## **INTRODUCTION**

### **Motorcycle Technician**

## **Foreword**

This revised Program Outline is intended as a guide for instructors, apprentices, and employers of apprentices as well as for the use of industry organizations, regulatory bodies, and provincial and federal governments. It reflects updated standards based on the 2020 Red Seal Occupational Standard (RSOS). It was developed by British Columbia industry and instructor subject matter experts.

Practical instruction by demonstration and student participation should be integrated with classroom sessions. Safe working practices, even though not always specified in each operation or topic, are an implied part of the program and should be stressed throughout the apprenticeship.

This Program Outline includes a list of recommended reference textbooks that are available to support the learning objectives and the minimum shop requirements needed to support instruction.

Competencies are to be evaluated through written exams and practical assessments. A passing grade is achieved by getting an overall mark of 70%. See the Assessment Guidelines in Section 4 for more details.

Achievement Criteria are included for those competencies that require a practical assessment. The intent of including Achievement Criteria in the Program Outline is to ensure consistency in training across the many training institutions in British Columbia. Their purpose is to reinforce the theory and to provide a mechanism for evaluation of the learner's ability to apply the theory to practice. It is important that these performances be observable and measurable and that they reflect the skills spelled out in the competency. The conditions under which these performances will be observed and measured must be clear to the learner as well as the criteria by which the learner will be evaluated. The learner must also be given the evaluation criteria.

The performance spelled out in the Achievement Criteria is a suggested performance and is not meant to stifle flexibility of delivery. Training providers are welcome to substitute other practical performances that measure similar skills and attainment of the competency. Multiple performances may also be used to replace individual performances where appropriate.

### **SAFETY ADVISORY**

Be advised that references to the WorkSafe BC safety regulations contained within these materials do not/may not reflect the most recent Occupational Health and Safety Regulation (the current Standards and Regulation in BC can be obtained on the following website: <http://www.worksafebc.com>). Please note that it is always the responsibility of any person using these materials to inform him/herself about the Occupational Health and Safety Regulation pertaining to his/her work.

## **Acknowledgements**

The Program Outline was prepared with the advice and direction of the following industry and instructor Subject Matter Experts:

- Steve Coates, Kelowna Honda Powerhouse
- Kevin Connor, Yamaha Motor Canada
- Mike Gardell, BCIT
- Rory Lambie, Ducati Canada

SkilledTradesBC would like to acknowledge the dedication and hard work of all the industry and instructor representatives appointed to identify the training requirements of the Motorcycle Technician occupation.

## How to Use this Document

This Program Outline has been developed for the use of individuals from several different audiences. The table below describes how each section can be used by each intended audience.

Section	Training Providers	Employers/ Sponsors	Apprentices	Challengers
<b>Program Credentialing Model</b>	Communicates program length and structure, and all pathways to completion	Illustrates the length and structure of the program	Illustrates the length and structure of the program, and pathway to completion	Illustrates the challenger pathway to Certificate of Qualification
<b>OAC</b>	Communicates the competencies that industry has defined as representing the scope of the occupation	Displays the competencies that an apprentice is expected to demonstrate in order to achieve certification	Displays the competencies apprentices will achieve as a result of program completion	Displays the competencies challengers must demonstrate in order to challenge the program
<b>Training Topics and Suggested Time Allocation</b>	Shows proportionate representation of general areas of competency (GACs) at each program level, the suggested proportion of time spent on each GAC, and percentage of time spent on theory versus practical application	Shows the scope of competencies covered in the technical training, the suggested proportion of time spent on each GAC, and the percentage of that time spent on theory versus practical application	Shows the scope of competencies covered in the technical training, the suggested proportion of time spent on each GAC, and the percentage of that time spent on theory versus practical application	Shows the relative weightings of various competencies of the occupation on which assessment is based
<b>Program Content</b>	Defines the objectives, learning tasks, high level content that must be covered for each competency, as well as defining observable, measurable achievement criteria for objectives with a practical component	Identifies detailed program content and performance expectations for competencies with a practical component; may be used as a checklist prior to signing a recommendation for certification (RFC) for an apprentice	Provides detailed information on program content and performance expectations for demonstrating competency	Allows individual to check program content areas against their own knowledge and performance expectations against their own skill levels
<b>Training Provider Standards</b>	Defines the facility requirements, tools and equipment, reference materials (if any) and instructor requirements for the program	Identifies the tools and equipment an apprentice is expected to have access to; which are supplied by the training provider and which the student is expected to own	Provides information on the training facility, tools and equipment provided by the school and the student, reference materials they may be expected to acquire, and minimum qualification levels of program instructors	Identifies the tools and equipment a tradesperson is expected to be competent in using or operating; which may be used or provided in a practical assessment

Section	Training Providers	Employers/ Sponsors	Apprentices	Challengers
<b>Appendix – Glossary and Acronyms</b>			Defines program specific terms and acronyms	

# **Section 2**

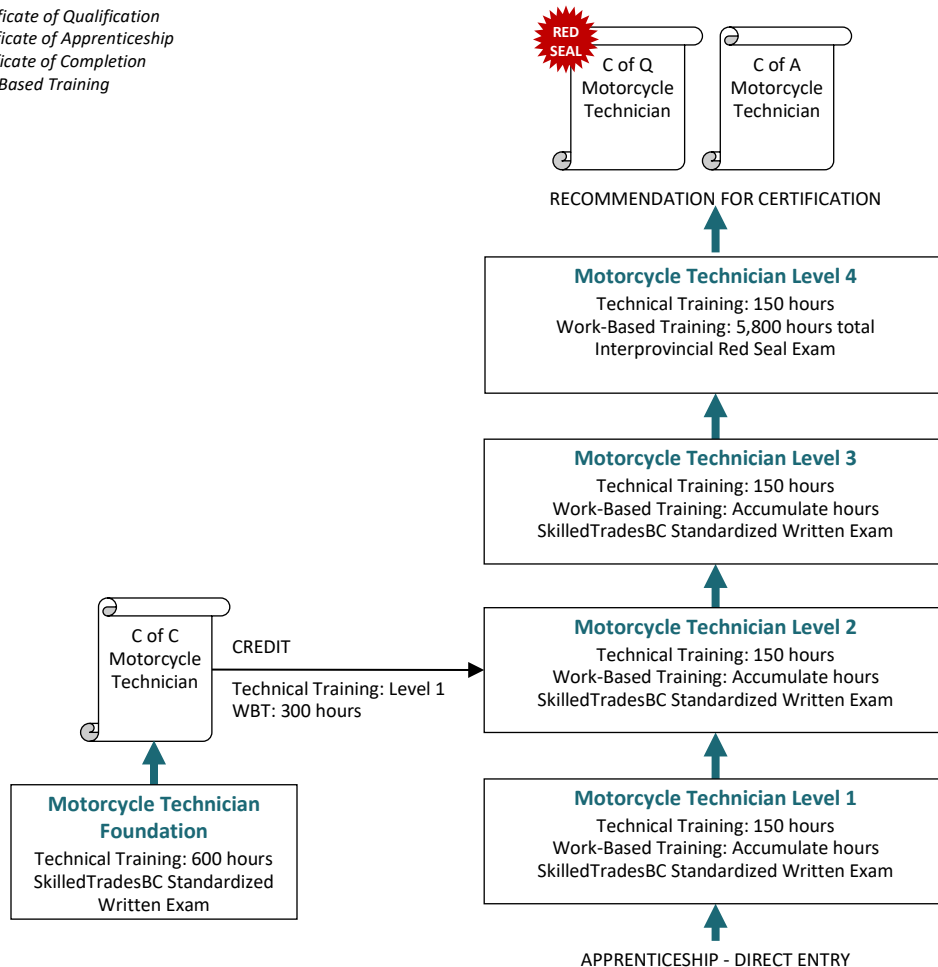

## **PROGRAM OVERVIEW**

### **Motorcycle Technician**

## Program Credentialing Model

### Motorcycle Technician

*C of Q = Certificate of Qualification  
C of A = Certificate of Apprenticeship  
C of C = Certificate of Completion  
WBT = Work-Based Training*

#### CROSS-PROGRAM CREDITS

Individuals who hold the credentials listed below are entitled to receive partial credit toward the completion requirements of this program

## Occupational Analysis Chart

### MOTORCYCLE TECHNICIAN

**Occupation Description:** Motorcycle technicians work primarily on 2 and 3-wheeled motorcycles and other units such as motor scooters. They inspect, clean, test, assemble, diagnose, maintain and repair engines, transmissions, drive systems, steering assemblies, braking systems, chassis and suspension, electrical systems, vehicle management systems, fuel systems and exhaust systems. They may specialize in repairing, rebuilding, customizing or servicing these systems or assemblies.

Motorcycle technicians work with hand, power, pneumatic, measuring, diagnostic and testing tools, and shop equipment. Reference material, documentation, computers and software are also necessary tools in this trade. With additional training, Motorcycle technicians can transfer their skills and knowledge to related units and equipment such as, but not limited to, all-terrain vehicles, snowmobiles, watercraft and outdoor power equipment.

<b>PERFORM SAFETY-RELATED FUNCTIONS</b> <b>A</b>	Maintain safe work environment A1	Use personal protective equipment (PPE) and safety equipment A2

- Replacement
- Disposal
- Storage

**Line (GAC):            B    PERFORM ROUTINE WORK PRACTICES**

**Competency:        B1    Use trade-related consumables**

### **Objectives**

To be competent in this area, the individual must be able to:

- Describe trade-related consumables.

### **LEARNING TASKS**

1. Describe trade-related consumables

### **CONTENT**

- Manufacturers' specifications and procedures
- Regulations
- Applications
- Procedures for use
- Storage
- Disposal
- Environmental considerations
- Types
  - Glues
  - Sealants
  - Paints
  - Fasteners
  - Lubricants
  - Electrical supplies
  - Bonding and locking agents
  - Solvents
  - Cleaners

<b>Line (GAC):</b>	<b>B</b>	<b>PERFORM ROUTINE WORK PRACTICES</b>
<b>Competency:</b>	<b>B2</b>	<b>Perform periodic maintenance of lubrication systems</b>

### Objectives

To be competent in this area, the individual must be able to:

- Describe lubrication theory, types and classification systems.
- Describe lubricating two-stroke and four-stroke engines.
- Describe maintenance of lubrication systems.
- Service engine oil and filters.

### LEARNING TASKS

1. Describe lubrication theory

### CONTENT

- Friction
- Petroleum-based oils
- Synthetic oils
- Semi-synthetics or blends
- Environmentally-safe oils
  - Vegetable-based oil
- Hydrodynamic lubrication

2. Describe types of lubricants

- Oils
  - Types
    - Two-stroke
    - Four-stroke
    - Gear
    - Hydraulic
    - Vegetable-based
  - Properties
  - Additives
    - Teflon
    - Moly blend
  - Uses
- Greases
  - Types
    - Soap-based
    - Clay-based
  - Properties
  - Additives
  - Uses
- Environmental considerations

3. Describe lubricant classification systems

- Society of Automotive Engineering (SAE)

**LEARNING TASKS**

**CONTENT**

- Oil functions
  - Viscosity
  - Single and multi grades
  - Detergent/non detergent
  - American Petroleum Institute (API)
  - Japanese Automotive Standards Organization (JASO)
  - National Lubricating Grease Institute (NLGI)
  - Ratings and labelling
  - Two-stroke
    - Two-cycle (TC)
    - Two-cycle water cooled (TC-W)
    - Formulations (TC-W2, TC-W3)
  - Four-stroke
    - JASO MA (for wet-clutch)
    - JASO MB (for automatic)
  
- 4. Describe lubricating two- and four- stroke engine systems
  - Two-stroke
    - Mix ratios
    - Injected
    - Pre-mixed
  - Four-stroke
    - Crankcase (wet sump)
    - Dry sump
  
- 5. Describe maintenance of lubrication systems
  - Scheduling
    - Monthly
    - Distance
    - Hourly
    - Condition (moisture)
  - Filter change
    - Environment conditions
      - Normal
      - Severe
      - Extreme
  - Filters
    - Oil
    - Positive Crankcase Ventilation (PCV)
  - Materials
    - Foam

**LEARNING TASKS**

**CONTENT**

6. Describe servicing lubrication systems

- Metal mesh
- Paper
- Canister
- Oiled
- Manufacturers' specifications and procedures
- Precautions
  - Spillage
  - Hot/cold drain
  - Over/under filling
  - Turbo priming
  - Post-change leak inspection
  - Correct fluids
- Procedures
  - Hot/cold drain
  - Stepped procedures
  - Priming
  - Filling
  - Test ride
- Fluid service
  - Engine oil
  - Transmission
  - Differentials
  - Final drives (shaft drives)
  - Hydraulics
  - Brake
  - Clutch
  - Gearboxes

7. Perform periodic maintenance of lubrication systems

- Servicing
  - Engine oil
  - Filters

**Achievement Criteria**

Performance	The learner will service engine oil and filters.
Conditions	<p>The learner will be given</p> <ul style="list-style-type: none"> <li>• Manufacturers' specifications and procedures</li> <li>• Motorcycle</li> <li>• Tools and equipment</li> </ul>
Criteria	<p>The learner will be evaluated on</p> <ul style="list-style-type: none"> <li>• Safety</li> <li>• Adherence to manufacturers' specifications and procedures</li> <li>• Quality of service</li> </ul>

**Line (GAC):**        **B    PERFORM ROUTINE WORK PRACTICES**  
**Competency:**      **B3    Perform periodic maintenance of cooling systems**

### Objectives

To be competent in this area, the individual must be able to:

- Service cooling systems, including air and liquid cooled systems.

### LEARNING TASKS

### CONTENT

- |   |  |
|---|--|
| 1. Describe engine cooling theory               | <ul style="list-style-type: none"> <li>• Air cooling               <ul style="list-style-type: none"> <li>○ Oil cooling</li> <li>○ Surface area</li> <li>○ Cooling fins</li> <li>○ Air flow</li> </ul> </li> <li>• Liquid cooling               <ul style="list-style-type: none"> <li>○ Coolant flow</li> <li>○ Pressurized systems</li> <li>○ Radiant heat dissipation</li> <li>○ Types of coolants                   <ul style="list-style-type: none"> <li>– Ethylene glycol</li> <li>– Long-life</li> <li>– Environmentally safe</li> </ul> </li> </ul> </li> </ul> |
| 2. Perform maintenance of liquid-cooled systems | <ul style="list-style-type: none"> <li>• Manufacturers' specifications and procedures</li> <li>• Coolant testing               <ul style="list-style-type: none"> <li>○ pH</li> <li>○ Concentration</li> <li>○ Hydrometer</li> <li>○ Electrolysis (with volt meter)</li> </ul> </li> <li>• Coolant changing</li> <li>• Thermostat testing</li> <li>• Pressure testing</li> <li>• Thermostatic switches</li> <li>• Fans</li> </ul>  |
| 3. Perform maintenance of air-cooled systems    | <ul style="list-style-type: none"> <li>• Manufacturers' specifications and procedures</li> <li>• Oil cooler inspections</li> <li>• Cooling fin maintenance</li> <li>• Air ducting (shrouds)</li> <li>• Fans</li> <li>• Cleaning procedures</li> </ul>  |

**Achievement Criteria**

Performance	The learner will service cooling systems.
Conditions	<p>The learner will be given</p> <ul style="list-style-type: none"> <li>• Manufacturers' specifications and procedures</li> <li>• Motorcycle</li> <li>• Tools and equipment</li> </ul>
Criteria	<p>The learner will be evaluated on</p> <ul style="list-style-type: none"> <li>• Safety</li> <li>• Adherence to manufacturers' specifications and procedures</li> <li>• Quality of service</li> </ul>

**Line (GAC):**        **B    PERFORM ROUTINE WORK PRACTICES**  
**Competency:**     **B4    Perform periodic maintenance of bearings**

### Objectives

To be competent in this area, the individual must be able to:

- Describe bearing types and their maintenance.
- Service wheel bearings.

### LEARNING TASKS

1. Describe bearing systems

### CONTENT

- Rolling
  - Design
  - Components
  - Load application
  - Uses
    - Rotating shafts
    - Rotating axles
  - Types
    - Single ball
    - Double ball
    - Needle
    - Taper roller
- Plain
  - Uses
    - Journals
    - Shafts
  - Types
    - Shell
    - Bushing
    - Oil-lite

2. Describe bearing maintenance

- Cleaning
  - Solvent bath
  - Rubber precautions
- Inspection
  - Spalling
  - Overheating
  - Electrical pitting
  - Denting and brinelling
  - Water damage
  - Coolant damage
- Lubrication
  - Oiling

**LEARNING TASKS**

**CONTENT**

3. Perform simple bearing maintenance

- Packing
- Pre-loading
- Basic diagnosis of bearings
- Replacement of wheel bearings

**Achievement Criteria**

**Performance** The learner will service wheel bearings.

**Conditions** The learner will be given

- Manufacturers' specifications and procedures
- Motorcycle
- Tools and Equipment

**Criteria** The learner will be evaluated on

- Safety
- Adherence to manufacturers' specifications and procedures
- Quality of service

**Line (GAC):            B    PERFORM ROUTINE WORK PRACTICES**

**Competency:        B5    Perform storage procedures**

### **Objectives**

To be competent in this area, the individual must be able to:

- Describe storage procedures.

