**Section 1
INTRODUCTION
Plumber**

Foreword

The revised Plumber Program Outline is intended as a guide for instructors, apprentices, and employers of apprentices as well as for the use of industry organizations, regulatory bodies, and provincial and federal governments. It reflects updated standards based on the new Plumber Red Seal Occupational Standard (2016) and British Columbia industry and instructor subject matter experts.

Practical instruction by demonstration and student participation should be integrated with classroom sessions. Safe working practices, even though not always specified in each operation or topic, are an implied part of the program and should be stressed throughout the apprenticeship.

The Program Outline includes a list of recommended reference textbooks that are available to support the learning objectives and the minimum shop requirements needed to support instruction.

Each competency is to be evaluated through the use of written examination in which the learner must achieve a minimum of 70% in order to receive a passing grade for that competency. The types of questions used on these exams must reflect the cognitive level indicated by the learning objectives and the learning tasks listed in the related competencies.

Achievement Criteria are included for those competencies that require a practical component. The intent of including Achievement Criteria in the program outline is to ensure consistency in training across the many training institutions in British Columbia. Their purpose is to reinforce the theory and to provide a mechanism for evaluation of the learner's ability to apply the theory to practice. It is important that these performances be observable and measureable and that they reflect the skills spelled out in the competency as those required of a competent journey person. The conditions under which these performances will be observed and measured must be clear to the learner as well as the criteria by which the learner will be evaluated. The learner must also be given the level of expectation of success.

The performance spelled out in the Achievement Criteria is a suggested performance and is not meant to stifle flexibility of delivery. Training providers are welcome to substitute other practical performances that measure similar skills and attainment of the competency. Multiple performances may also be used to replace individual performances where appropriate.

SAFETY ADVISORY

Be advised that references to the WorkSafeBC safety regulations contained within these materials do not/may not reflect the most recent Occupational Health and Safety Regulation (the current Standards and Regulation in BC can be obtained on the following website: <http://www.worksafebc.com>). Please note that it is always the responsibility of any person using these materials to inform him/herself about the Occupational Health and Safety Regulation pertaining to his/her work.

Acknowledgements

The Occupational Analysis Chart (OAC) was prepared with the advice and direction of industry subject matter experts convened by SkilledTradesBC. Members include:

- Brad Heidman, UA Piping Industry College of BC
- David Dudska, Omega Mechanical
- Johnny Holm, Blue Mountain Services
- Paul Bach, PJB Mechanical
- Patrick Waunch, Rambow Mechanical
- Ray Thibault, Merit Mechanical

Industry and training provider Subject Matter Experts retained to assist in the development of Program Outline content:

- Andrew Henderson, Pure Plumbing
- Dave Sewell, College of New Caledonia
- Ken Ford, Plumbing and Gas Inspector, City of Burnaby (Retired)
- Marty Old, Marty Old Consulting
- Mick Bryant, BC Institute of Technology

Facilitators:

- Angela Caughy
- Farrell Zecchel

SkilledTradesBC would like to acknowledge the dedication and hard work of all the industry and training provider representatives appointed to identify the training requirements of the Plumber occupation.

How to Use this Document

This Program Outline has been developed for the use of individuals from several different audiences. The table below describes how each section can be used by each intended audience.

