorton.com/books/978-0-393-30676-7/>

- *Architectural and Graphic Standards, Student Edition* [Charles George Ramsey](#), [Harold, Reeve, Sleeper, Bruce Bassler](#) (Editor)  
American Institute of Architects (2008)  
ISBN 0-471-04683-3

The construction details shown in this text are wonderful. Both residential and commercial construction details are shown. It is useful as an auxiliary reference text that may be available at the public library or at the college library. Available online at: <https://www.amazon.ca/Architectural-Graphic-Standards-Student-Edition/dp/0470085460>

- *Hoisting and Rigging Safety Manual*

The Ontario Safety Association published this manual. It provides a good description of safe rigging practices. It is useful as an auxiliary reference text that may be available at the public library or at the college library. Available online at: [http://www.oetio.com/Hoisting\\_and\\_Rigging\\_Safety\\_Manual.aspx](http://www.oetio.com/Hoisting_and_Rigging_Safety_Manual.aspx)

- *De Walt Carpentry and Framing* ISBN 13:978-1-1111361-3-0

De Walt Carpentry and Framing handbook spells out, through pictures, the step-by-step procedures associated with key carpentry concepts. The accompanying text is clear, straightforward, and accessible, clarifying and elaborating on the visuals. Coverage begins with a discussion of house types and foundations, gradually progressing to more complex areas, such as wall and floor framing. Available online at: [http://www.amazon.com/gp/product/1111136130/ref=pd\\_lpo\\_sbs\\_dp\\_ss\\_1?pf\\_rd\\_p=1944687522&pf\\_rd\\_s=po-top-stripe-1&pf\\_rd\\_t=201&pf\\_rd\\_i=1111313423&pf\\_rd\\_m=ATVPDKIKX0DER&pf\\_rd\\_r=1XXXKR46T155ATRSSY32](http://www.amazon.com/gp/product/1111136130/ref=pd_lpo_sbs_dp_ss_1?pf_rd_p=1944687522&pf_rd_s=po-top-stripe-1&pf_rd_t=201&pf_rd_i=1111313423&pf_rd_m=ATVPDKIKX0DER&pf_rd_r=1XXXKR46T155ATRSSY32)

**NOTE:**

This list of Reference Materials is for training providers. Apprentices should contact their preferred training provider for a list of recommended or required texts for this program.

## **Instructor Requirements**

### **Occupation Qualification**

The instructor must possess one of the following:

- Carpenter Certificate of Qualification from British Columbia, preferably with an Interprovincial Red Seal Endorsement
- Carpenter Certificate of Qualification from another Canadian jurisdiction, complete with the Interprovincial Red Seal Endorsement

### **Work Experience**

- A minimum of 5 years' experience working in the industry as a journeyman.

### **Instructional Experience and Education**

It is preferred that the instructor also possesses one of the following:

- An Instructors Diploma or equivalent
- A Bachelor's Degree in Education
- A Master's Degree in Education

## Assessment Guidelines

## Appendix A Assessment Guidelines

**Program:** Carpenter

Training providers delivering Carpenter apprenticeship in-school technical training are required to enter the following information in SkilledTradesBC Portal for each apprentice:

- An in-school mark in the form of a percentage

**Training Provider Component:** In-School Technical Training

The in-school mark for each level is derived from a combination of theory and practical assessments. This mark is then combined with the SkilledTradesBC Standard Level Examination to determine a final mark for the level.

Calculation tables showing the subject competencies, level percentage weightings and level examination weightings are shown in the Grading Sheet: “Subject Competencies and Weightings” section of this document.

Carpenter Level 1, 2 & 3 in-school marks are calculated by:

- Totaling the level *theory* competency results as noted in the competencies and weightings tables and multiplying the total by 50% for Level 1, 2 & 3 to produce a weighted theory result;
- Totaling the level *practical* competency results as noted in the competencies and weightings tables and multiplying the total by 50% for Level 1, 2 & 3 to produce a weighted practical result;
- Adding the theory and practical competency results together to determine the final in-school result.

Successful completion of the in-school training for each level is defined as an in-school mark of 70% or greater.

**SkilledTradesBC Component:** SkilledTradesBC Standardized Level Examinations - Level 1, 2 & 3

SkilledTradesBC Portal automatically calculates the final mark for a level once the in-school training and standard level exam marks are entered into the system. This mark is calculated by blending the standardized exam percentage score and the in-school technical training percentage score to determine the final mark for the level.

In-school technical training (combined theory & practical) is weighted at 80% and the SkilledTradesBC standardized level exam is weighted at 20%. These two scores are combined to determine the final level mark. This result is the final mark that is recorded in SkilledTradesBC Portal.

- A mark of 70% or greater is required to pass the level when combining the final in-school percentage score and the final SkilledTradesBC standardized level exam percentage score.