### **LEARNING TASKS**

1. Describe storage procedures

### **CONTENT**

- Manufacturers' specifications and procedures
- Short-term (seasonal)
- Long-term
  - Returning motorcycle to service
- Lubing cylinders
- Precautions
  - Storage oils
  - Cycling engine
- Draining carburetors
- Topping up tanks
- Adding stabilizers
- Protective coatings
- Disconnecting batteries
  - Full charge
- Setting tire pressure
- Fitted covers

**Line (GAC):**        **B**    **PERFORM ROUTINE WORK PRACTICES**  
**Competency:**      **B6**   **Prepare new motorcycles**

### Objectives

To be competent in this area, the individual must be able to:

- Describe preparing new motorcycles for sale.

### LEARNING TASKS

1. Describe assembly procedures

2. Describe accessory (upgrades) components

3. Describe preparing motorcycle for showroom

### CONTENT

- Manufacturers' specifications and procedures
- Inspecting and reporting for damage from shipping
- Uncrating
- Assembly
- Preparation for showroom
- Pre-delivery inspection (PDI)
  
- Electrical/electronic accessories
  - Heated grips
  - GPS
  - Fog lamps
- Hard accessories
  - Luggage
  - Windscreens
  - Engine/frame guards
  
- Detailing
  - Selecting products for task/component
- Pressure washing precautions
  - Electrical components and instrumentation
  - Intake
  - Paint and finishes
  - Chain o-rings
  - Labels and decals

<b>Line (GAC):</b>	<b>C</b>	<b>USE TOOLS, EQUIPMENT AND DOCUMENTATION</b>
<b>Competency:</b>	<b>C1</b>	<b>Use diagnostic tools and equipment</b>

### Objectives

To be competent in this area, the individual must be able to:

- Describe diagnostic tools and equipment and their maintenance.
- Perform basic electrical measurements using a DMM.

### LEARNING TASKS

### CONTENT

1. Describe diagnostic tools and equipment	<ul style="list-style-type: none"> <li>• Manufacturers' specifications and procedures</li> <li>• Digital Multi-meter (DMM)</li> <li>• Leak-down tester</li> <li>• Compression gauges</li> <li>• Vacuum gauges</li> <li>• Computer diagnostic software</li> <li>• Exhaust gas analyzers</li> <li>• Battery testers</li> </ul>
2. Describe diagnostic tools and equipment maintenance	<ul style="list-style-type: none"> <li>• Manufacturers' specifications and procedures</li> <li>• Storage</li> <li>• Inspection</li> <li>• Maintenance</li> <li>• Calibration</li> <li>• Operation</li> </ul>
3. Perform basic electrical measurements in series and parallel circuits using a DMM	<ul style="list-style-type: none"> <li>• Voltage</li> <li>• Current</li> <li>• Resistance</li> </ul>

### Achievement Criteria

Performance	The learner will perform basic electrical measurements using a DMM.
Conditions	The learner will be given <ul style="list-style-type: none"> <li>• Manufacturers' specifications and procedures</li> <li>• Motorcycle or component</li> <li>• Tools and equipment</li> </ul>
Criteria	The learner will be evaluated on <ul style="list-style-type: none"> <li>• Safety</li> <li>• Adherence to manufacturers' specifications and procedures</li> <li>• Accuracy of measurements</li> </ul>

<b>Line (GAC):</b>	<b>C</b>	<b>USE TOOLS, EQUIPMENT AND DOCUMENTATION</b>
<b>Competency:</b>	<b>C2</b>	<b>Use precision measuring instruments</b>

### Objectives

To be competent in this area, the individual must be able to:

- Describe precision measuring instruments and their use.
- Perform basic measurements using precision measuring instruments.

### LEARNING TASKS

**Achievement Criteria**

**Performance** The learner will perform basic measurements using precision measuring instruments.

**Conditions** The learner will be given

- Manufacturers' specifications and procedures
- Motorcycle or component
- Tools and equipment

**Criteria** The learner will be evaluated on

- Safety
- Adherence to manufacturers' specifications and procedures
- Accuracy of measurement

<b>Line (GAC):</b>	<b>C</b>	<b>USE TOOLS, EQUIPMENT AND DOCUMENTATION</b>
<b>Competency:</b>	<b>C3</b>	<b>Use hand tools</b>

### Objectives

To be competent in this area, the individual must be able to:

- Describe hand tools and their use.
- Describe fastening devices and threading systems.
- Perform thread repair.

### LEARNING TASKS

1. Describe hand tools

### CONTENT

- Manufacturers' specifications and procedures
- Wrenches
  - US standard/metric
    - Types
    - Applications
  - Torque
    - Types
    - Applications
- Pullers
  - Internal
  - External
  - Specialty
- Socket sets
- Pliers
- Screwdrivers
- Hammers
- Punches and chisels
- Impact drivers
- Files and hacksaws
- Vises

2. Describe using hand tools

- Manufacturers' specifications and procedures
- Safety
- Uses
- Identification and selection
- Inspection
- Operation
- Cleaning and maintenance
- Storage

**LEARNING TASKS**

3. Describe fastening devices

4. Describe threading systems

5. Perform thread repair

**CONTENT**

- Washers
- Keys
- Pins
- Circlips
- Retaining clips
  
- Screw thread systems
  - Terminology
  - Metric and imperial
  - Size and pitch
- Thread fastener designs
  - Tensile strength
- Thread lubricants
- Thread locking agents
- Taps and tap wrenches
- Dies and die stocks
- Thread inserts
- Common tapping problems
- Thread repair
- Broken stud removal
  
- Drilling
  - Identification of metals and hardness
  - Selection of drill bits
- Threading and thread repairs
- Measuring thread pitches and sizes
- Fastener torquing as per manufacturers' specifications and procedures

**Achievement Criteria**

Performance The learner will perform thread repair.

Conditions The learner will be given

- Manufacturers' specifications and procedures
- Component
- Tools and equipment

Criteria The learner will be evaluated on

- Safety
- Adherence to manufacturers' specifications and procedures
- Quality of repair

<b>Line (GAC):</b>	<b>C</b>	<b>USE TOOLS, EQUIPMENT AND DOCUMENTATION</b>
<b>Competency:</b>	<b>C4</b>	<b>Use heating/cutting tools and equipment</b>

### Objectives

To be competent in this area, the individual must be able to:

- Use heating/cutting tools and equipment.

### LEARNING TASKS

1. Describe heating/cutting tools and equipment

### CONTENT

- Types
- Components
  - Cylinders
  - Valves
  - Regulators
  - Torches
  - Devices
- Gases
  - Oxygen
  - Acetylene
  - Propane
- OHS regulations
- Shop procedures and best practices
- Work clothes and PPE
- Safety equipment
- Personal behaviours
  - Awareness of hazards
  - Daily clean up
- Emergency procedures
  - Firefighting equipment
  - First aid
- Oxyacetylene set up and shut down
  - Assembly
  - Lighting and adjusting torch
  - Shutting down
  - Disassembly
- Using torches for heating
  - Lighting techniques
  - Heating techniques
- Using torches for cutting
  - Lighting techniques
  - Cutting techniques

2. Describe safety considerations for using heating/cutting tools and equipment

3. Use heating/cutting tools and equipment

**LEARNING TASKS**

**CONTENT**

- Maintenance and storage of equipment and gases

**Achievement Criteria**

Performance	The learner will use heating/cutting tools and equipment.
Conditions	The learner will be given <ul style="list-style-type: none"> <li>• Tools and equipment</li> <li>• Suitable material</li> </ul>
Criteria	The learner will be evaluated on <ul style="list-style-type: none"> <li>• Safety</li> <li>• Quality of work</li> <li>• Torch-use techniques</li> </ul>

<b>Line (GAC):</b>	<b>C</b>	<b>USE TOOLS, EQUIPMENT AND DOCUMENTATION</b>
<b>Competency:</b>	<b>C5</b>	<b>Use pneumatic and electric power tools and equipment</b>

### Objectives

To be competent in this area, the individual must be able to:

- Use pneumatic and electric power tools and equipment.

### LEARNING TASKS

1. Describe pneumatic and electric power tools and equipment
2. Use pneumatic and electric power tools and equipment

### CONTENT

- Compressors
- Impact gun (wrenches)
- Ratchets
- Air blowers
- Inflators
- Drills
- Rotary grinders
- Manufacturers' specifications and procedures
- Selection
- Storage
- Inspection
- Maintenance
  - Sharpening
  - Cleaning
  - Lubrication
  - Charging

### Achievement Criteria

Performance	The learner will use power tools and equipment.
Conditions	The learner will be given <ul style="list-style-type: none"> <li>• Tools and equipment</li> <li>• Suitable material</li> </ul>
Criteria	The learner will be evaluated on <ul style="list-style-type: none"> <li>• Safety</li> <li>• Quality of work</li> <li>• Tool-use techniques</li> </ul>

<b>Line (GAC):</b>	<b>C</b>	<b>USE TOOLS, EQUIPMENT AND DOCUMENTATION</b>
<b>Competency:</b>	<b>C6</b>	<b>Use shop equipment</b>

### Objectives

To be competent in this area, the individual must be able to:

- Describe using shop equipment, including drill press, bench grinder, lifting equipment and welding equipment.

### LEARNING TASKS

1. Describe shop equipment

### CONTENT

- Parts washer
- Drill press
- Hydraulic press
- Bench grinder
- Lifting equipment
  - Motorcycle hoists
  - Hydraulic jacks
  - Overhead cranes
  - Mechanical lifts
  - Hydraulic lifts
  - Winch lifts
  - Slings
  - Securing devices
    - Blocking
    - Supporting
    - Quick stands
    - Tie-down devices

2. Describe using shop equipment

- Manufacturers' specifications and procedures
- OHS regulations
- Applications
- Inspection
- Maintenance
  - Oiling
  - Cleaning
    - Solvents/parts washer
    - Glass bead machine
    - Pressure washer

3. Describe welding equipment and its operation

- Storage
- Calibration
- Manufacturers' specifications and procedures

**LEARNING TASKS**

**CONTENT**

- Gas Metal Arc Welding (GMAW)/ Metal Inert Gas (MIG)
- Unit power source
- Electrical principals
- Types of wire electrodes
- Wire feed assemblies
- Gas flow pressures and volumes
- Operation
  - Principles
  - Applications
  - Safety

**Line (GAC):**        **C    USE TOOLS, EQUIPMENT AND DOCUMENTATION**  
**Competency:**     **C7    Use documentation**

### Objectives

To be competent in this area, the individual must be able to:

- Describe documentation, including service information, inventory control systems, and record keeping.

### LEARNING TASKS

1. Describe service information

### CONTENT

- Manufacturers' specifications and procedures
- Locating resources and information
- Technical Service Bulletins (TSB)
- Forms
  - Hard copy
  - Electronic
- Safety recalls

2. Describe inventory control systems

- Work orders
- Purchase orders
- Parts department
- Shop supplies

3. Describe record keeping

- Work orders
  - Internal
  - External
    - Model
    - Vehicle Identification Number (VIN)
    - Year
- Purchase requisitions
- Purchase orders
- PDI forms
- Insurance or warranty claim forms
- Time cards
- Service history records
- Service check lists
- Maintenance schedule lists

<b>Line (GAC):</b>	<b>D</b>	<b>USE COMMUNICATION AND MENTORING TECHNIQUES</b>
<b>Competency:</b>	<b>D1</b>	<b>Use communication techniques</b>

### Objectives

To be competent in this area, the individual must be able to:

- Describe communication skills.

### LEARNING TASKS

1. Describe essential skills

### CONTENT

- Background
  - Employment and Social Development Canada
  - Identified by employers as the skills required to perform on the job
- Reading
- Document use
- Numeracy
- Writing
- Oral communication
- Working with others
- Thinking
- Computer use
- Continuous learning

2. Describe shop organization and control structure

- People and groups in the workplace
- Service department structure
  - Service manager
  - Service writer
  - Journeyperson
  - Apprentice
- Parts department
- Sales department
- Types of pay

3. Describe resource and time management

- Productivity/efficiency
- Planning work tasks
- Avoiding waste

4. Describe teamwork

- Importance of teamwork to the business
- Personal responsibility and attitudes
- Working cooperatively

**LEARNING TASKS**

5. Describe communication skills

**CONTENT**

- Working independently
- Interpersonal relationships
- Keeping workplace free of harassment and discrimination
- Staff meetings
  
- Interpersonal skills
- Active listening
- Problem solving
- Interpreting meaning
- Cultural contexts
- Tone of voice
- Body language
- Personal appearance
- Telephone skills
- Giving and following instructions

**Line (GAC):            G    MAINTAIN WHEELS AND TIRES**

**Competency:           G1    Maintain tires**

### Objectives

To be competent in this area, the individual must be able to:

- Inspect tires.
- Service tires.

### LEARNING TASKS

1. Describe tire construction

### CONTENT

- Types
  - Tube and tubeless
  - Bias ply
  - Radial
- Materials
  - Rubber compounds
  - Nylon
  - Aramids
  - Foam
  - Plastic
- Components
  - Valve Stems
  - Tubes
  - Rim bands
  - Rim locks
  - Tire Pressure Monitoring Systems (TPMS)

2. Describe tire coding

- Imperial and metric sizing
- Size coding variations
- Aspect ratios
- Speed ratings
- Load index
- Ply ratings
- Maximum inflation pressure
- Directional arrows
- Date coding

3. Inspect tires

- Manufacturers' specifications and procedures
- Checks and measurements
- Tire conditions and defects
  - Wear

**LEARNING TASKS**

**CONTENT**

4. Remove and reinstall/replace tires

- Rubber deterioration
- Manufacturers' specifications and procedures
- Surface protection
  - Masking
  - Covers
- Component removal and replacement (Re & Re) to access tires
  - Fenders
  - Shocks
  - Exhaust
  - Seats
  - Luggage
  - Final drives
  - Brakes
- Tire deflating and removal
  - Tire machine
- Tire inflation
  - Bead sealing
  - Maximum pressure

5. Perform tire repair

- Provincial Motor Vehicle Act
- Manufacturers' specifications and procedures
- Determining replacement vs. repair
- Types of repair
  - Tube patching
  - Tire patching
  - Temporary plug
  - Sealing liquids

6. Perform tire balancing

- Static
  - Truing stand
- Dynamic
  - Computerized balancing machine

**Note:** see G3 Maintain cast wheels for Achievement Criteria

**Line (GAC):**        **G    MAINTAIN WHEELS AND TIRES**  
**Competency:**     **G3    Maintain cast wheels**

### Objectives

To be competent in this area, the individual must be able to:

- Inspect and service cast wheels.

### LEARNING TASKS

1. Describe wheel rim design

2. Describe cast wheels

3. Inspect wheels

### CONTENT

- Rim contours
- Rim width and tire-size range
- Rim locks
  
- Types/materials
  - Drop-center
  - Steel
  - Drop-forged aluminum
  - Plastic
  - Carbon fibre
  - Billet
  - Stamped
- Components
  - Bearings
  - Spacers
  - Speedometer drive
  - Cush drive
  - ABS reluctors
  - ABS sensors
  - TPMS Sensors
  - Balancing weights
  - Valve
  - Seals
  - Hubs
  - Axles
  
- Wheel condition
  - Runout
  - Cracking
  - Lug wear
  - Bends
  - Warps
  - Bearing damage
- Component condition

**LEARNING TASKS**

**CONTENT**

4. Perform wheel service

- Manufacturers' specifications and procedures
- Handling precautions
  - Styles
  - Taping
  - Scratches
  - Chips
  - Sharp objects
- Sublet repairs
- Bead cleaning and preparation
- Component removal, replacement and service

**Achievement Criteria**

**Note:** This achievement criteria covers both G1 Maintain tires and G3 Maintain cast wheels.

**Performance** The learner will Re & Re a tire and wheel and perform tire balancing.

**Conditions** The learner will be given

- Manufacturers' specifications and procedures
- Motorcycle or motorcycle wheel
- Tools and equipment

**Criteria** The learner will be evaluated on

- Safety
- Adherence to manufacturer's specifications and procedures
- Quality of work

<b>Line (GAC):</b>	<b>H</b>	<b>MAINTAIN BRAKING SYSTEMS</b>
<b>Competency:</b>	<b>H1</b>	<b>Maintain hydraulic braking systems</b>

### Objectives

To be competent in this area, the individual must be able to:

- Describe diagnosing and servicing hydraulic braking systems.