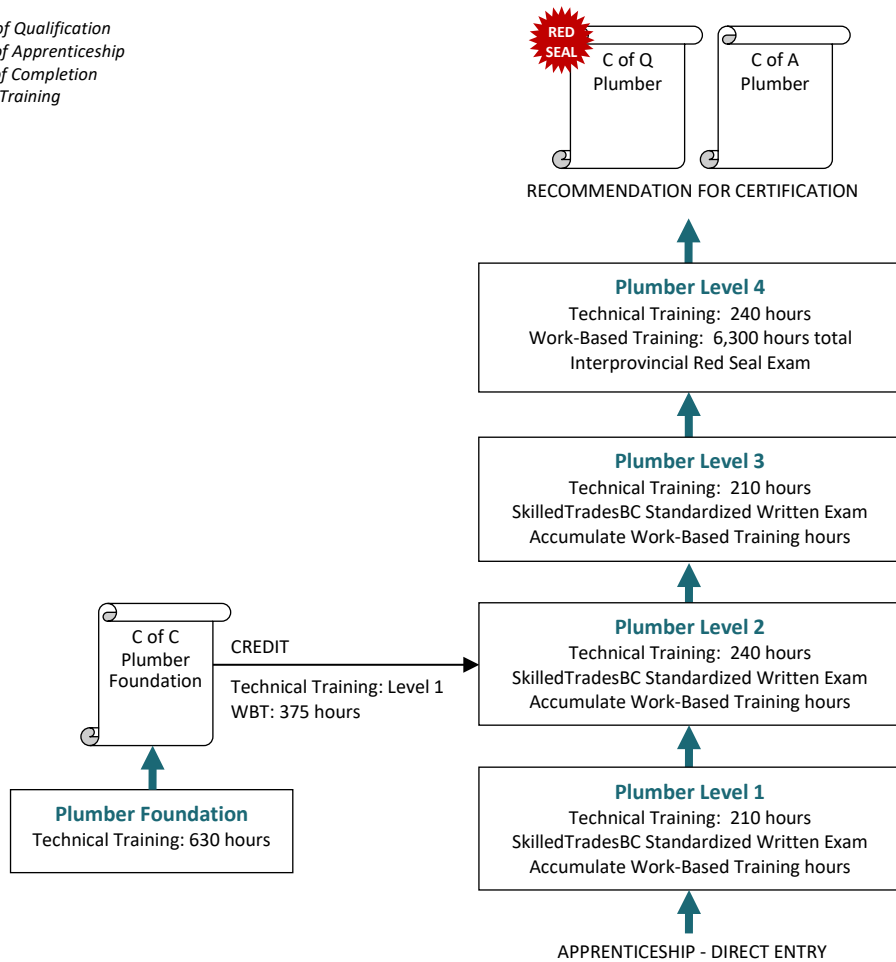

Section	Training Providers	Employers/ Sponsors	Apprentices	Challengers
Program Credentialing Model	Communicate program length and structure, and all pathways to completion	Understand the length and structure of the program	Understand the length and structure of the program, and pathway to completion	Understand challenger pathway to Certificate of Qualification
OAC	Communicate the competencies that industry has defined as representing the scope of the occupation	Understand the competencies that an apprentice is expected to demonstrate in order to achieve certification	View the competencies they will achieve as a result of program completion	Understand the competencies they must demonstrate in order to challenge the program
Training Topics and Suggested Time Allocation	Shows proportionate representation of general areas of competency (GACs) at each program level, the suggested proportion of time spent on each GAC, and percentage of time spent on theory versus practical application	Understand the scope of competencies covered in the technical training, the suggested proportion of time spent on each GAC, and the percentage of that time spent on theory versus practical application	Understand the scope of competencies covered in the technical training, the suggested proportion of time spent on each GAC, and the percentage of that time spent on theory versus practical application	Understand the relative weightings of various competencies of the occupation on which assessment is based
Program Content	Defines the objectives, learning tasks, high level content that must be covered for each competency, as well as defining observable, measurable achievement criteria for objectives with a practical component	Identifies detailed program content and performance expectations for competencies with a practical component; may be used as a checklist prior to signing a recommendation for certification (RFC) for an apprentice	Provides detailed information on program content and performance expectations for demonstrating competency	Allows individual to check program content areas against their own knowledge and performance expectations against their own skill levels
Training Provider Standards	Defines the facility requirements, tools and equipment, reference materials (if any) and instructor requirements for the program	Identifies the tools and equipment an apprentice is expected to have access to; which are supplied by the training provider and which the student is expected to own	Provides information on the training facility, tools and equipment provided by the school and the student, reference materials they may be expected to acquire, and minimum qualification levels of program instructors	Identifies the tools and equipment a tradesperson is expected to be competent in using or operating; which may be used or provided in a practical assessment

Section	Training Providers	Employers/ Sponsors	Apprentices	Challengers
Appendix – Glossary of Acronyms			Defines program specific acronyms