**Component: Level 4 - Proprietary Examinations**

Until further notice, Training Providers delivering the Carpenter program will continue using their institution's proprietary examination in the calculation of the apprentices' achievement for Level 4. The percentage weighting of this exam is 30% of the final in-school technical training mark.

Refer to the Grading Sheet Subject Competencies and Weightings Table to determine the calculation process for completing a final Level 4 percentage. The final blended mark for Level 4 is to be reported to SkilledTradesBC and must be 70% or greater to pass the level.

**Interprovincial Red Seal Exam**

In order to achieve certification, Carpenter apprentices are required to write the Carpenter Interprovincial Red Seal exam after completing all levels of in-school technical training. Apprentices must have passed all levels of in-school technical training or be approved challengers to sit the exam. A score of 70% or greater is required for a pass.

Interprovincial Red Seal exams should be requested by training providers via the usual SkilledTradesBC procedure.

The SkilledTradesBC will administer and invigilate Interprovincial Red Seal exams and score and record exam results in SkilledTradesBC Portal.

<b>Training Provider enters final in-school mark into SkilledTradesBC Portal</b> A score of 70% or greater is required for a pass.	FINAL %	

All apprentices who complete Level 4 of the Carpenter program with a FINAL level mark of 70% or greater will write the Interprovincial Red Seal examination as their final assessment.

SkilledTradesBC will enter the apprentices' Carpenter Interprovincial examination mark in SkilledTradesBC DA. A minimum mark of 70% on the examination is required for a pass.

# Appendix B

## Glossary

## Appendix B Glossary

<b>Adjust</b>	To change something in a minor way so that it works better, such as changing the mitre angle on a compound mitre saw.
<b>Build</b>	To make something by putting together parts or materials; construct; erect. This includes layout and assembly techniques; cutting, fitting, fastening, and joinery.
<b>Calculate</b>	Determine the amount or number of something mathematically. Calculating includes all aspects of estimating labour and materials (where there is some overlap with planning), calculation of volumes, theory, lengths of rafters, rise and run of stairs, board foot measure, etc.
<b>Consult</b>	To ask for the professional opinion of someone or to talk with someone, or look up information in a document, in order to make a decision.
<b>Construction Drawings and Specifications</b>	Blueprints, plans, instructions, information
<b>Correct</b>	Having no errors or mistakes. Calculations should be done correctly.
<b>Describe</b>	To explain or give an account of an item or concept. This means an introduction to a topic area that will include terminology, safety as it pertains to the topic, types and uses of the item. For example, describing roofs will include terminology such as rise and run, slope, rafter, fascia; discussion regarding working at heights; types of roofs such as gable and hip.
<b>Identify</b>	Establish or indicate what something is. This is the most basic level of learning and typically precedes all others. In the case of a lengthy learning period (such as an apprenticeship), it is often adequate to identify a tool or procedure well in advance of actually describing and using the tool.
<b>Install</b>	To make ready to be used in a certain place, such as installing a door or window hardware.
<b>Interpret</b>	To explain or understand the meaning of something. This primarily means using construction drawings. Given the alphabet of lines and numerous symbols and formats, construction drawings are a language of their own. The carpenter must interpret two dimensional drawings to build three dimensional objects.
<b>Layout</b>	The way in which the parts of something are arranged or laid out. This is a fundamental aspect of a carpenter's role in the construction process and includes everything from use of surveying equipment to locate buildings on sites, to making scale drawings of complex joinery details such as intersecting unequal slope roof framing members. It is included in the Learning Tasks entitled 'Build' because it is often the first step in putting things together, but in some cases 'Layout' could be a separate Learning Task. A procedure or group of components must be correctly laid out in order for construction to proceed.

<b>Maintain</b>	To keep a tool in good condition by performing regular maintenance such as lubrication or cleaning, as well as making repairs and correcting problems.
<b>Plan</b>	<p>An intention or decision about what one is going to do; to decide on and arrange in advance.</p> <p>Planning includes all aspects of reading and interpreting construction drawings and documentation; any reference to WorkSafeBC, building codes and bylaws; consultation with architects, engineers, sub trades, and owners occurs as part of planning. There is an overlap between planning and calculating, primarily in terms of estimating time and materials.</p>
<b>Prepare</b>	To work out the details of or plan in advance; to make something ready for some activity or purpose, such as preparing the site for construction activities.
<b>Proper</b>	In a thorough manner; suitable for some purpose or situation. Tools are used properly.
<b>Systems</b>	A set of detailed methods, procedures and routines created to carry out a specific activity, perform a duty, or solve a problem. Typically, the use of the term systems refers to ICI construction. It is used to differentiate between ICI systems, such as proprietary forms or interior finishes, and common residential construction techniques.
<b>Use</b>	The act of using something. This typically involves the safe and proper operation of a tool or construction system. In the case of formwork systems, safe, proper and efficient use includes the ease of stripping the formwork.

**Note:** Additional industry terms are defined in the Red Seal National Occupational Analysis available [here](#).