### LEARNING TASKS

### CONTENT

- |  |  |
|--|--|
| 1. Describe theory of hydraulic braking systems  | <ul style="list-style-type: none"> <li>• Pascal's law</li> <li>• Characteristics of fluid</li> <li>• Hydraulic movement</li> <li>• Pressure multiplication</li> </ul>  |

Describe hydraulic brake components           | <ul style="list-style-type: none"> <li>• Master cylinders</li> <li>• Single- and double- acting piston calipers</li> <li>• Disc or rotors</li> <li>• Drums and shoes</li> <li>• Pads</li> <li>• Wheel cylinders (All-terrain Vehicle (ATVs))</li> <li>• Anti-lock Braking System (ABS) modules</li> </ul>  |
| 4. Describe diagnosing hydraulic braking systems | <ul style="list-style-type: none"> <li>• Conditions               <ul style="list-style-type: none"> <li>○ Sponginess</li> <li>○ Fading</li> <li>○ Lockup</li> <li>○ Dragging</li> <li>○ Binding</li> <li>○ Seizing</li> </ul> </li> <li>• Checks and measurements</li> <li>• Causes of failure</li> <li>• Determining servicing procedures</li> </ul> |
| 5. Describe servicing hydraulic braking systems  | <ul style="list-style-type: none"> <li>• Manufacturers' specifications and procedures</li> <li>• Component replacement</li> </ul>  |

**LEARNING TASKS**

6. Describe component rebuilding

**CONTENT**

- Bleeding
- Adjustments
- Fluid inspection
  - Level
  - Moisture content
  - Fluid replacement
- Disassembly and assembly
  - Master cylinders
  - Calipers

<b>Line (GAC):</b>	<b>H</b>	<b>MAINTAIN BRAKING SYSTEMS</b>
<b>Competency:</b>	<b>H2</b>	<b>Maintain mechanical braking systems</b>

### Objectives

To be competent in this area, the individual must be able to:

- Diagnose and service mechanical braking systems.

### LEARNING TASKS

1. Describe mechanical braking systems

### CONTENT

- Types
  - Disc
  - Drum
  - Parking brake
- Components
  - Single leading shoe
  - Double leading shoe
  - Discs
  - Cables
  - Linkages
- Operation
- Manufacturers' specifications and procedures
- Conditions
  - Squealing
  - Sponginess
  - Pulsation
  - Fading
  - Lockup
  - Dragging
  - Binding
  - Seizing
- Checks and measurements
- Causes of failure
- Determining servicing procedures
- Manufacturers' specifications and procedures
- Adjustments
- Component removal and replacement
- Cleaning procedures and precautions (asbestosis)

2. Diagnose mechanical braking systems

3. Service mechanical braking systems

**Achievement Criteria**

Performance	<p>The learner will service mechanical brakes, including</p> <ul style="list-style-type: none"> <li>• Inspection</li> <li>• Replacement</li> <li>• Adjustment</li> </ul>
Conditions	<p>The learner will be given</p> <ul style="list-style-type: none"> <li>• Manufacturers' specifications and procedures</li> <li>• Motorcycle</li> <li>• Tools and equipment</li> </ul>
Criteria	<p>The learner will be evaluated on</p> <ul style="list-style-type: none"> <li>• Safety</li> <li>• Adherence to manufacturers' specifications and procedures</li> <li>• Quality of service</li> </ul>

<b>Line (GAC):</b>	<b>L</b>	<b>MAINTAIN FINAL DRIVE SYSTEMS</b>
<b>Competency:</b>	<b>L1</b>	<b>Maintain final drive chains and sprockets</b>

### Objectives

To be competent in this area, the individual must be able to:

- Clean, lubricate, and adjust final chain drive systems.

### LEARNING TASKS

1. Describe final drive chains and sprockets

### CONTENT

- Chain drives
  - Cushioned
  - Uncushioned
- Chains
  - O-rings
  - Non-O-rings
  - Hyvo chains (silent)
  - Rollers
  - Master links (detachable)
- Sprockets
  - Aluminum
  - Steel
  - Cushioned
  - Non-cushioned

2. Describe diagnosis of final drive chains and sprockets

- Inspection
- Determining defects and wear
- Causes of failure
- Determining servicing procedures

3. Service final drive chains and sprockets

- Manufacturers' specifications and procedures
- Cleaning
- Sizing
- Matching chains and sprockets
- Removing and replacing
- Lubrication
- Inspecting and adjusting

**Achievement Criteria**

Performance	The learner will clean, lubricate, and adjust chain drive systems.
Conditions	<p>The learner will be given</p> <ul style="list-style-type: none"> <li>• Manufacturers' specifications and procedures</li> <li>• Motorcycle</li> <li>• Tools and equipment</li> </ul>
Criteria	<p>The learner will be evaluated on</p> <ul style="list-style-type: none"> <li>• Safety</li> <li>• Adherence to manufacturers' specifications and procedures</li> <li>• Quality of service</li> </ul>

**Line (GAC): L MAINTAIN FINAL DRIVE SYSTEMS**

**Competency: L3 Maintain final drive belts and pulleys (sprockets)**

### Objectives

To be competent in this area, the individual must be able to:

- Inspect, clean, and adjust final drive belt and pulleys (sprockets).

### LEARNING TASKS

**LEARNING TASKS**

**CONTENT**

- Length/width
- Cog size
- Application
- Power
- Taper
- Turn radius

- Routing
- Cleaning
- Tensioning
- Alignment

**Achievement Criteria**

**Performance** The learner will inspect, clean, and adjust final drive belt and pulleys (sprockets).

**Conditions** The learner will be given

- Manufacturers' specifications and procedures
- Motorcycle
- Tools and equipment

**Criteria** The learner will be evaluated on

- Safety
- Adherence to manufacturers' specifications and procedures
- Quality of service

**Line (GAC): M MAINTAIN ELECTRICAL SYSTEMS**

**Competency: M1 Apply electrical and electronic principles**

### Objectives

To be competent in this area, the individual must be able to:

- Describe electrical principles, circuits, diagrams, and schematics.

### LEARNING TASKS

1. Describe electrical principles

2. Describe electrical circuits

3. Describe diagrams and schematics

### CONTENT

- Atomic structure
- Electrical charges
- Electron flow
- Conductors and insulators
- Voltage, current and resistance
- Sources of electricity
  - Chemical
  - Magnetic
- Components
  - Power supply
  - Conductors
  - Loads
  - Connectors
  - Switches
  - Fuses
    - Inline
    - Main
    - Fusible links
- Ohm's Law
  - Current
  - Voltage
  - Resistance
  - Calculations
  - Wattage
- Types
  - Series
  - Parallel
  - Series-parallel
- Types
  - Wiring
  - System-specific
  - Component-specific

**Line (GAC):**        **M    MAINTAIN ELECTRICAL SYSTEMS**  
**Competency:**      **M2   Maintain batteries**

### Objectives

To be competent in this area, the individual must be able to:

- Maintain batteries.

### LEARNING TASKS

1. Describe batteries

### CONTENT

- Types
  - Lead-acid
  - Gel-type
  - Lithium-ion
- Construction
- Electrolytes
- Operating cycles
- Dry-charged
- Maintenance-free
- Capacity ratings

2. Diagnose battery condition

- Manufacturers' specifications and procedures
- Testing
  - Load
  - Standing voltage
  - Open circuit
  - Capacity
  - Conductivity
  - Parasitic draw
  - Surface draw
- Faults
  - Causes of failure
- Determining servicing procedures

3. Service batteries

- Manufacturers' specifications and procedures
- Safety precautions
- Replacing
- Cleaning posts
- Filling electrolytes
- Charging batteries
- Initializing/activating

**Achievement Criteria**

Performance	The learner will test and/or initialize a battery.
Conditions	<p>The learner will be given</p> <ul style="list-style-type: none"> <li>• Manufacturers' specifications and procedures</li> <li>• A battery</li> <li>• Tools and equipment</li> </ul>
Criteria	<p>The learner will be evaluated on</p> <ul style="list-style-type: none"> <li>• Safety</li> <li>• Adherence to manufacturers' specifications and procedures</li> <li>• Quality of service</li> </ul>

**Line (GAC):**            **M    MAINTAIN ELECTRICAL SYSTEMS**  
**Competency:**        **M3   Maintain electrical standard and accessory components**

**Objectives**

To be competent in this area, the individual must be able to:

- Describe standard electrical components.

**LEARNING TASKS**

1. Describe standard electrical components

**CONTENT**

- Standard vs. accessory components
- Types of standard components
  - Lights
  - Horns
  - Signal systems

<b>Line (GAC):</b>	<b>N</b>	<b>MAINTAIN VEHICLE MANAGEMENT SYSTEMS</b>
<b>Competency:</b>	<b>N1</b>	<b>Read diagnostic trouble codes (DTC)</b>

### Objectives

To be competent in this area, the individual must be able to:

- Read and record DTCs.

### LEARNING TASKS

1. Describe vehicle management systems

### CONTENT

- Types
  - Engine management
  - Braking
  - Traction control
  - Displays
  - Suspension
- Components
  - Malfunction indicator light (MIL)
  - Sensors
  - Modules
  - Controller Area Network (CAN bus)

2. Read DTCs

- Manufacturers' specifications and procedures
- Using diagnostic equipment
- Checking for fault codes
- Determining meaning
- Recording fault codes

### Achievement Criteria

<b>Performance</b>	The learner will read and record DTCs.
<b>Conditions</b>	The learner will be given <ul style="list-style-type: none"> <li>• Manufacturers' specifications and procedures</li> <li>• Motorcycle</li> <li>• Diagnostic equipment</li> </ul>
<b>Criteria</b>	The learner will be evaluated on <ul style="list-style-type: none"> <li>• Safety</li> <li>• Adherence to manufacturers' specifications and procedures</li> <li>• Accuracy of data gathered</li> </ul>

# **Level 2**

## **Motorcycle Technician**

<b>Line (GAC):</b>	<b>C</b>	<b>USE TOOLS, EQUIPMENT AND DOCUMENTATION</b>
<b>Competency:</b>	<b>C1</b>	<b>Use diagnostic tools and equipment</b>

### Objectives

To be competent in this area, the individual must be able to:

- Perform tests using diagnostic tools and equipment.

### LEARNING TASKS

1. Describe diagnostic tools and equipment

### CONTENT

- Leak-down testers
- Compression gauges
- Vacuum gauges
- Computers
- Diagnostic software
- DMM/multimeters

2. Perform tests using diagnostic tools and equipment

- Manufacturers' specifications and procedures
- Using mechanical diagnostic tools
  - Compression test
  - Leak-down test
- Using DMM
  - Voltage drop test
- Using diagnostic software
  - Inspecting for fault codes
  - Monitoring data

### Achievement Criteria

**Performance** The learner will perform tests using diagnostic tools and equipment.

**Conditions** The learner will be given

- Manufacturers' specifications and procedures
- Motorcycle
- Diagnostic tools and equipment

**Criteria** The learner will be evaluated on

- Safety
- Adherence to manufacturers' specifications and procedures
- Accuracy of results gathered

<b>Line (GAC):</b>	<b>E</b>	<b>MAINTAIN CHASSIS AND COMPONENTS</b>
<b>Competency:</b>	<b>E1</b>	<b>Maintain frames</b>

### Objectives

To be competent in this area, the individual must be able to:

- Describe frames.
- Describe performing a visual inspection of a frame.

### LEARNING TASKS

1. Describe frames

### CONTENT

- Types
  - Full-cradle
  - Single-cradle
  - Double-cradle
  - Perimeter (Delta)
  - Backbone
  - Stamped
  - Modular
  - Trellis
- Components
- Handling
  - Wheelbase
  - Rake and trail
  - Offset
- Materials
  - Steel
  - Aluminum
  - Composites
- Manufacturers' specifications and procedures
- Safety
- Bolt alignment
- Modifications
- Record and report findings

2. Describe performing a visual inspection of a frame

<b>Line (GAC):</b>	<b>E</b>	<b>MAINTAIN CHASSIS AND COMPONENTS</b>
<b>Competency:</b>	<b>E2</b>	<b>Maintain steering heads</b>

### Objectives

To be competent in this area, the individual must be able to:

- Service steering heads for 2-wheeled motorcycles.

### LEARNING TASKS

1. Describe steering heads for 2-wheeled motorcycles
2. Diagnose steering heads for 2-wheeled motorcycles
3. Service steering heads for 2-wheeled motorcycles

### CONTENT

- Steering stems
- Upper and lower triple clamps
- Bearings
- Steering dampers
- Front axle components
- Linkages
- Pivot shafts
- Manufacturers' specifications and procedures
- Inspection
  - Smoothness of operation
  - Excessive play
  - Wear
  - Notchy feel
- Measurements
- Manufacturers' specifications and procedures
- Head tightening
- Bearing adjustment
- Lubing
- Bearing and race removal and replacement

### Achievement Criteria

<b>Performance</b>	The learner will service steering heads for 2-wheeled motorcycles.
<b>Conditions</b>	The learner will be given <ul style="list-style-type: none"> <li>• Manufacturers' specifications and procedures</li> <li>• Motorcycle</li> <li>• Tools and equipment</li> </ul>
<b>Criteria</b>	The learner will be evaluated on <ul style="list-style-type: none"> <li>• Safety</li> <li>• Adherence to manufacturers' specifications and procedures</li> <li>• Quality of service</li> </ul>

<b>Line (GAC):</b>	<b>E</b>	<b>MAINTAIN CHASSIS AND COMPONENTS</b>
<b>Competency:</b>	<b>E3</b>	<b>Maintain steering systems for multi-wheeled motorcycles</b>

### Objectives

To be competent in this area, the individual must be able to:

- Describe diagnosing steering systems for multi-wheeled motorcycles.

### LEARNING TASKS

1. Describe steering systems for multi-wheeled motorcycles

### CONTENT

- Types
  - 3-wheeled
    - Conventional
    - Leaning
  - 4-wheeled (ATV)
- Components
  - Steering stems
  - Upper and lower triple clamps
  - Bearings
  - Steering dampers
  - Front axle components
  - Linkages and tie rods
  - Pivot shafts
  - Bell cranks

2. Describe diagnosing steering systems for multi-wheeled motorcycles

- Manufacturers' specifications and procedures
- Inspection
- Conditions
- Causes of failure
- Testing and measurements

<b>Line (GAC):</b>	<b>E</b>	<b>MAINTAIN CHASSIS AND COMPONENTS</b>
<b>Competency:</b>	<b>E4</b>	<b>Maintain chassis standard and accessory components</b>

### Objectives

To be competent in this area, the individual must be able to:

- Install chassis accessory components.

### LEARNING TASKS

1. Describe chassis components

### CONTENT

- Standard
    - Wheels
    - Fenders
    - Forks
    - Fairings
    - Shocks
  - Accessories
    - Engine guards
    - Hand guards
    - Centre/side stands
    - Luggage and mounts
    - Windshields
    - Back rests
- 
2. Install chassis accessory components
    - Manufacturers' specifications
    - Installation procedures
    - Tool use
    - Verification of operation of component and motorcycle

### Achievement Criteria

Performance	The learner will remove and install an accessory chassis component.
Conditions	The learner will be given <ul style="list-style-type: none"> <li>• Manufacturers' specifications and/or procedures</li> <li>• Motorcycle</li> <li>• Tools and equipment</li> </ul>
Criteria	The learner will be evaluated on <ul style="list-style-type: none"> <li>• Safety</li> <li>• Adherence to manufacturers' specifications and/or procedures</li> <li>• Quality of installation</li> </ul>

<b>Line (GAC):</b>	<b>F</b>	<b>MAINTAIN SUSPENSION SYSTEMS</b>
<b>Competency:</b>	<b>F1</b>	<b>Maintain front suspension components</b>

### Objectives

To be competent in this area, the individual must be able to:

- Describe diagnosing and servicing front-suspension components.

### LEARNING TASKS

1. Describe front-suspension systems
2. Describe front-suspension components
3. Describe diagnosis of front-suspension components

### CONTENT

- Principles of suspension
  - Sprung weight
  - Un-sprung weight
- Types
  - Forks
    - Conventional
    - Inverted
    - Springer
    - Tele-lever
  - Links
    - Leading
    - Trailing
- Forks
  - Stanchions
  - Seals
  - Springs
  - Bushings
  - Valving
- Shock absorbers/dampers
  - Adjustable
  - Non-adjustable
  - Air
- Linkages
  - Bushings
  - Arms
  - Pivots
- Springs
  - Single-rate
  - Progressive
  - Air
- Manufacturers' specifications and procedures

**LEARNING TASKS**

**CONTENT**

- Inspections
      - Springs
        - Broken
        - Sagging
      - Leaks
        - Fluid
        - Air
      - Noises
  
- 4. Describe servicing front-suspension components
  - Manufacturers' specifications and procedures
  - Safety precautions
  - Specialized tools
  - Lubrication
  - Removal and replacement
  - Adjustments
  - Fork oil change
  - Fork disassembly and assembly
  - Seal replacement
  - Filling bladders
  - Bleeding air
  - Pressure
    - Air
    - Dampening
  - Adjustments
    - Ride tension (spring)
    - Ride height (air)

<b>Line (GAC):</b>	<b>F</b>	<b>MAINTAIN SUSPENSION SYSTEMS</b>
<b>Competency:</b>	<b>F2</b>	<b>Maintain front suspension components for multi-wheeled motorcycles</b>

### Objectives

To be competent in this area, the individual must be able to:

- Describe diagnosing front suspension components for multi-wheeled motorcycles.
- Service ATV front suspension components.