PROGRAM OVERVIEW
Plumber

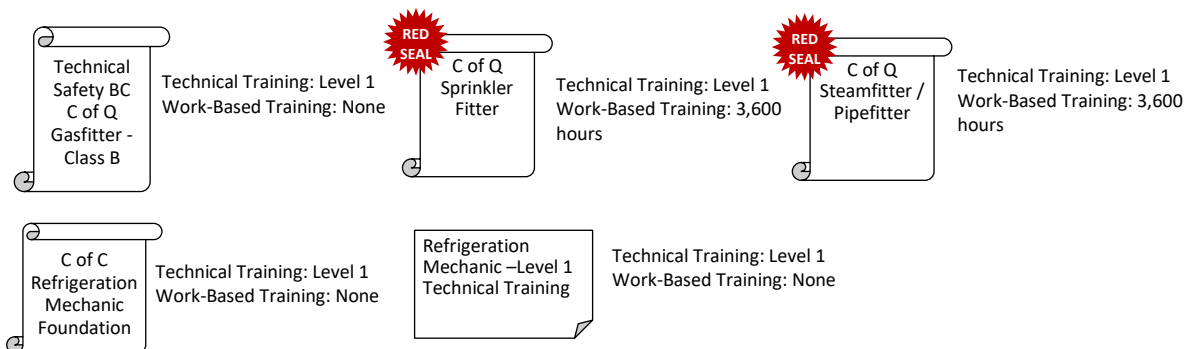

Program Credentialing Model

C of Q = Certificate of Qualification
 C of A = Certificate of Apprenticeship
 C of C = Certificate of Completion
 WBT = Work-Based Training

CROSS-PROGRAM CREDITS

Individuals who hold the credentials listed below are entitled to receive partial credit toward the completion requirements of this program

Occupational Analysis Chart

PLUMBER

Occupation Description: Plumbers install, repair and maintain plumbing fixtures and systems such as water, hydronic, drain, waste and vent (DWV), low pressure steam, chemical and irrigation. They also install specialized systems such as medical gas, process piping, compressed air, water conditioners, fuel piping, sewage and water treatment, and storage and flow equipment. Plumbers interpret drawings, refer to layouts of existing services, and review applicable codes and specifications to determine work details and procedures. They locate and mark positions for fixtures, pipe connections and sleeves, and cut openings to accommodate pipe and fittings.

Regulations concerning the planning, installation, maintenance and inspection of sewage treatment systems may vary by jurisdiction. Additional certification may be required in some jurisdictions to allow plumbers to plan and perform work on these systems.

For information regarding BC regulations, please refer to [Sewerage System Regulation](#)

PERFORM SAFETY RELATED FUNCTIONS A	Maintains Safe Work Environment A1 1	Use Personal Protective Equipment (PPE) and Safety Equipment A2 1	Perform Lock-Out and Tag-Out Procedures A3 1	Practice Fire Prevention A4 1

Plumber

Level 1 Plumber

Line (GAC): A PERFORM SAFETY RELATED FUNCTIONS
Competency: A1 Maintain Safe Work Environment

Objectives

To be competent in this area, the individual must be able to:

- Manage workplace hazards.
- Use WHMIS.

LEARNING TASKS

1. Identify workplace hazards

CONTENT

- Short term hazards
 - Confined space
 - Elevations
 - Ladders
 - Work platforms
 - Electrical
 - Compressed gas
 - Explosive material
 - Gas
 - Dust
 - Air quality
 - Carbon monoxide limits
 - Dust
 - Asbestos
 - Excavations
 - Working around heavy equipment
 - Sharp objects
 - Lifting
 - Correct lifting posture
 - Discretion of lifter
 - Personal apparel
 - Clothing
 - Hair and beards
 - Jewelry
 - Safe attitude
 - Housekeeping
 - Horseplay
 - Respect for others' safety
 - Constant awareness of surroundings
- Long term hazards
 - Respiratory disease
 - Repetitive strain injuries
 - Excessive noise

LEARNING TASKS

CONTENT

- | | |
|--|--|
| <p>2. Describe safety hazards when working at elevations</p> <p>3. Describe safety precautions when working at elevations</p> <p>4. Manage workplace hazards</p> | <ul style="list-style-type: none"> ○ Chemical exposure ● Stressed cables <ul style="list-style-type: none"> ○ Short term ○ Long term ○ Rigging ○ Post-tension ● Floor openings ● Weather <ul style="list-style-type: none"> ○ Wind ○ Snow ○ Lightning ○ Rain ● Access equipment ● Fall restraint <ul style="list-style-type: none"> ○ Guard rails ○ Safety lines ● Fall arrest ● Personal Protective Equipment (PPE) ● Workplace Hazard Materials Identification System (WHMIS) <ul style="list-style-type: none"> ○ Purpose ○ Material Safety Data Sheets (MSDS) ○ Labels ○ Symbols ○ Regulations ● Transportation of Dangerous Goods (TDG) ● Occupational Health and Safety (OHS) regulation <ul style="list-style-type: none"> ○ Rights and responsibilities ○ Inspections ○ General conditions ● WorkSafeBC standards <ul style="list-style-type: none"> ○ Emergency shutoffs ● Chemical hazard response <ul style="list-style-type: none"> ○ Eyewash facilities ○ Emergency shower ● Evacuation plan <ul style="list-style-type: none"> ○ Marshalling/mustering areas ○ Emergency exits ○ Emergency contact/phone numbers |
|--|--|

LEARNING TASKS

5. Describe how site specific safety policies are established

CONTENT

- Standards, acts and regulations
- Hazard assessment
 - Safety policy
 - Site conditions
- Types of meetings
 - Tool box
 - Safety committee

Achievement Criteria (Workplace)

Performance	The learner is aware of WHMIS and that it is a required certification.
Conditions	To be assessed in the workplace.
Criteria	Tasks must be performed within specifications and time frames acceptable to industry.

Line (GAC): A **PERFORM SAFETY RELATED FUNCTIONS**
Competency: A2 **Use Personal Protective Equipment (PPE) and Safety Equipment**

Objectives

To be competent in this area, the individual must be able to:

- Use and maintain Personal Protective Equipment (PPE) and safety equipment.

LEARNING TASKS

1. Describe Personal Protective Equipment (PPE)

2. Describe safety equipment

3. Use Personal Protective Equipment (PPE)

CONTENT

- Safety footwear
- Eye protection
- Ear protection
- Head protection
- Respiratory protection
 - Positive pressure
 - Negative pressure
- Clothing
 - High visibility workwear
 - Sun protection factor (SPF)
 - Gloves
 - Fall protection
- Types
 - Fire extinguishers
 - First-aid
 - Ventilation
 - Screens
- Procedures
- Storage
- Limitations
- Standards, acts and regulations
- Purpose
- Selection
- Operating procedures
- Training requirements
 - WorkSafeBC requirements
 - Job site requirements
- Inspection
- Maintenance
- Storage

Line (GAC): A PERFORM SAFETY RELATED FUNCTIONS

Competency: A3 Perform Lock-Out and Tag-Out Procedures

Objectives

To be competent in this area, the individual must be able to:

- Identify and use lock-out and tag-out procedures.

LEARNING TASKS

1. Identify energy sources

2. Describe lock-out and tag-out

3. Use lock-out and tag-out procedures

CONTENT

- Electricity
- Pressure
- Kinetic
- Understanding of system operation
- Components requiring lock-out
- Situations where lock-out is required
- Lock-out equipment
 - Locks
 - Tags
 - Identification requirements
 - Chains
 - Support blocks
 - Blind flanges
 - Spades
 - Spectacle blinds
- Procedures
- Zero energy state
 - Disconnect
 - Depressurize
 - Isolate
- Lock-out
- Tag-out
- Test

Achievement Criteria

Performance The learner will be able to perform electrical lock-out with verification.

Conditions To be assessed during technical training.
The learner will be given:

- Lock-out equipment
- Isolation devices
- Multi-meter
- Lock and key
- Tag
- Personal Protective Equipment (PPE)

Criteria The learner will be evaluated on:

- Safety
- Completion and verification of electrical lock-out procedures

Line (GAC): A PERFORM SAFETY RELATED FUNCTIONS

Competency: A4 Practice Fire Prevention

Objectives

To be competent in this area, the individual must be able to:

- Identify classes of fires.
- Select fire extinguishers for class of fire and relevant condition.

LEARNING TASKS

CONTENT

- | | |
|--|--|
| <p>1. Describe the conditions necessary to support a fire</p> | <ul style="list-style-type: none"> • Air • Fuel • Heat |
| <p>2. Describe the classes of fires according to the materials being burned</p> | <ul style="list-style-type: none"> • Class A • Class B • Class C • Class D |
| <p>3. Apply preventative fire safety precautions</p> | <ul style="list-style-type: none"> • Symbols and colours • Hot work permit (site specific) • Handling and storage of flammable materials • Symbols • Fuels <ul style="list-style-type: none"> ○ Diesel ○ Gasoline ○ Propane ○ Natural Gas • Ventilation, including purging • Lubricants • Oily rags • Combustible metals • Aerosols • Fire extinguisher <ul style="list-style-type: none"> ○ Expiry date ○ Fill level |
| <p>4. Describe the considerations and steps to be taken prior to fighting a fire</p> | <ul style="list-style-type: none"> • Warning others and fire department • Evacuation of others • Fire contained and not spreading • Personal method of egress • Training |
| <p>5. Describe the procedure for using a fire extinguisher</p> | <ul style="list-style-type: none"> • Extinguisher selection • P.A.S.S. <ul style="list-style-type: none"> ○ Pull ○ Aim ○ Squeeze ○ Sweep |

Line (GAC): B USE TOOLS AND EQUIPMENT
Competency: B1 Use Common Tools and Equipment

Objectives

To be competent in this area, the individual must be able to:

- Use hand, portable and stationary power tools.
- Use measuring and leveling equipment.
- Inspect and maintain tools and equipment.
- Use leveling equipment to establish elevations.