### LEARNING TASKS

### CONTENT

- |  |   |
|--|---|
| 1. Describe front suspension systems for multi-wheeled motorcycles               | <ul style="list-style-type: none"> <li>• Leaning multi-wheeled (LMW)</li> <li>• Parrellogram link-arm structure</li> <li>• Leaning</li> <li>• A-arm suspension</li> </ul>   |
| 2. **LEARNING TASKS**

**CONTENT**

- Measurements
- Component replacement
- Verifying operation

**Achievement Criteria**

Performance    The learner will service ATV front suspension components.

Conditions     The learner will be given

- Manufacturers' specifications and procedures
- ATV
- Tools and equipment

Criteria        The learner will be evaluated on

- Safety
- Adherence to manufacturers' specifications and procedures
- Quality of service

**Line (GAC): F MAINTAIN SUSPENSION SYSTEMS**  
**Competency: F3 Maintain rear suspension components**

### Objectives

To be competent in this area, the individual must be able to:

- Perform adjustments on rear suspension components.

### LEARNING TASKS

1. Describe rear suspension systems

### CONTENT

- Types and designs
  - Single
  - Dual-shock
  - Air
  - Rising rate (progressive) linked
  - Linkless shock mounting
  - A-arm
  - Swing arm
  - Pivotless
  - Hidden (soft tail)

2. Describe rear suspension components

- Spring technology
  - Spring rate
  - Progressive springs
  - Preload
- Shock absorber technology
  - Emulsion
  - Nitrogen gas
- Linkage bearings and bushings
- Swing arms
  - Pivotless
  - Single-sided
  - Dual-sided
  - Hidden (soft tail)

3. Service rear suspension components

- Manufacturers' specifications and procedures
- Lubrication
- Adjustments
  - Sag (spring pre-load)
  - Rebound and compression
  - Wheel alignment

**Achievement Criteria**

Performance	The learner will adjust rear suspension.
Conditions	<p>The learner will be given</p> <ul style="list-style-type: none"> <li>• Manufacturers' specifications and procedures</li> <li>• Motorcycle</li> <li>• Tools and equipment</li> </ul>
Criteria	<p>The learner will be evaluated on</p> <ul style="list-style-type: none"> <li>• Safety</li> <li>• Adherence to manufacturers' specifications and procedures</li> <li>• Quality of service</li> </ul>

<b>Line (GAC):</b>	<b>I</b>	<b>MAINTAIN TWO-STROKE AND FOUR-STROKE ENGINES</b>
<b>Competency:</b>	<b>I1</b>	<b>Apply principles of engines and engine construction</b>

### Objectives

To be competent in this area, the individual must be able to:

- Describe two-stroke and four- stroke engines.

### LEARNING TASKS

1. Describe engine construction

### CONTENT

- Two-stroke
- Four-stroke
- Designs
  - Single cylinder
  - Multi-cylinder
    - V
    - Inline
    - Horizontally-opposed
- Components
- Classifications
  - Stroke cycle
  - Valve location
  - Cylinder configuration

2. Describe two-stroke engines

- Construction
  - Piston port
  - Reed valve
  - Rotary valve
  - Direct injection
  - Variable exhaust port mechanisms
  - Crankcase sealing
  - Crankshafts
  - Air-cooled
  - Liquid-cooled
- Operation
  - Stroke cycle
  - Cross-scavenging
  - Loop-scavenging
  - Lubrication
    - Pre-mix
    - Injected

3. Describe four-stroke engines

- Construction

**Competency: J3 Maintain primary drive belts and pulleys (sprockets)**

### Objectives

To be competent in this area, the individual must be able to:

- Describe primary drive belts and pulleys (sprockets).

### LEARNING TASKS

1. Describe primary drive belts and pulleys (sprockets)

### CONTENT

- Types
  - Motorcycle
    - Cogged (after market)
  - ATV and scooters
    - V-belt (CVT)
- Composition
  - Rubber
  - Cloth sheath
  - Rating

<b>Line (GAC):</b>	<b>J</b>	<b>MAINTAIN CLUTCHES AND PRIMARY DRIVES</b>
<b>Competency:</b>	<b>J4</b>	<b>Maintain manual clutches</b>

### Objectives

To be competent in this area, the individual must be able to:

- Diagnose and service manual clutches.

### LEARNING TASKS

1. Describe manual clutches

### CONTENT

- Types
  - Wet
  - Dry
  - Single-plate
  - Multi-plate
  - Back torque
  - Torque assist
- Components
  - Clutch plates
    - Friction (driving)
    - Metal (driven)
  - Pressure plates
    - Diaphragm spring
    - Coil springs
    - Cushion springs
    - Aftermarket types
  - Release bearings
  - Release mechanisms
    - Cable
    - Linkage
    - Hydraulic
- Manufacturers' specifications and procedures
- Inspection
  - Slippage
  - Dragging
  - Chatter
- Measurements
  - Plate thickness
  - Spring free length
  - Warpage
  - Free play

2. Diagnose manual clutches

**LEARNING TASKS**

3. Service manual clutches

**CONTENT**

- Manufacturers' specifications and procedures
- Fluid selections
- Adjustments
  - Mechanical
  - Hydraulic
- Component replacement
- Measurements
- Safety switches

**Achievement Criteria**

Performance The learner will service manual clutches.

Conditions The learner will be given

- Manufacturers' specifications and procedures
- Motorcycle
- Tools and equipment

Criteria The learner will be evaluated on

- Safety
- Adherence to manufacturers' specifications and procedures
- Quality of service

<b>Line (GAC):</b>	<b>J</b>	<b>MAINTAIN CLUTCHES AND PRIMARY DRIVES</b>

<b>Line (GAC):</b>	<b>J</b>	<b>MAINTAIN CLUTCHES AND PRIMARY DRIVES</b>
<b>Competency:</b>	<b>J6</b>	<b>Maintain manual starting systems</b>

### Objectives

To be competent in this area, the individual must be able to:

- Maintain manual starting systems.

### LEARNING TASKS

1. Describe manual starting systems

### CONTENT

- Types of starting systems
  - Recoil (pull)
  - Kick
    - Primary
    - Transmission
- Components for recoil start systems
  - Springs and mechanisms
  - Handles and ropes
  - Sprag clutch/one way
- Components for kick start systems
  - Pedals (kick lever)
  - Ratchets
  - Return springs
  - Shafts
  - Idler gears

2. Diagnose manual starting systems

- Manufacturers' specifications and procedures
- Inspection
  - Abnormal noises
  - Smoothness of operation
  - Wear

3. Service manual starting systems

- Manufacturers' specifications and procedures
- Re & Re components
- Cleaning
- Lubrication

### Achievement Criteria

Performance	The learner will remove, service and replace components for a recoil starting system.
Conditions	<p>The learner will be given</p> <ul style="list-style-type: none"> <li>• Manufacturers' specifications and procedures</li> <li>• Motorcycle or ATV with applicable starter systems</li> <li>• Tools and equipment</li> </ul>
Criteria	<p>The learner will be evaluated on</p> <ul style="list-style-type: none"> <li>• Safety</li> <li>• Adherence to manufacturers' specifications and procedures</li> <li>• Quality of service</li> </ul>

<b>Line (GAC):</b>	<b>K</b>	<b>MAINTAIN TRANSMISSIONS</b>
<b>Competency:</b>	<b>K2</b>	<b>Maintain continuously variable transmissions (CVT)</b>

### Objectives

To be competent in this area, the individual must be able to:

- Describe CVT, centrifugal clutch and belt drives, and hydrostatic drives.
- Describe maintaining hydrostatic drives.
- Maintain centrifugal clutch and belt drives.

### LEARNING TASKS

1. Describe CVT

### CONTENT

- Types
  - Semi-automatic (e.g. scooters)
  - CVT
    - Centrifugal clutch and belt drive
    - Hydraulic (hydrostatic)
- Functions
  - Shift
  - Range select
  - Engagement

2. Describe centrifugal clutch and belt drives

- Components
  - Sheaves (pulleys)
  - V-belts
  - Weights (rollers)
  - Sprags (over-running clutches)
  - Springs
  - Sensors
  - Shafts
    - Primary
    - Secondary

3. Describe hydrostatic drives

- Components
  - Pumps
  - Motors
  - Control valves
  - Piston and cylinder assemblies
  - Swash plates
  - Shafts
  - Bearings
  - Springs
  - Housings and oil passages

**LEARNING TASKS**

<b>Line (GAC):</b>	<b>M</b>	<b>MAINTAIN ELECTRICAL SYSTEMS</b>
<b>Competency:</b>	<b>M3</b>	<b>Maintain electrical standard and accessory components</b>

### Objectives

To be competent in this area, the individual must be able to:

- Install electrical accessory components.

### LEARNING TASKS

1. Describe electrical accessory components (upgrades)

### CONTENT

- Rider assistance systems
  - Cruise control
  - Slide/traction control
  - Quick shifters
- Cameras
- Audio systems
- Security systems
- Lights
  - Fog
  - Driving
- Powered windshields
- Global Positioning System (GPS)
  - Lap timers
  - Navigation
- Manufacturers' specifications and procedures
  - Aftermarket manufacturers
  - Original Equipment Manufacturers
- Verifying operation

2. Install electrical accessory components

### Achievement Criteria (Optional depending on availability of components)

<b>Performance</b>	The learner will install electrical accessory components.
<b>Conditions</b>	The learner will be given <ul style="list-style-type: none"> <li>• Manufacturers' specifications and procedures</li> <li>• Motorcycle and component</li> <li>• Tools and equipment</li> </ul>

<b>Competency:</b>	<b>M4</b>	<b>Maintain wiring harness systems</b>

### Objectives

To be competent in this area, the individual must be able to:

- Interpret wiring diagrams.
- Repair connections on wiring harness systems.

### LEARNING TASKS

1. Describe wiring harness systems

### CONTENT

- Type
  - Standard
  - CAN bus
- Components
  - Connectors
  - Protection and insulation
  - Routing
  - Diodes
  - Resistors
  - Switches
  - Sensors
  - Wire
    - Gauge
    - Materials
    - Colour coding
    - Shielding

2. Interpret wiring diagrams

- Manufacturers' specifications and procedures
- Symbols and legends
  - Sensors
  - Connections
  - Grounds
  - Diodes
  - Resistors
  - Relays
  - Fuses
  - Colour abbreviations
  - Wire gauges
- Using diagrams for troubleshooting

3. Repair connections on wiring harness systems

- Manufacturers' specifications and procedures
- Soldering

**LEARNING TASKS**

**CONTENT**

- Crimping
- Insulating
- Cleaning terminals
- Verifying connection

**Achievement Criteria**

Performance    The learner will repair connections on wiring.

Conditions     The learner will be given

- Manufacturers' specifications and procedures
- Wiring and connectors
- Tools and equipment

Criteria         The learner will be evaluated on

- Safety
- Adherence to manufacturers' specifications and procedures
- Quality of repair

**Line (GAC):**        **M    MAINTAIN ELECTRICAL SYSTEMS**  
**Competency:**     **M6   Maintain electric starting systems**

### Objectives

To be competent in this area, the individual must be able to:

- Diagnose and service electric starting systems.

### LEARNING TASKS

1. Describe electric starting systems

### CONTENT

- Engagement types
  - Solenoid-driven
  - Sprag
- Components
  - Solenoids
  - Relays
  - Switches
  - Starter drives
    - Gear reduction
    - Direct
  - Starter motors
    - Field windings
    - Brushes
    - Armature
    - Commutator
  - Wiring
    - Primary
    - Secondary

2. Diagnose electric starting systems

- Manufacturers' specifications and procedures
- Inspections
  - Corrosion
  - Connections
  - Operation
- Tests and measurements
  - Battery
  - Solenoid / relay
  - Starter draw
  - Voltage drop
  - Bench test
- Causes of failure

**LEARNING TASKS**

3. Service electric starting systems

**CONTENT**

- Manufacturers' specifications and procedures
- Starter Re & Re
- Disassembly, cleaning, inspection and replacement
  - Contacts
  - Commutators
  - Terminals
  - Brushes
  - Armatures
  - Seals
  - O-rings
  - Bearings and bushings

**Achievement Criteria**

Performance The learner will diagnose and service electric starting systems.

Conditions The learner will be given

- Manufacturers' specifications and procedures
- Motorcycle and appropriate components
- Tools and equipment

Criteria The learner will be evaluated on

- Safety
- Adherence to manufacturers' specifications and procedures
- Quality of service

**Line (GAC):**            **M    MAINTAIN ELECTRICAL SYSTEMS**  
**Competency:**        **M7   Maintain charging systems**

### Objectives

To be competent in this area, the individual must be able to:

- Diagnose and service charging systems.

### LEARNING TASKS

1. Describe charging systems

### CONTENT

- Types
  - Generators / alternators
  - Excited field
  - Alternate Current (AC) magneto
- Components
  - Armatures
  - Commutators
  - Brushes
  - End frames
  - Rotors and flywheels
  - Magnets
  - Field windings
  - Stators
  - Regulators / rectifiers
  - Slip rings
  - Connectors

2. Diagnose charging systems

- Manufacturers' specifications and procedures
- Visual inspections
- Tests and measurements
  - Output performance
    - DC voltage
    - Amperage
  - Stator (AC magneto)
    - AC voltage output
    - Resistance
    - Short to ground
  - Regulator rectifiers
    - Diodes
    - Shorts
    - High resistance
    - Opens
  - Alternators

**LEARNING TASKS**

3. Describe servicing fuel tanks and fuel delivery components

**CONTENT**

- Manufacturers' specifications and procedures
- Safety procedures
- Replacement
- Cleaning

<b>Line (GAC):</b>	<b>O</b>	<b>MAINTAIN FUEL AND EXHAUST SYSTEMS</b>
<b>Competency:</b>	<b>O2</b>	<b>Maintain air delivery systems</b>

### Objectives

To be competent in this area, the individual must be able to:

- Diagnose and service air delivery systems.

### LEARNING TASKS

1. Describe air delivery systems

### CONTENT

- Types
  - Forced air induction
  - Naturally-aspirated
- Components
  - Air boxes
  - Air filters
  - Throttle bodies
  - Boots and bellows
  - Intake manifolds
  - Gaskets
  - Idle controls
- Power enhancement equipment
  - Super chargers
  - Turbo chargers
  - Ram air
  - Secondary fuel management boxes

2. Diagnose air delivery systems

- Manufacturers' specifications and procedures
- Visual inspections

3. Service air delivery systems

- Manufacturers' specifications and procedures
- Servicing and/or replacing air filters
- Cleaning throttle bodies

### Achievement Criteria

Performance	The learner will test and diagnose air delivery systems.
Conditions	<p>The learner will be given</p> <ul style="list-style-type: none"> <li>• Manufacturers' specifications and procedures</li> <li>• Motorcycle</li> <li>• Tools and equipment</li> </ul>
Criteria	<p>The learner will be evaluated on</p> <ul style="list-style-type: none"> <li>• Safety</li> <li>• Adherence to manufacturers' specifications and procedures</li> <li>• Accuracy of measurements</li> <li>• Interpretation of results</li> </ul>

<b>Line (GAC):</b>	<b>O</b>	<b>MAINTAIN FUEL AND EXHAUST SYSTEMS</b>
<b>Competency:</b>	<b>O3</b>	<b>Maintain carburetor systems</b>

### Objectives

To be competent in this area, the individual must be able to:

- Diagnose carburetor systems.
- Service carburetor systems (on single-cylinder engine).

### LEARNING TASKS

1. Describe carburetors

### CONTENT

- Types
  - Mechanical slides
  - Constant Velocity (CV)
- Principles
  - Carburation
  - Atomization
  - Vaporization
  - Venturi principle
  - Air-fuel ratios
- Components
  - Jets
  - Floats and float valves
  - Float bowls
  - Needles
  - Butterflies
  - Cables
  - Gaskets and O-rings
- Circuits
  - Float
  - Cold start
  - Low speed / idle
  - High speed
  - Acceleration
  - Power

2. Diagnose carburetor systems

- Manufacturers' specifications and procedures
- Visual inspections

3. Service carburetor systems (on single-cylinder engine)

- Manufacturers' specifications and procedures
- Disassembly
- Cleaning

**LEARNING TASKS**

**CONTENT**

- Adjustments
  - Idle Revolutions per minute (RPM)
  - Mixture

**Achievement Criteria**

Performance    The learner will service carburetor systems (on single-cylinder engine).

Conditions     The learner will be given

- Manufacturers' specifications and procedures
- Motorcycle
- Tools and equipment

Criteria        The learner will be evaluated on

- Safety
- Adherence to manufacturers' specifications and procedures
- Quality of service

**Line (GAC):**        **O    MAINTAIN FUEL AND EXHAUST SYSTEMS**

**Competency:**      **O4    Maintain exhaust systems**

### Objectives

To be competent in this area, the individual must be able to:

- Service exhaust systems.

### LEARNING TASKS

1. Describe exhaust systems

### CONTENT

- Types
  - Four-cycle engines
    - Wave travel and acoustic tuning
  - Two-cycle engines
    - Wave travel and expansion chamber design
- Components
  - Headers
  - Catalytic convertors
  - Gaskets
  - Variable valves
  - Spark arresters
  - Mufflers
    - Expansion chambers
    - Packing
    - Slip-ons (aftermarket)
- Manufacturers' specifications and procedures
- Component Re & Re
- System cleaning
- Sealing

2. Service exhaust systems

### Achievement Criteria

**Performance**    The learner will service exhaust systems.

**Conditions**     The learner will be given

- Manufacturers' specifications and procedures
- Motorcycle
- Tools and equipment

**Criteria**        The learner will be evaluated on

- Safety
- Adherence to manufacturers' specifications and procedures
- Quality of service

# **Level 3**

## **Motorcycle Technician**

<b>Line (GAC):</b>	<b>C</b>	<b>USE TOOLS, EQUIPMENT AND DOCUMENTATION</b>
<b>Competency:</b>	<b>C1</b>	<b>Use diagnostic tools and equipment</b>

### Objectives

To be competent in this area, the individual must be able to:

- Describe advanced use of diagnostic measuring tools and equipment.
- Describe maintenance of diagnostic tools and equipment.

### LEARNING TASKS

**Line (GAC): E MAINTAIN CHASSIS AND COMPONENTS**

**Competency: E1 Maintain frames**

### Objectives

To be competent in this area, the individual must be able to:

- Diagnose frames.
- Describe replacing frames.

### LEARNING TASKS

1. Diagnose frames

2. Describe replacing frames

### CONTENT

- Manufacturers' specifications and procedures
- Visual inspections for cracks
  - Welds
  - Steering heads
  - Paints
- Point to point measurements
- Manufacturers' specifications and procedures
- Regulations
- VIN assignment
- Jurisdictions having authority (JHA)
- Re & Re
  - Wire harness routing
  - Cable routing
  - Engine mounting
  - Bearings
- Adjustments

<b>Line (GAC):</b>	<b>E</b>	<b>MAINTAIN CHASSIS AND COMPONENTS</b>
<b>Competency:</b>	<b>E3</b>	<b>Maintain steering systems for multi-wheeled motorcycles</b>

### Objectives

To be competent in this area, the individual must be able to:

- Diagnose and service steering systems for multi-wheeled motorcycles.
- Describe LMW technology.

### LEARNING TASKS

1. Diagnose steering systems for multi-wheeled motorcycles

### CONTENT

- Manufacturers' specifications and procedures
- Inspection
- Conditions
- Causes of failure
- Testing and measurements

2. Service steering systems for multi-wheeled motorcycles

- Manufacturers' specifications and procedures
- Component Re & Re
  - Ball joints
  - Steering knuckles
  - Bearings and bushings
  - Steering dampers
  - Linkages and tie rods
  - Pivot shafts
  - Bell cranks
  - Brackets
- Adjustments
- Verification of operation

3. Describe LMW technology

- Manufacturers' specifications and procedures
- Principles of operation
- Diagnosis
- Servicing

**Achievement Criteria**

Performance	The learner will Re & Re components, make adjustments, and perform wheel alignment on a multi-wheeled motorcycle or ATV.
Conditions	<p>The learner will be given</p> <ul style="list-style-type: none"> <li>• Manufacturers' specifications and procedures</li> <li>• Multi-wheeled motorcycle or ATV</li> <li>• Tools and equipment</li> </ul>
Criteria	<p>The learner will be evaluated on</p> <ul style="list-style-type: none"> <li>• Safety</li> <li>• Adherence to manufacturers' specifications and procedures</li> <li>• Quality of service</li> </ul>

<b>Line (GAC):</b>	<b>E</b>	<b>MAINTAIN CHASSIS AND COMPONENTS</b>
<b>Competency:</b>	<b>E4</b>	<b>Maintain chassis standard and accessory components</b>

### Objectives

To be competent in this area, the individual must be able to:

- Diagnose and service chassis accessory components.

### LEARNING TASKS

1. Describe chassis accessory components
2. Diagnose chassis accessory components
3. Service chassis accessory components

### CONTENT

- Engine guards
- Hand guards
- Centre/side stands
- Luggage and mounts
- Windshields
- Back rests
- Manufacturers' specifications and procedures
- Inspection
- Conditions
- Causes of failure
- Testing and measurements
- Manufacturers' specifications and procedures
- Re & Re
- Adjustments
- Verification of operation

<b>Line (GAC):</b>	<b>F</b>	<b>MAINTAIN SUSPENSION SYSTEMS</b>
<b>Competency:</b>	<b>F1</b>	<b>Maintain front suspension components</b>

### Objectives

To be competent in this area, the individual must be able to:

- Diagnose and service front-suspension components.

### LEARNING TASKS

1. Diagnose front-suspension components

### CONTENT

- Manufacturers' specifications and procedures
- Inspections
  - Test ride
  - Visual
- Conditions
  - Damaged components
    - Wear
    - Excessive free play
    - Bends
  - Sagging
  - Pre-load
  - Damping
  - Leaks
    - Fluid
    - Air
  - Noises
  - Stiction

2. Service front-suspension components

- Manufacturers' specifications and procedures
- Safety precautions
  - Gas or air pressure
  - Pressure on springs
- Specialized tools
- Lubrication
- Re & Re
- Adjustments
  - Spring pre-load
  - Damping
- Fork oil change
- Fork disassembly and assembly
- Seal replacement
- Charge with gas or air
- Verification of operation

**Achievement Criteria**

Performance	The learner will service front-suspension components.
Conditions	<p>The learner will be given</p> <ul style="list-style-type: none"> <li>• Manufacturers' specifications and procedures</li> <li>• Motorcycle</li> <li>• Tools and equipment</li> </ul>

**Line (GAC): G MAINTAIN WHEELS AND TIRES**

**Competency: G2 Maintain spoked wheels**

### Objectives

To be competent in this area, the individual must be able to:

- Diagnose and service spoked wheels.

### LEARNING TASKS

1. Describe spoked wheels

### CONTENT

- Types
  - Conventional
  - Tubeless
  - Alloy
  - Steel
- Components
  - Rims
  - Spokes and nipples
  - Hubs, axles and bearings
  - Rim bands
  - Rim locks
  - Pressure sensors
  - Reluctors
  - Speedometer drives
  - Cush drives
  - Balancing weights
  - Tubes and valves

2. Diagnose spoked wheels

- Manufacturers' specifications and procedures
- Inspection
  - Visual
    - Bearings
    - Spoke holes
    - Cracks
    - Corrosion
  - Measure run out
    - Axial/lateral
    - Radial
  - Spoke torque
  - Balance
- Causes of failure
  - Maintenance issues
  - Collision

**LEARNING TASKS**

**CONTENT**

3. Service spoked wheels

- Corrosion
- Stress

- Manufacturers' specifications and procedures
- Relacing
- Truing
- Balancing

**Achievement Criteria**

**Performance** The learner will replace and true a spoked motorcycle wheel.

**Conditions** The learner will be given

- Manufacturers' specifications and procedures
- Motorcycle or spoked wheel
- Tools and equipment

**Criteria** The learner will be evaluated on

- Safety
- Adherence to manufacturers' specifications and procedures
- Quality of service

**Line (GAC): I MAINTAIN TWO-STROKE AND FOUR-STROKE ENGINES**

**Competency: II Apply principles of engines and engine construction**

### **Objectives**

To be competent in this area, the individual must be able to:

- Describe engine principles.

### **LEARNING TASKS**

1. Describe engine principles

### **CONTENT**

- Combustion
  - Normal combustion
  - Pre-ignition
  - Detonation
- Measurements
  - Displacement
  - Compression ratio
  - Horsepower
  - Torque
  - Efficiency

<b>Line (GAC):</b>	<b>I</b>	<b>MAINTAIN TWO-STROKE AND FOUR-STROKE ENGINES</b>
<b>Competency:</b>	<b>I2</b>	<b>Maintain cylinder heads</b>

### Objectives

To be competent in this area, the individual must be able to:

- Describe diagnosing cylinder heads on two-stroke engines.
- Service cylinder heads on two-stroke engines.

### LEARNING TASKS

1. Describe cylinder heads

### CONTENT

- Designs (2-stroke engines)
  - Air-cooled
  - Liquid-cooled
- Designs (4-stroke engines)
  - OHV
  - OHC
  - DOHC
  - Air-cooled
  - Liquid-cooled
- Components
  - Decompressors
  - Spark plugs
  - Sensors
  - Seals
  - Cooling fins
- Manufacturers' specifications and procedures
- Inspection
  - Warpage
  - Heat effects
  - Cooling fin condition
  - Cooling jacket condition
  - Combustion area condition
  - Sparkplug thread condition
  - Cracks
  - Sealing surface condition
- Measurements
- Manufacturers' specifications and procedures
- De-carboning
- Clearing cooling fins

2. Describe diagnosing cylinder heads on two-stroke engines

3. Service cylinder heads on two-stroke engines

**LEARNING TASKS**

**CONTENT**

- Gasket Re & Re
- Sealing
- Planing

**Achievement Criteria**

Performance    The learner will service cylinder heads on two-stroke engines.

Conditions     The learner will be given

- Manufacturers' specifications and procedures
- Motorcycle or motorcycle engine
- Tools and equipment

Criteria         The learner will be evaluated on

- Safety
- Adherence to manufacturers' specifications and procedures
- Quality of service

  - Timing marks

2. Diagnose counterbalance assemblies

- Manufacturers' specifications and procedures
- Inspection
  - Timing
  - Straightness
  - Bearing condition
- Measurements and checks
  - Journals
  - Bearings
  - Oil clearance

3. Service counterbalance assemblies

- Manufacturers' specifications and procedures
- Removal
- Installation
- Adjustments
  - Chain slack

**LEARNING TASKS**

**CONTENT**

- Belt tension
- Timing
- Sealing
- Verification of operation

**Achievement Criteria**

**Performance** The learner will remove and install counterbalance assemblies.

**Conditions** The learner will be given

- Manufacturers' specifications and procedures
- Motorcycle or motorcycle engine
- Tools and equipment

**Criteria** The learner will be evaluated on

- Safety
- Adherence to manufacturers' specifications and procedures
- Quality of service

**Line (GAC): I MAINTAIN TWO-STROKE AND FOUR-STROKE ENGINES**

**Competency: I8 Maintain engine cases**

### Objectives

To be competent in this area, the individual must be able to:

- Diagnose and service engine cases.

### LEARNING TASKS

1. Describe engine cases

### CONTENT

- Design
  - Vertical split
  - Horizontal split
  - Cylinder integration
- Components
  - Bearing bosses
  - Inspection ports and covers
  - Seals/sealants
  - Sealing surfaces
  - Gaskets

2. Diagnose engine cases

- Manufacturers' specifications and procedures
- Inspection
  - Visual
  - Threads and fasteners
  - Check-valves and galleries
  - Straightness of mating surfaces
  - Stress cracks
  - Bearing bosses
- Causes of failure
- Measurements

3. Service engine cases

- Manufacturers' specifications and procedures
- Removal and replacement of components
- Sealing
- Thread repair

### Achievement Criteria

Performance	The learner will remove and replace engine cases.
Conditions	<p>The learner will be given</p> <ul style="list-style-type: none"> <li>• Manufacturers' specifications and procedures</li> <li>• Motorcycle or motorcycle engine</li> <li>• Tools and equipment</li> </ul>
Criteria	<p>The learner will be evaluated on</p> <ul style="list-style-type: none"> <li>• Safety</li> <li>• Adherence to manufacturers' specifications and procedures</li> <li>• Quality of service</li> </ul>

<b>Line (GAC):</b>	<b>I</b>	<b>MAINTAIN TWO-STROKE AND FOUR-STROKE ENGINES</b>
<b>Competency:</b>	<b>I9</b>	<b>Maintain lubrication systems</b>

### Objectives

To be competent in this area, the individual must be able to:

- Describe diagnosing lubrication systems on four-stroke engines
- Service lubrication systems on four-stroke engines.

### LEARNING TASKS

### CONTENT

- |   |  |
|---|--|
| 1. Describe lubrication systems on four-stroke engines            | <ul style="list-style-type: none"> <li>• Lubrication systems               <ul style="list-style-type: none"> <li>○ Splash</li> <li>○ Pressurized</li> <li>○ Wet and dry sumps</li> </ul> </li> <li>• Crankcase ventilation systems</li> <li>• Components               <ul style="list-style-type: none"> <li>○ Oil pumps</li> <li>○ Oil filters</li> <li>○ Lubrication galleries (passages) and valves</li> <li>○ Check valves</li> <li>○ Pressure warning indicator systems</li> <li>○ Coolers</li> </ul> </li> </ul> |
| 2. Describe diagnosing lubrication systems on four-stroke engines | <ul style="list-style-type: none"> <li>• Manufacturers' specifications and procedures</li> <li>• Inspections and tests               <ul style="list-style-type: none"> <li>○ Visual</li> <li>○ Leaks</li> <li>○ Pressure</li> <li>○ Oil flow</li> </ul> </li> </ul>   |

### Achievement Criteria

Performance	The learner will service lubrication systems on four-stroke engines.
Conditions	<p>The learner will be given</p> <ul style="list-style-type: none"> <li>• Manufacturers' specifications and procedures</li> <li>• Motorcycle</li> <li>• Tools and equipment</li> </ul>
Criteria	<p>The learner will be evaluated on</p> <ul style="list-style-type: none"> <li>• Safety</li> <li>• Adherence to manufacturers' specifications and procedures</li> <li>• Quality of service</li> </ul>

<b>Line (GAC):</b>	<b>I</b>	<b>MAINTAIN TWO-STROKE AND FOUR-STROKE ENGINES</b>
<b>Competency:</b>	<b>I10</b>	<b>Maintain cooling systems</b>

### Objectives

To be competent in this area, the individual must be able to:

- Diagnose cooling systems on two-stroke and four-stroke engines.

### LEARNING TASKS

1. Diagnose cooling systems on two-stroke and four-stroke engines

### CONTENT

- Manufacturers' specifications and procedures
- Test equipment procedures
  - Dyes
  - Infrared
  - Carbon dioxide (CO<sub>2</sub>) detectors (gas analyzers)
- Inspection

### Achievement Criteria

<b>Performance</b>	The learner will perform test procedures on a liquid cooling system.
<b>Conditions</b>	The learner will be given <ul style="list-style-type: none"> <li>• Manufacturers' specifications and procedures</li> <li>• Motorcycle</li> <li>• Tools and equipment</li> </ul>
<b>Criteria</b>	The learner will be evaluated on <ul style="list-style-type: none"> <li>• Safety</li> <li>• Adherence to manufacturers' specifications and procedures</li> <li>• Accuracy of results</li> </ul>

<b>Line (GAC):</b>	<b>K</b>	<b>MAINTAIN TRANSMISSIONS</b>
<b>Competency:</b>	<b>K1</b>	<b>Maintain constant mesh transmissions</b>

### Objectives

To be competent in this area, the individual must be able to:

- Describe diagnosing constant mesh transmissions.
- Service constant mesh transmissions.

### LEARNING TASKS

1. Describe constant mesh transmissions

### CONTENT

- Types
  - Direct (main shaft)
  - Indirect (lay/counter shaft)
  - Constant mesh sliding gears
  - Dual-clutch transmissions (DCT)
- Design variations
  - 3-speed
  - 4-speed
  - 5-speed
  - 6-speed
  - Overdrive
- Components
  - Gear types
    - Spur
    - Helical
    - Bevel
  - Shift forks
  - Shift drum
  - Linkages
    - Shift shaft
    - Ratchet mechanisms
    - Neutral indicators
    - Gear indicators
- Power flow and ratios

2. Describe diagnosing constant mesh transmissions

- Manufacturers' specifications and procedures
- Inspections and measurements
  - Visual
  - Test ride
  - Component wear and damage

**LEARNING TASKS**
**CONTENT**
**3. Service constant mesh transmissions**

- Shaft end play
- Backlash
- Bearings
- Seals

- Manufacturers' specifications and procedures
- Disassembly and reassembly
  - Pre-lube
  - Bearing pre-load
  - Sealant/gaskets
  - Shift fork alignment
  - Torque values
  - Fluid levels
  - Shaft end play
  - Gasket thickness
  - Circlip orientation
- Component replacement
- Verify operations

**Achievement Criteria**

**Performance** The learner will service constant mesh transmissions.

**Conditions** The learner will be given

- Manufacturers' specifications and procedures
- Motorcycle or motorcycle engine
- Tools and equipment

**Criteria** The learner will be evaluated on

- Safety
- Adherence to manufacturers' specifications and procedures
- Quality of service

<b>Line (GAC):</b>	<b>L</b>	<b>MAINTAIN FINAL DRIVE SYSTEMS</b>
<b>Competency:</b>	<b>L2</b>	<b>Maintain final drive shafts and gears</b>

### Objectives

To be competent in this area, the individual must be able to:

- Diagnose and service final drive shafts and gears.

### LEARNING TASKS

1. Describe final drive shafts and gears

### CONTENT

- Types
  - Splined
  - Cardan (universal joint)
  - Slip yoke
  - Constant velocity
  - Four wheel-drive (4WD)
- Components
  - Differentials
  - Drive shafts
  - Universal joints
  - Splines
  - Seals and gaskets
  - Bellows and boots
  - Bearings
  - Gears
  - Shims

2. Diagnose final drive shafts and gears

- Manufacturers' specifications and procedures
- Inspection
  - Noise
  - Vibration
  - Fluid leak
  - Component

3. Service final drive shafts and gears

- Manufacturers' specifications and procedures
- Shafts
  - Lubrication
  - Wear inspection
  - Removal and replacement
- Gears
  - Lubrication
  - Removal and inspection
  - Measurement and assessment

**LEARNING TASKS**

**CONTENT**

- Shimming
- Replace and adjust components
- Bearings and seals

**Achievement Criteria**

**Performance**    The learner will disassemble, service and reassemble a final drive gear unit.

**Conditions**    The learner will be given

- Manufacturers' specifications and procedures
- Motorcycle, ATV or separate final drive gear unit
- Tools and equipment

**Criteria**        The learner will be evaluated on

- Safety
- Adherence to manufacturers' specifications and procedures
- Quality of service

<b>Line (GAC):</b>	<b>M</b>	<b>MAINTAIN ELECTRICAL SYSTEMS</b>
<b>Competency:</b>	<b>M1</b>	<b>Apply electrical and electronic principles</b>

## Objectives

To be competent in this area, the individual must be able to:

- Describe electrical and electronic components.
- Interpret electrical diagrams.
- Describe electrical troubleshooting.

## LEARNING TASKS

1. Describe electrical principles
2. Describe electrical components
3. Describe electronic components
4. Interpret electrical diagrams

## CONTENT

- Left hand rule (coils)
  - Positive switching
  - Negative switching
  - Induction and amplification
- 
- Power sources
    - Battery
    - Capacitors
  - Connectors
  - Relays
  - Solenoids
  - Coils
  - Fuses and circuit protection
- 
- Capacitors/ condensers/ suppressors
  - Light-emitting Diodes (LEDs)
  - Transistors
    - Negative-Positive-Negative (NPN)
    - Positive-Negative-Positive (PNP)
  - Pulse generators
  - Diodes
  - Resistors
    - Fixed
    - Variable
  - Zener diodes
- 
- Types
    - Pictorial
    - Block

**LEARNING TASKS**

5. Describe electrical troubleshooting

**CONTENT**

- Schematic
- Symbols
- Circuit tracing
  
- Faults
  - Grounds
  - High resistance
  - Shorts
  - Opens
- Component failure

<b>Line (GAC):</b>	<b>M</b>	<b>MAINTAIN ELECTRICAL SYSTEMS</b>
<b>Competency:</b>	<b>M3</b>	<b>Maintain electrical standard and accessory components</b>

### Objectives

To be competent in this area, the individual must be able to:

- Describe diagnosing electrical accessory components.

### LEARNING TASKS

1. Describe diagnosing electrical accessory components

### CONTENT

- Manufacturers' specifications and procedures
  - Aftermarket manufacturer
  - Original Equipment Manufacturer (OEM)
- Inspections
  - Wiring and connections
  - Component operation
- Diagnostic tools and equipment

**Line (GAC): M MAINTAIN ELECTRICAL SYSTEMS**

**Competency: M4 Maintain wiring harness systems**

### **Objectives**

To be competent in this area, the individual must be able to:

- Diagnose wiring harness systems.

### **LEARNING TASKS**

1. Diagnose wiring harness systems

### **CONTENT**

- Manufacturers' specifications and procedures
- Inspections
  - Visual
  - Routing
  - Chafing
  - Insulation
- Tests
  - Connections
  - Breaks
  - Continuity
  - Resistance
  - Shorts

**Line (GAC):**        **M    MAINTAIN ELECTRICAL SYSTEMS**  
**Competency:**     **M5   Maintain ignition systems**

### Objectives

To be competent in this area, the individual must be able to:

- Diagnose and service ignition systems.

### LEARNING TASKS

1. Describe ignition systems

### CONTENT

- Types
  - Battery
    - Point
    - Transistorized
    - Capacitor Discharged Ignition (CDI)
  - AC magneto
    - Point
    - CDI
    - Transistorized
  - Computerized
- Components
  - Spark plugs
  - High tension coils
    - Dual lead coils
    - Coil over plug
    - Single lead coils
  - Pulse/ pick up coils
  - Charge/ excitor/ source coils
  - Sensors
  - Primary and secondary circuits
  - Mechanical timing mechanisms
    - Centrifugal
    - Vacuum

2. Diagnose ignition systems

- Manufacturers' specifications and procedures
- Visual inspection
- Dynamic testing
  - Kilovolts (KV)
  - Peak voltage
  - Oscilloscope
    - Interpret patterns
  - Timing

**LEARNING TASKS**

<b>Line (GAC):</b>	<b>O</b>	<b>MAINTAIN FUEL AND EXHAUST SYSTEMS</b>
<b>Competency:</b>	<b>O1</b>	<b>Maintain fuel tanks and fuel delivery components</b>

### Objectives

To be competent in this area, the individual must be able to:

- Diagnose and service fuel tanks and fuel delivery components.

### LEARNING TASKS

1. Diagnose fuel tanks and fuel delivery components

### CONTENT

- Manufacturers' specifications and procedures
- Symptoms
  - Rough idle
  - Stalling
  - Flooding
  - Hesitation
  - Lack of power
- Visual inspections
  - Fuel condition and contamination
  - Vent lines
  - Fittings and hoses
  - Evaporative emission control (EVAP)
- Tests and measurements
  - Fuel pressure and volume
- Interpretation of results

2. Service fuel tanks and fuel delivery components

- Manufacturers' specifications and procedures
- Safety procedures
- Component repair and replacement
- Cleaning

### Achievement Criteria

**Performance** The learner will diagnose and service fuel tanks and fuel delivery components.

**Conditions** The learner will be given

- Manufacturers' specifications and procedures
- Motorcycle
- Tools and equipment

**Criteria** The learner will be evaluated on

- Safety
- Adherence to manufacturers' specifications and procedures
- Accuracy of test results
- Quality of service

**Line (GAC):**            **O    MAINTAIN FUEL AND EXHAUST SYSTEMS**  
**Competency:**        **O2   Maintain air delivery systems**

### Objectives

To be competent in this area, the individual must be able to:

- Diagnose and service air delivery systems.

### LEARNING TASKS

1. Diagnose air delivery systems

### CONTENT

- Manufacturers' specifications and procedures
- Visual inspections
- Tests and measurements
  - Vacuum leaks

2. Service air delivery systems

- Manufacturers' specifications and procedures
- Throttle bodies and carburetors
  - Synchronizing
  - Adjustments
  - Cleaning

### Achievement Criteria

**Performance**    The learner will synchronize throttle bodies and/or carburetors.

**Conditions**     The learner will be given

- Manufacturers' specifications and procedures
- Motorcycle
- Tools and equipment

**Criteria**        The learner will be evaluated on

- Safety
- Adherence to manufacturers' specifications and procedures
- Quality of service

<b>Line (GAC):</b>	<b>O</b>	<b>MAINTAIN FUEL AND EXHAUST SYSTEMS</b>
<b>Competency:</b>	<b>O3</b>	<b>Maintain carburetor systems</b>

### Objectives

To be competent in this area, the individual must be able to:

- Diagnose and service carburetor systems.

### LEARNING TASKS

1. Diagnose carburetor systems

### CONTENT

- Manufacturers' specifications and procedures
- Idle and cruise tests
- Performance problem troubleshooting
- Fuel and vacuum leaks
- Exhaust gas analysis (EGA)
  - Interpret CO, HC, O<sub>2</sub> and CO<sub>2</sub> readings

2. Service carburetor systems

- Manufacturers' specifications and procedures
- Cleaning
  - Ultra-sonic
  - Chemical
- Adjustments
  - Synchronization
  - Mixture
  - Float level
  - Idle speed
- Component replacement

### Achievement Criteria

<b>Performance</b>	The learner will set up and adjust carburetors.
<b>Conditions</b>	The learner will be given <ul style="list-style-type: none"> <li>• Manufacturers' specifications and procedures</li> <li>• Motorcycle</li> <li>• Tools and equipment</li> </ul>
<b>Criteria</b>	The learner will be evaluated on <ul style="list-style-type: none"> <li>• Safety</li> <li>• Adherence to manufacturers' specifications and procedures</li> <li>• Quality of service</li> </ul>

**Line (GAC): O MAINTAIN FUEL AND EXHAUST SYSTEMS**

**Competency: O4 Maintain exhaust systems**

### Objectives

To be competent in this area, the individual must be able to:

- Diagnose and service exhaust systems.

### LEARNING TASKS

1. Diagnose exhaust systems

### CONTENT

- Manufacturers' specifications and procedures
- Visual inspections
- Noises
- Leaks
- Exhaust valve control systems

2. Service exhaust systems

- Manufacturers' specifications and procedures
- Muffler re-packing
- Exhaust valve cleaning and adjustments
- Installation of spark arrestors (after-market)

# **Level 4**

## **Motorcycle Technician**

**Line (GAC):            B    PERFORM ROUTINE WORK PRACTICES**  
**Competency:           B7    Conduct safety inspections**

**Objectives**

To be competent in this area, the individual must be able to:

- Describe conducting safety inspections.

**LEARNING TASKS**

1. Describe conducting safety inspections

**CONTENT**

- Regulations
- Inspections
  - Post-accident
  - Custom-builds
  - Notice of orders
- Designated inspection facility
- Inspectors
  - Training
  - Endorsement

**Line (GAC): D USE COMMUNICATION AND MENTORING TECHNIQUES**

**Competency: D2 Use mentoring techniques**

### Objectives

To be competent in this area, the individual must be able to:

- Describe mentoring.
- Describe maintaining a healthy workplace environment.

### LEARNING TASKS

1. Describe mentoring

### CONTENT

- Responsibilities
  - Reporting work-based hours
  - Sign off on certification
  - Passing on knowledge to next generation
- Coaching
- Sharing techniques and best practices
- Learning/teaching strategies
  - Identifying learning needs
  - Demonstrating skills
  - Assessing skills
  - Providing feedback
- Modelling leadership
- Communication
- Professionalism
  - Authenticity
  - Honesty
  - Respect

2. Describe maintaining a healthy workplace environment

- Role of employer and employees
- Safety
- Policies
  - Recruiting
  - Hiring
  - Employee handbooks
  - Harrassment and discrimination
- Training
- Workplace culture

<b>Line (GAC):</b>	<b>H</b>	<b>MAINTAIN BRAKING SYSTEMS</b>
<b>Competency:</b>	<b>H3</b>	<b>Maintain braking control systems</b>

### Objectives

To be competent in this area, the individual must be able to:

- Diagnose and service braking control systems.

### LEARNING TASKS

1. Describe braking control systems

### CONTENT

- Types
  - ABS
  - Linked
- Components
  - Pumps
  - Electronic control unit (ECU)
  - Sensors
  - Valves
  - Hoses, lines and fittings
  - Reluctors
  - Wiring

2. Diagnose braking control systems

- Manufacturers' specifications and procedures
- Inspection
  - Fluid leak
  - Performance
  - Hygroscopic
- Tests and measurements
  - Dynamic pump test
  - Fault codes
  - Air gap check
  - Electrical
- Causes of failure
  - Maintenance issues
  - Moisture contamination
  - Corrosion
  - Wear
  - Component damage

3. Service braking control systems

- Manufacturers' specifications and procedures
- Fluid replacement
- Component replacement

**Achievement Criteria**

Performance	The learner will perform braking control systems diagnostic tests and measurements.
Conditions	<p>The learner will be given</p> <ul style="list-style-type: none"> <li>• Manufacturers' specifications and procedures</li> <li>• ABS-equipped motorcycle</li> <li>• Tools and equipment</li> </ul>
Criteria	<p>The learner will be evaluated on</p> <ul style="list-style-type: none"> <li>• Safety</li> <li>• Adherence to manufacturers' specifications and procedures</li> <li>• Accuracy of diagnosis</li> </ul>

<b>Line (GAC):</b>	<b>I</b>	<b>MAINTAIN TWO-STROKE AND FOUR-STROKE ENGINES</b>
<b>Competency:</b>	<b>I2</b>	<b>Maintain cylinder heads</b>

### Objectives

To be competent in this area, the individual must be able to:

- Diagnose and service cylinder heads on 4-stroke engines.

### LEARNING TASKS

### CONTENT

- |  |   |
|--|---|
| 1. Describe cylinder heads on 4-stroke engines | <ul style="list-style-type: none"> <li>• Components               <ul style="list-style-type: none"> <li>○ Valve seats</li> <li>○ Guides</li> <li>○ Cam shaft bearing saddles</li> <li>○ Threads and fasteners</li> </ul> </li> </ul>   |
| 2. Diagnose cylinder heads on 4-stroke engines | <ul style="list-style-type: none"> <li>• Manufacturers' specifications and procedures</li> <li>• Inspection               <ul style="list-style-type: none"> <li>○ Warpage</li> <li>○ Cooling fin condition</li> <li>○ Cooling jacket condition</li> <li>○ Combustion area condition</li> <li>○ Thread and fastener condition</li> <li>○ Cracks</li> <li>○ Sealing surface condition</li> </ul> </li> <li>• Measurements and tests               <ul style="list-style-type: none"> <li>○ Valve seat</li> <li>○ Valve sealing test</li> <li>○ Valve guide wear</li> </ul> </li> </ul> |
| 3. Service cylinder heads on 4-stroke engines  | <ul style="list-style-type: none"> <li>• Manufacturers' specifications and procedures</li> <li>• De-carboning</li> <li>• Clearing cooling fins</li> <li>• Gasket Re&amp;Re</li> <li>• Sealing</li> <li>• Planing</li> <li>• Valve seat re-conditioning (repair vs. sublet)</li> </ul>   |

### Achievement Criteria

Performance	The learner will disassemble, diagnose and record findings for cylinder heads on 4-stroke engines.
Conditions	<p>The learner will be given</p> <ul style="list-style-type: none"> <li>• Manufacturers' specifications and procedures</li> <li>• Motorcycle, motorcycle engine or cylinder head</li> <li>• Tools and equipment</li> </ul>
Criteria	<p>The learner will be evaluated on</p> <ul style="list-style-type: none"> <li>• Safety</li> <li>• Adherence to manufacturers' specifications and procedures</li> <li>• Accuracy of findings</li> </ul>

<b>Line (GAC):</b>	<b>I</b>	<b>MAINTAIN TWO-STROKE AND FOUR-STROKE ENGINES</b>
<b>Competency:</b>	<b>I4</b>	<b>Maintain valve trains on four-stroke engines</b>

### Objectives

To be competent in this area, the individual must be able to:

- Diagnose and service valve trains on four-stroke engines.

### LEARNING TASKS

1. Diagnose valve trains on four-stroke engines

### CONTENT

- Manufacturers' specifications and procedures
- Inspections
  - Noises
    - Valve clearance
    - Cam chain tension
  - Wear
- Causes of failure
- Camshaft measurements
  - Timing
  - Chain wear
  - Lobe wear
  - Journal wear
- Valve measurements
  - Face wear
  - Spring free length
  - Spring squareness
  - Bucket/lifter/tappet wear
  - Shim calculations

2. Service valve trains on four-stroke engines

- Manufacturers' specifications and procedures
- Shim/cam follower
- Shim over and under bucket adjustments

### Achievement Criteria

Performance	<p>The learner will diagnose and service valve trains on four-stroke engines, including</p> <ul style="list-style-type: none"> <li>• Diagnose and record findings</li> <li>• Shim/bucket-type valve adjustment</li> </ul>
Conditions	<p>The learner will be given</p> <ul style="list-style-type: none"> <li>• Manufacturers' specifications and procedures</li> <li>• Motorcycle or motorcycle engine</li> <li>• Tools and equipment</li> </ul>
Criteria	<p>The learner will be evaluated on</p> <ul style="list-style-type: none"> <li>• Safety</li> <li>• Adherence to manufacturers' specifications and procedures</li> <li>• Accuracy of findings and adjustments</li> </ul>

<b>Line (GAC):</b>	<b>I</b>	<b>MAINTAIN TWO-STROKE AND FOUR-STROKE ENGINES</b>
<b>Competency:</b>	<b>I5</b>	<b>Maintain cylinders and pistons</b>

### Objectives

To be competent in this area, the individual must be able to:

- Diagnose and service cylinders and pistons on four-stroke engines.

### LEARNING TASKS

### CONTENT

- |  |  |

| 3. Service pistons on four-stroke engines                | <ul style="list-style-type: none"> <li>• Manufacturers' specifications and procedures</li> <li>• Component replacement               <ul style="list-style-type: none"> <li>○ Complete piston and rings</li> <li>○ Rings only</li> <li>○ Wrist pin</li> </ul> </li> <li>• Cleaning</li> <li>• Decarbonizing</li> <li>• Installation precautions               <ul style="list-style-type: none"> <li>○ Ring gaps</li> <li>○ Piston to wall clearance</li> <li>○ Orientation</li> </ul> </li> </ul>   |

**Achievement Criteria**

Performance	The learner will diagnose and Re & Re cylinders and pistons on four-stroke engines.
Conditions	<p>The learner will be given</p> <ul style="list-style-type: none"> <li>• Manufacturers' specifications and procedures</li> <li>• Motorcycle or motorcycle engine</li> <li>• Tools and equipment</li> </ul>
Criteria	<p>The learner will be evaluated on</p> <ul style="list-style-type: none"> <li>• Safety</li> <li>• Adherence to manufacturers' specifications and procedures</li> <li>• Accuracy of measurements</li> <li>• Quality of service</li> </ul>

<b>Line (GAC):</b>	<b>I</b>	<b>MAINTAIN TWO-STROKE AND FOUR-STROKE ENGINES</b>
<b>Competency:</b>	<b>I6</b>	<b>Maintain crankshaft assemblies</b>

### Objectives

To be competent in this area, the individual must be able to:

- Diagnose crankshaft assemblies.
- Describe servicing multi-piece (built-up) crankshaft assemblies.

### LEARNING TASKS

1. Diagnose crankshaft assemblies

### CONTENT

- Manufacturers' specifications and procedures
- Inspections
  - Run out
  - Truing (balancing)
  - Keyways and threads
  - Oil passages
  - Bearings
- Measurements and checks
  - Run out
  - Journals
  - Plain bearing selection
  - Oil clearance (plastigage)

2. Describe servicing multi-piece (built-up) crankshaft assemblies

- Manufacturers' specifications and procedures
- Tool and equipment selection
- Removal
- Disassembly
- Assessments
- Reassembly
- Truing and balancing
- Installation
- Seals and bearings

### Achievement Criteria

Performance	The learner will measure run out and inspect bearings on a crankshaft assembly.
Conditions	The learner will be given <ul style="list-style-type: none"> <li>• Manufacturers' specifications and procedures</li> <li>• Motorcycle, motorcycle engine or crankshaft assembly</li> <li>• Tools and equipment</li> </ul>
Criteria	The learner will be evaluated on <ul style="list-style-type: none"> <li>• Safety</li> <li>• Adherence to manufacturers' specifications and procedures</li> <li>• Accuracy of measurements</li> </ul>

<b>Line (GAC):</b>	<b>I</b>	<b>MAINTAIN TWO-STROKE AND FOUR-STROKE ENGINES</b>
<b>Competency:</b>	<b>I7</b>	<b>Maintain counterbalance assemblies</b>

### Objectives

To be competent in this area, the individual must be able to:

- Verify repair of counterbalance assemblies.
- Describe specialized designs of counterbalance assemblies.

### LEARNING TASKS

| 1. Verify repair of counterbalance assemblies                | <ul style="list-style-type: none"> <li>• Manufacturers' specifications and procedures</li> <li>• Engine vibration</li> <li>• Test ride</li> <li>• Timing</li> <li>• Chain adjustments</li> </ul> |
| 2. Describe specialized designs of counterbalance assemblies | <ul style="list-style-type: none"> <li>• Offset crankshaft design requirements</li> <li>• Coupling force balancing shafts</li> <li>• Harmonic vibration equalizer assemblies</li> </ul>          |

<b>Line (GAC):</b>	<b>I</b>	<b>MAINTAIN TWO-STROKE AND FOUR-STROKE ENGINES</b>
<b>Competency:</b>	<b>I8</b>	<b>Maintain engine cases</b>

### Objectives

To be competent in this area, the individual must be able to:

- Assess engine cases.

### LEARNING TASKS

1. Assess engine cases

### CONTENT

- Manufacturers' specifications and procedures
- Inspection
  - Visual
  - Threads and fasteners
  - Check-valves and galleries
  - Straightness of mating surfaces
  - Stress cracks
  - Bearing bosses
- Causes of failure
  - Leaks
    - Warpage
    - Cracks
- Test equipment
  - Smoke machine
  - Pressure
  - Dye testing
- Measurements
  - Bearing bosses
  - Straightness

### Achievement Criteria

<b>Performance</b>	The learner will perform diagnostic tests and measurements on engine cases.
<b>Conditions</b>	The learner will be given <ul style="list-style-type: none"> <li>• Manufacturers' specifications and procedures</li> <li>• Motorcycle or motorcycle engine</li> <li>• Tools and equipment</li> </ul>
<b>Criteria</b>	The learner will be evaluated on <ul style="list-style-type: none"> <li>• Safety</li> <li>• Adherence to manufacturers' specifications and procedures</li> <li>• Accuracy of test results and measurements</li> </ul>

<b>Line (GAC):</b>	<b>I</b>	<b>MAINTAIN TWO-STROKE AND FOUR-STROKE ENGINES</b>
<b>Competency:</b>	<b>I9</b>	<b>Maintain lubrication systems</b>

### Objectives

To be competent in this area, the individual must be able to:

- Diagnose lubrication systems on four-stroke engines.
- Describe lubrication systems accessories.

### LEARNING TASKS

1. Diagnose lubrication systems on four-stroke engines

### CONTENT

- Manufacturers' specifications and procedures
- Inspections and tests
  - Visual
  - Leaks
  - Pressure
  - Oil flow
  - Oil cooling
- Identifying causes of failure
  - Filter examination
  - Contamination
    - Fuel
    - Water

2. Describe lubrication systems accessories

- After market or optional add ons
- Types
  - Coolers
  - Filtration systems
  - Oil temperature gauge kits
- Installation process

### Achievement Criteria

Performance	The learner will perform oil pressure testing.
Conditions	The learner will be given <ul style="list-style-type: none"> <li>• Manufacturers' specifications and procedures</li> <li>• Motorcycle</li> <li>• Tools and equipment</li> </ul>
Criteria	The learner will be evaluated on <ul style="list-style-type: none"> <li>• Safety</li> <li>• Adherence to manufacturers' specifications and procedures</li> <li>• Accuracy of test results and measurements</li> </ul>

<b>Line (GAC):</b>	<b>K</b>	<b>MAINTAIN TRANSMISSIONS</b>
<b>Competency:</b>	<b>K1</b>	<b>Maintain constant mesh transmissions</b>

### Objectives

To be competent in this area, the individual must be able to:

- Diagnose constant mesh transmissions.

### LEARNING TASKS

1. Diagnose constant mesh transmissions

### CONTENT

- Manufacturers' specifications and procedures
- Inspections and measurements
  - Visual
  - Test ride
  - Component wear and damage
  - Shaft end play
  - Backlash
  - Bearings
  - Seals
  - Fluid
    - Contamination
    - Metal debris
- Identifying causes of failure
  - Lack of lubrication
  - Overheating
  - Improper operation

<b>Line (GAC):</b>	<b>N</b>	<b>MAINTAIN VEHICLE MANAGEMENT SYSTEMS</b>
<b>Competency:</b>	<b>N2</b>	<b>Use specialized equipment</b>

### Objectives

To be competent in this area, the individual must be able to:

- Use interface systems.
- Use specialized equipment.

### LEARNING TASKS

1. Describe specialized equipment

### CONTENT

- Scanners
- Interface systems (laptop)
- Diagnostic software
  - OEM
  - Aftermarket
- Manometer
- Exhaust analyzers
- Dynometer
- Graphing multimeter
- Lab scopes and signals
  - Wave form (analog)
  - Square form (digital)
- Peak voltage adaptors

2. Use interface systems

- Manufacturers' specifications and procedures
- Retrieving codes and data
- Freeze frame data (failure records)
- Data logging
- Active (bi-directional) tests
  - Static
  - Dynamic
- Adjustments
  - Idle speed
  - CO/ fuel mixture

3. Use specialized equipment

- Manufacturers' specifications and procedures
- Peak voltage adaptors
- Sensor testing
  - Reference voltage
  - Voltage generating sensors
  - Variable resistance sensors

**LEARNING TASKS**

**CONTENT**

- Oxygen sensors
- Hall-effect sensors
- Adjusting sensors
  - Throttle position
- Qualifying sensor operation

**Achievement Criteria**

**Performance** The learner will use specialized equipment.

**Conditions** The learner will be given

- Manufacturers' specifications and procedures
- Motorcycle
- Tools and equipment

**Criteria** The learner will be evaluated on

- Safety
- Adherence to manufacturers' specifications and procedures
- Quality of interpretation of test results and measurements

<b>Line (GAC):</b>	<b>N</b>	<b>MAINTAIN VEHICLE MANAGEMENT SYSTEMS</b>
<b>Competency:</b>	<b>N3</b>	<b>Interpret diagnostic trouble codes (DTC) results</b>

### Objectives

To be competent in this area, the individual must be able to:

- Describe system DTCs and retrieval methods.
- Interpret DTC results.

### LEARNING TASKS

1. Describe system DTCs

2. Describe DTC retrieval methods

3. Interpret DTC results

### CONTENT

- System types
  - Engine management
  - Braking
  - Traction control
  - Displays
  - Suspension
- Components
  - MIL
  - Sensors
  - Modules
  - CAN bus
- Methods of retrieval
  - Scan tools
  - Interface systems
  - Indicator display
- Types of DTCs
  - Flashing
  - Instrument panel display
  - ISO
  - Stored and current
  - "P" codes
  - Alphanumerical codes
  - Numerical codes
- Manufacturers' specifications and procedures
- Determining which DTCs to investigate first
- Utilizing troubleshooting charts to identify areas of concern
- Determining corrective action

### Achievement Criteria

Performance	The learner will interpret DTC results and determine corrective action.
Conditions	<p>The learner will be given</p> <ul style="list-style-type: none"> <li>• Manufacturers' specifications and procedures</li> <li>• Motorcycle</li> <li>• Tools and equipment</li> </ul>
Criteria	<p>The learner will be evaluated on</p> <ul style="list-style-type: none"> <li>• Safety</li> <li>• Adherence to manufacturers' specifications and procedures</li> <li>• Accuracy of interpretation and corrective action selected.</li> </ul>

<b>Line (GAC):</b>	<b>N</b>	<b>MAINTAIN VEHICLE MANAGEMENT SYSTEMS</b>
<b>Competency:</b>	<b>N4</b>	<b>Maintain system circuitry and components</b>

### Objectives

To be competent in this area, the individual must be able to:

- Interpret computer wiring diagrams.
- Test engine management input sensors and output actuators.
- Service computer control systems.

### LEARNING TASKS

1. Describe computer control systems

### CONTENT

- Computer modules
  - Location
  - Identification
  - Precautions
  - Memory
- Inputs/sensors
- Outputs/actuators

2. Interpret computer wiring diagrams

- Interpret symbols
  - Fuel injectors
  - Speed sensors
  - Pressure sensors
  - Relays
  - Electronic Control Module (ECM)
  - Fall detection switches
  - Test couplers
  - Safety switches
  - Low-oil switches

3. Test engine management input sensors

- Rev limiter
- Inputs/sensors
  - Intake air temperature
  - Intake pressure
  - Throttle sensor
  - Intake flow meters
  - O<sub>2</sub> sensor
  - Crankshaft sensor
  - Camshaft sensor
  - Coolant temperature sensor
  - Fall detection sensor
  - Barometric sensor

**LEARNING TASKS**
**CONTENT**

- |  |   |
|--|---|
| 4. Test engine management output actuators | <ul style="list-style-type: none"> <li>• Actuators               <ul style="list-style-type: none"> <li>○ Coils</li> <li>○ Injectors</li> <li>○ Idle control</li> <li>○ Fuel pump</li> <li>○ Cold start systems</li> <li>○ Malfunction indicator lamp</li> <li>○ Throttle stepper motors</li> <li>○ MIL</li> </ul> </li> </ul>  |
| 5. Service computer control systems        | <ul style="list-style-type: none"> <li>• Manufacturers' specifications and procedures</li> <li>• Locating components and connectors</li> <li>• Self-diagnostic modes</li> <li>• Resetting and relearning adaptives</li> <li>• Adjusting sensors</li> <li>• Health checks</li> <li>• Data streaming</li> <li>• Replacing components</li> <li>• Verifying repair</li> </ul> |

**Achievement Criteria**

- |             |  |

### Achievement Criteria

Performance	The learner will identify scan tool and most recent version of software.
Conditions	<p>The learner will be given</p> <ul style="list-style-type: none"> <li>• Manufacturers' specifications and procedures</li> <li>• Motorcycle</li> <li>• Tools and equipment</li> </ul>
Criteria	<p>The learner will be evaluated on</p> <ul style="list-style-type: none"> <li>• Safety</li> <li>• Adherence to manufacturers' specifications and procedures</li> <li>• Accuracy of procedure and results</li> </ul>

<b>Line (GAC):</b>	<b>O</b>	<b>MAINTAIN FUEL AND EXHAUST SYSTEMS</b>
<b>Competency:</b>	<b>O5</b>	<b>Maintain fuel injection systems</b>

### Objectives

To be competent in this area, the individual must be able to:

- Diagnose and service fuel injection systems.

### LEARNING TASKS

1. Describe fuel injection systems

### CONTENT

- Types
  - Sequential
  - Direct
  - Dual (twin) injection
  - Return and returnless
- Components
  - Filters/strainers
  - Injectors
    - Primary
    - Secondary (shower)
  - Lines
  - Pressure regulator
  - Throttle body
- Manufacturers' specifications and procedures
- Inspection
  - Visual
    - Leak (internal, external)
    - Wiring and connectors
  - Operation
- Tests and measurements
  - Injector (electrical)
  - Injector flow (spray pattern, volume)
  - Exhaust gas analysis
- Causes of failure
  - Contaminants
  - Component failure
    - Electrical
    - Mechanical

2. Diagnose fuel injection systems

3. Service fuel injection systems

- Manufacturers' specifications and procedures

**LEARNING TASKS**

**CONTENT**

- Cleaning
- Component replacement

**Achievement Criteria**

Performance	The learner will perform fuel injection tests and measurements for diagnostic purposes.
Conditions	<p>The learner will be given</p> <ul style="list-style-type: none"> <li>• Manufacturers' specifications and procedures</li> <li>• Motorcycle</li> <li>• Tools and equipment</li> </ul>
Criteria	<p>The learner will be evaluated on</p> <ul style="list-style-type: none"> <li>• Safety</li> <li>• Adherence to manufacturers' specifications and procedures</li> <li>• Accuracy of diagnosis</li> </ul>

<b>Line (GAC):</b>	<b>P</b>	<b>MAINTAIN ELECTRIC MOTORCYCLES</b>
<b>Competency:</b>	<b>P1</b>	<b>Implement specific safety protocols for electric motorcycles</b>

### Objectives

To be competent in this area, the individual must be able to:

- Describe electric motorcycle safety.

### LEARNING TASKS

1. Describe electric motorcycle safety

### CONTENT

- Manufacturers' specifications and procedures
- Safety
  - Jurisdictional regulations
  - Shop guidelines
  - Precautions
    - Pushing
    - Towing
- PPE
  - Gloves
- High voltage disconnect procedures
- Disposal procedures

**Line (GAC):**        **P**    **MAINTAIN ELECTRIC MOTORCYCLES**  
**Competency:**     **P2**   **Maintain electric motorcycles**

### Objectives

To be competent in this area, the individual must be able to:

- Describe diagnosing and servicing electric motorcycles.

### LEARNING TASKS

1. Describe electric motorcycles

### CONTENT

- Types
  - Single-motor
  - Dual-motor
  - Regenerative
  - Voltage levels
- Fundamentals of operation
- Components
  - Motor generators
    - AC
    - Direct Current (DC)
  - Inverters and converters
  - Wiring and control
  - Driveline systems
  - Lubrication systems
  - Cooling systems
- Modes of operation

2. Describe diagnosing electric motorcycles

- Manufacturers' specifications and procedures
- Inspections
- Tests and measurements
  - Equipment selection
  - Electrical
  - Data
  - Functional tests

3. Describe servicing electric motorcycles

- Manufacturers' specifications and procedures
- Test equipment certification
  - Protection levels
    - Category II
    - Category III
- Component replacement
- Maintenance

**LEARNING TASKS**

**CONTENT**

- Lubricants
- Cooling system
- Battery charging
- Driveline

O	MAINTAIN FUEL AND EXHAUST SYSTEMS	11%	15%
P	MAINTAIN ELECTRIC MOTORCYCLES	3%	0%
	Total	100%	100%
<b>In-school theory / practical subject competency weighting</b>		60%	40%
<b>Final in-school mark</b>  Apprentices must achieve a minimum 70% for the final in-school mark to be eligible to write the Motorcycle Technician Interprovincial Red Seal exam.		IN-SCHOOL %	

**All apprentices who complete Level 4 of the Motorcycle Technician program with a FINAL level mark of 70% or greater will write the Interprovincial Red Seal examination as their final assessment.**

**SkilledTradesBC will enter the apprentices' Motorcycle Technician Interprovincial Red Seal examination percentage score into SkilledTradesBC Portal.**

**A minimum percentage score of 70% on the examination is required for a pass.**

# **Section 5**

## **TRAINING PROVIDER STANDARDS**

## **Facility Requirements**

### **Classroom Area**

- Compliance with all local and national fire code and occupational safety requirements
- Compliance with municipal and provincial bylaws and regulations, including WorkSafeBC requirements
- Comfortable seating and tables suitable for learning
- Overhead and multimedia projectors with a projection screen
- Whiteboard with marking pens and erasers
- Lighting controls to allow easy visibility of the projection screen while allowing students to take notes
- Windows must have shades or blinds to adjust sunlight
- In-room temperature control to ensure comfortable room temperature
- Acoustics in the room must allow audibility of the instructor
- Access to the internet for students and instructors using suitable devices
- Access to a library complete with reference material for student and instructor use

### **Shop Area**

- Compliance with all local and national fire code and occupational safety requirements
- Compliance with municipal and provincial bylaws and regulations, including WorkSafeBC requirements
- Minimum square feet and ceiling height to safely accommodate all required equipment and tools associated with practical training components as identified in this Program Outline
- 2,400 square feet per 16 students with 16-foot ceilings is recommended
- Adequate outdoors area, fenced
- Adequate climate control and lighting
- Ventilation as per WorkSafeBC standards
- Storage area for tools, equipment and materials
- Refuse and recycling bins for used materials
- First Aid facilities
- Posted signage for fire exits, first aid facilities, safety equipment, hazardous materials

### **Lab Requirements**

- N/A

### **Student Facilities**

- Adequate lunchroom as per WorkSafeBC requirements
- Adequate washroom facilities as per WorkSafeBC requirements
- Personal storage lockers

### **Instructor's Office Space**

- Desk and filing space
- Computer

### **Other**

- N/A

## Tools and Equipment

### Shop Equipment

#### *Required*

- Allen wrenches (Metric and SAE)
- Ball hone
- Ball peen hammer
- Bearing and seal driver set
- Bearing puller set
- Brass mallet
- Circlip plier set
- Combination wrench set (Metric and SAE)
- Crimping tool
- Dead-blow hammer
- Drill press
- File set
- Gasket scraper
- Hand drill
- Impact driver
- Lock wrench
- Pick set
- Pin/hook wrench
- Pliers set
- Punch set
- Riveting tool
- Rubber mallet
- Screwdriver set
- Seal driver set
- Slide hammer
- Snap ring pliers
- Socket set (Metric and SAE)
- Spoke torque wrench
- Spoke wrench
- Thread repair kit
- Tire irons
- Torque wrenches in/lb, ft/lb Nm
- Vacuum pump
- Wire brush
- Wire cutting tool
- Wire stripping tool
- Wire wheel

#### *Recommended*

- Cylinder hone
- Reamers
- Torque plates
- Valve resurfacing tool
- Valve seat cutter

### Shop (Facility) Tools

#### *Standard Tools*

- Alignment bars
- Battery charger
- Bench grinder
- Bench Vice
- Bleeding equipment
- Brake cylinder hone
- Cable lubricating tool
- Carbon scraper
- Chain breaker
- Crankcase separator
- Crankshaft puller/installer
- Damper rod holder
- Hand Grinder
- Headlight aiming equipment
- Piston pin puller
- Nitrogen recharging unit
- Ring compressor
- Seal remover
- Tire balancing equipment
- Tire mounting equipment
- Wheel balancing equipment
- Wheel truing jig

***Specialty Tools*****Cutting/Heating Tools and Equipment**

- Cutting equipment
- Electric arc welding equipment
- Heat gun
- Oxyacetylene welding
- Propane torch
- Soldering equipment

**Pneumatic and Electric Power Tools**

- Bonding equipment
- Compressed blower
- Grinder
- Hydraulic jack
- Hydraulic press
- Impact wrench
- Media blaster
- Riveting equipment
- Rotary tool
- Suspension Spring compressor
- Ultrasonic cleaner
- Valve spring compressor

**Measuring Devices**

- Alignment tool
- Carburetor float level gauge
- Coolant testing devices
- Cylinder bore gauge
- Degree wheel
- Dial indicator
- Engine tachometer
- Feeler gauge
- Graduated cylinder
- Height gauge
- Hydrometer
- Inside micrometer
- Inside/outside calipers
- Micrometer
- Oil pressure gauge
- Plasti-gage
- Small hole gauge set
- Steel rule
- Straightedge
- Tape measure
- Telescoping gauges set
- Tension gauge
- Tire pressure gauge
- Tread depth gauge
- Vernier caliper

**Diagnostic and Testing Tools**

- Alignment tool
- Battery tester
- Borescope
- Compression tester
- Computer diagnostic equipment
- Crankcase pressure test equipment
- Fuel pressure tester
- Hydrometer/refractometer
- Leak-down tester
- Multimeter
- Spark tester
- Stethoscope
- Test light
- Timing light
- Vacuum gauge

## Reference Materials

### Required Reference Materials

### Suggested Texts

- N/A

## **Instructor Requirements**

### **Occupation Qualification**

The instructor must possess one of the following:

- Motorcycle Technician Certificate of Qualification with an Interprovincial Red Seal Endorsement
- Motorcycle Mechanic Certificate of Qualification with an Interprovincial Red Seal Endorsement

### **Work Experience**

The instructor must possess

- A minimum of 5 years' experience working in the industry as a journeyperson.
- Diverse industry experience covering all the competencies in this program.

### **Instructional Experience and Education**

It is preferred that the instructor also possesses one of the following:

- An Instructor Diploma or equivalent
- A Bachelor's Degree in Education
- A Master's Degree in Education

## Appendix B: Summary of Achievement Criteria

Achievement Criteria are included for competencies that require a practical assessment. The intent of including Achievement Criteria in the Program Outline is to ensure consistency in training across the many training institutions in British Columbia. Their purpose is to reinforce the theory and to provide a mechanism for evaluation of the learner's ability to apply the theory to practice. It is important that these performances be observable and measurable and that they reflect the skills spelled out in the competency. The conditions under which these performances will be observed and measured must be clear to the learner as well as the criteria by which the learner will be evaluated. The learner must also be given the evaluation criteria.

The performance spelled out in the Achievement Criteria is a suggested performance and is not meant to stifle flexibility of delivery. Training providers are welcome to substitute other practical performances that measure similar skills and attainment of the competency. Multiple performances may also be used to replace individual performances where appropriate.

The following tables summarize the practical assessments for each level. **For details, please refer to the Achievement Criteria following the competency in the Program Content section.**

<b>MOTORCYCLE TECHNICIAN – LEVEL 1 SUMMARY OF ACHIEVEMENT CRITERIA</b>	
<b>SUBJECT COMPETENCY</b>	<b>ACHIEVEMENT CRITERIA TASK</b>
<b>B2</b> Perform periodic maintenance of lubrication systems	The learner will service engine oil and filters.
<b>B3</b> Perform periodic maintenance of cooling systems	The learner will service cooling systems.
<b>B4</b> Perform periodic maintenance of bearings	The learner will service wheel bearings.
<b>C1</b> Use diagnostic tools and equipment	The learner will perform basic electrical measurements using a DMM.
<b>C2</b> Use precision measuring instruments	The learner will perform basic measurements using precision measuring instruments.
<b>C3</b> Use hand tools	The learner will perform thread repair.
<b>C4</b> Use heating/cutting tools and equipment	The learner will use heating/cutting tools and equipment.
<b>C5</b> Use pneumatic and electric power tools and equipment	The learner will use power tools and equipment.
<b>G1</b> Maintain tires	The learner will Re & Re a tire and wheel and perform tire balancing.  <i>Note: This achievement criteria covers both G1 Maintain tires and G3 Maintain cast wheels.</i>
<b>G3</b> Maintain cast wheels	
<b>H2</b> Maintain mechanical braking systems	The learner will service mechanical brakes, including <ul style="list-style-type: none"> <li>• Inspection</li> <li>• Replacement</li> <li>• Adjustment</li> </ul>
<b>L1</b> Maintain final drive chains and sprockets	The learner will clean, lubricate, and adjust chain drive systems.
<b>L3</b> Maintain final drive belts and pulleys (sprockets)	The learner will inspect, clean, and adjust final drive belt and pulleys (sprockets).
<b>M2</b> Maintain batteries	The learner will test and/or initialize a battery.
<b>N1</b> Read diagnostic trouble codes (DTC)	The learner will read and record DTCs.

<b>MOTORCYCLE TECHNICIAN – LEVEL 2 SUMMARY OF ACHIEVEMENT CRITERIA</b>	
<b>SUBJECT COMPETENCY</b>	<b>ACHIEVEMENT CRITERIA TASK</b>
<b>C1</b> Use diagnostic tools and equipment	The learner will perform tests using diagnostic tools and equipment.
<b>E2</b> Maintain steering heads	The learner will service steering heads for 2-wheeled motorcycles.
<b>E4</b> Maintain chassis standard and accessory components	The learner will remove and install an accessory chassis component.
<b>F2</b> Maintain front suspension components for multi-wheeled motorcycles	The learner will service ATV front suspension components.
<b>F3</b> Maintain rear suspension components	The learner will adjust rear suspension.
<b>I9</b> Maintain lubrication systems	The learner will service lubrication systems on two-stroke engines.
<b>I10</b> Maintain cooling systems	The learner will diagnose and service cooling systems on liquid-cooled engines.
<b>J2</b> Maintain primary drive chains and sprockets	The learner will maintain and adjust primary drive chains.
<b>J4</b> Maintain manual clutches	The learner will service manual clutches.
<b>J6</b> Maintain manual starting systems	The learner will remove, service and replace components for a recoil starting system.
<b>K2</b> Maintain continuously variable transmissions (CVT)	The learner will service centrifugal clutch and belt drives.
<b>M3</b> Maintain electrical standard and accessory components	<i>(Optional depending on availability of components)</i> The learner will install electrical accessory components.
<b>M4</b> Maintain wiring harness systems	The learner will repair connections on wiring.
<b>M6</b> Maintain electric starting systems	The learner will diagnose and service electric starting systems.
<b>M7</b> Maintain charging systems	The learner will test and diagnose charging systems.
<b>O2</b> Maintain air delivery systems	The learner will test and diagnose air delivery systems.
<b>O3</b> Maintain carburetor systems	The learner will service carburetor systems (on single-cylinder engine).
<b>O4</b> Maintain exhaust systems	The learner will service exhaust systems.

<b>MOTORCYCLE TECHNICIAN – LEVEL 3 SUMMARY OF ACHIEVEMENT CRITERIA</b>	
<b>SUBJECT COMPETENCY</b>	<b>ACHIEVEMENT CRITERIA TASK</b>
<b>E3</b> Maintain steering systems for multi-wheeled motorcycles	The learner will Re & Re components, make adjustments, and perform wheel alignment on a multi-wheeled motorcycle or ATV.
<b>F1</b> Maintain front suspension components	The learner will service front-suspension components.
<b>F2</b> Maintain front suspension components for multi-wheeled motorcycles	The learner will service front suspension components for multi-wheeled motorcycles.
<b>F3</b> Maintain rear suspension components	The learner will service rear suspension components.
<b>G2</b> Maintain spoked wheels	The learner will replace and true a spoked motorcycle wheel.
<b>I2</b> Maintain cylinder heads	The learner will service cylinder heads on two-stroke engines.
<b>I3</b> Maintain valve systems on two-stroke engines	The learner will service valve systems on two-stroke engines.
<b>I4</b> Maintain valve trains on four-stroke engines	The learner will service valve trains on four-stroke engines.
<b>I5</b> Maintain cylinders and pistons	The learner will service cylinders and pistons on two-stroke engines.
<b>I6</b> Maintain crankshaft assemblies	The learner will remove and reinstall a one-piece crankshaft assembly.
<b>I7</b> Maintain counterbalance assemblies	The learner will remove and install counterbalance assemblies.
<b>I8</b> Maintain engine cases	The learner will remove and replace engine cases.
<b>I9</b> Maintain lubrication systems	The learner will service lubrication systems on four-stroke engines.
<b>I10</b> Maintain cooling systems	The learner will perform test procedures on a liquid cooling system.
<b>K1</b> Maintain constant mesh transmissions	The learner will service constant mesh transmissions.
<b>L2</b> Maintain final drive shafts and gears	The learner will disassemble, service and reassemble a final drive gear unit.
<b>M5</b> Maintain ignition systems	The learner will diagnose and service ignition systems.
<b>O1</b> Maintain fuel tanks and fuel delivery components	The learner will diagnose and service fuel tanks and fuel delivery components.
<b>O2</b> Maintain air delivery systems	The learner will synchronize throttle bodies and/or carburetors.
<b>O3</b> Maintain carburetor systems	The learner will set up and adjust carburetors.

<b>MOTORCYCLE TECHNICIAN – LEVEL 4 SUMMARY OF ACHIEVEMENT CRITERIA</b>	
<b>SUBJECT COMPETENCY</b>	<b>ACHIEVEMENT CRITERIA TASK</b>
<b>H3</b> Maintain braking control systems	The learner will perform braking control systems diagnostic tests and measurements.
<b>I2</b> Maintain cylinder heads	The learner will disassemble, diagnose and record findings for cylinder heads on 4-stroke engines.
<b>I4</b> Maintain valve trains on four-stroke engines	The learner will diagnose and service valve trains on four-stroke engines, including <ul style="list-style-type: none"> <li>• Diagnose and record findings</li> <li>• Shim/bucket-type valve adjustment</li> </ul>
<b>I5</b> Maintain cylinders and pistons	The learner will diagnose and Re & Re cylinders and pistons on four-stroke engines.
<b>I6</b> Maintain crankshaft assemblies	The learner will measure run out and inspect bearings on a crankshaft assembly.
<b>I8</b> Maintain engine cases	The learner will perform diagnostic tests and measurements on engine cases.
<b>I9</b> Maintain lubrication systems	The learner will perform oil pressure testing.
<b>N2</b> Use specialized equipment	The learner will use specialized equipment.
<b>N3</b> Interpret diagnostic trouble codes (DTC) results	The learner will interpret DTC results and determine corrective action.
<b>N4</b> Maintain system circuitry and components	The learner will test and service computer control systems.
<b>N5</b> Update software	The learner will identify scan tool and most recent version of software.
<b>O5</b> Maintain fuel injection systems	The learner will perform fuel injection tests and measurements for diagnostic purposes.

## Appendix C: Previous Contributors

**The Motorcycle & Power Equipment Technician Program Outline (2011) was prepared with the advice and direction of an industry steering committee convened initially by the Automotive Training Standards Organization. Members included:**

- Curtis Mackie Western Power Sports, Service Manager
- Brad Hartwig (M.Ed.) BCIT Instructor
- Dale Popp School District #23 Central Okanagan Instructor
- Danny Kelly Power Source Canada, Business Manager
- Edward Sweet Essential Motorcycle Services, Owner
- Gary Harrison Surfwood Supply, Owner/Manager
- Gordon Hill Fraser Valley Yamaha, Owner/Manager/technician
- J.P. Beaudreault G.A. Check Point Yamaha, Technician
- Jeff Mica BCIT Instructor
- Kevin Connor Yamaha Motor Canada Ltd, Technical Trainer
- Kimberly Reid Trev Deeley Harley Davidson, Service Manager
- Larry Ling Hole Shot Honda, Service Manager
- Marcie Ladubec Orca Bay Suzuki, Technician
- Mike Charbula BCIT Instructor
- Orlando Banman Power Source Canada, Technical Advisor
- Patty Davin The Repair Man, Owner/Manager
- Rome Saratan Celtic Distributors Ltd., Manager
- Sarah vanderGracht Essential Motorcycle Services, Service Advisor
- Sean Thompson Honda Canada, Regional Manager
- Simon Ellock Suzuki Canada Inc., Instructor/trainer
- Steve Cazalet Magneto Sales, Regional Manager
- Steve Wesea Honda Canada, Instructor/trainer
- Terry Robbins Fraser Valley Equipment Ltd., Owner/manager
- Travis Baker Denco Cycle, Owner/technician

**Industry Subject Matter Experts retained to assist in the development of the 2011 Program Outline content:**

- Curtis Mackie Western Power Sports, Service Manager
- Edward Sweet Essential Motorcycle Services, Owner/technician
- Gary Harrison Surfwood Supply, Owner/Manager
- Gordon Hill Fraser Valley Yamaha, Owner/Manager/technician
- Jeff Mica BCIT Instructor
- Kimberly Reid Trev Deeley Harley Davidson, Service Manager
- Larry Ling Hole Shot Honda, Service Manager
- Marcie Ladubec Orca Bay Suzuki, Technician
- Orlando Banman Power Source Canada, Technical Advisor
- Sarah vanderGracht Essential Motorcycle Services, Service Advisor
- Sean Thompson Honda Canada, Regional Manager
- Terry Robbins Fraser Valley Equipment Ltd., Owner/manager

**Industry Subject Matter Experts retained as outline reviewers:**

- Jeff Mica BCIT Instructor
- Marcie Ladubec Orca Bay Suzuki Technician
- Orlando Banman Power Source Canada, Technical Advisor