LEARNING TASKS

1. Describe hand tools

2. Describe portable power tools

CONTENT

- Wrenches
- Pliers
- Screwdrivers
- Cutting tools
- Measuring and marking tools
- Bracing and securing tools
- Hammering tools
- Leveling tools
 - Pitch levels
 - Builder’s level
 - Laser levels
 - Plumb bob
- Chiseling tools
- Squaring tools
- Threading tools
- Flaring and swaging tools
- Tubing benders
- Expanding and crimping tools
- Types
 - Electric
 - Pneumatic
- Cutting tools
- Grinding and abrasive tools
- Threading tools
- Drilling, boring and coring tools
- Grooving tools
- Specialty tools
 - Fusion tools
 - Pressing tool (Pro press™)
 - Extruded T (T-Drill™)
- Accessories

LEARNING TASKS

- 3. Describe stationary power tools

- 4. Describe pressure measuring tools

- 5. Use hand tools and equipment

- 6. Use leveling equipment to establish elevations

CONTENT

- Cutting tools
- Grinding and abrasive tools
- Threading tools
- Drilling and boring tools
- Grooving tools
- Specialty tools
- Accessories

- Manometers
 - Types
 - Filling
 - Fluids
- Mechanical gauges
 - Analog
 - Digital
 - Standard
 - Compound

- Types
- Parts
- Applications
- Procedures
- Safety
- Adjustment
- Inspection
- Maintenance
- Storage

- Grade and pitch calculations
- Procedures
- Manufacturers' specifications
- Inspection
- Adjustment
- Maintenance
- Storage

Achievement Criteria

- Performance The learner will be able to establish 10 sights.
- Conditions To be assessed during technical training.
The learner will be given:
- Sights
 - Specifications
 - Leveling equipment
- Criteria The learner will be evaluated on:
- Accuracy

Line (GAC): B USE TOOLS AND EQUIPMENT
Competency: B2 Use Access Equipment

Objectives

To be competent in this area, the individual must be able to:

- Select and use ladders and elevated platforms.

LEARNING TASKS

1. Describe ladders and elevated platforms

CONTENT

- Types
 - Ladders
 - Platforms
 - Lifts
 - Aerial Work Platform (AWP)
- Applications
- Safety
 - Fall arrest equipment
 - Fall restraint equipment
 - Hazard recognition
- Standards, acts and regulations
- Site certification requirements
 - Equipment certifications
 - Employer responsibilities
- Selection
- Operating procedures
- Limitations
- Securing
- Inspection
- Maintenance
- Storage

2. Use ladders and elevated platforms

Line (GAC): B USE TOOLS AND EQUIPMENT
Competency: B3 Use Rigging, Hoisting, Lifting and Positioning Equipment

Objectives

To be competent in this area, the individual must be able to:

- Use hoisting, lifting and rigging equipment

LEARNING TASKS

CONTENT

| 7. | Use hoisting, lifting and rigging equipment | <ul style="list-style-type: none"> • Safety • Working load limit (WLL) • Lift plan • Communication/hand signals • Securing of loads <ul style="list-style-type: none"> ○ Pre lift ○ Post lift • Inspection • Maintenance • Storage • Disposal |

Achievement Criteria

- | | |
|-------------|---|
| Performance | <p>The learner will be able to:</p> <ul style="list-style-type: none"> • Perform a manual lift. • Identify and use the proper type of hoisting equipment to perform a lift. |
| Conditions | <p>To be assessed during technical training.
The learner will be given:</p> |

- Tools and equipment
 - Pre-calculated lift plan
- Criteria **Manual lift** - the learner will be evaluated on:
- Personal Protective Equipment (PPE) selection
 - Correct body position
 - Centre of gravity
 - Block and store
- Hoisted lift** - the learner will be evaluated on:
- Visual check of lifting equipment
 - Checking equipment capacity
 - Attaching the correct rigging configuration
 - Attaching load correctly to the lifting hook
 - Centering lifting hook above load before lifting
 - Hoisting load correctly
 - Lowering load correctly
 - Securing load prior to rigging removal
 - Returning rigging to designated storage place
 - Using all equipment in a safe manner
 - Following all site safety rules

Line (GAC): B USE TOOLS AND EQUIPMENT
Competency: B5 Use Soldering and Brazing Equipment

Objectives

To be competent in this area, the individual must be able to:

- Use air-fuel and oxy-fuel equipment to braze and solder.

LEARNING TASKS

CONTENT

- | | |
|---|--|
| <p>1. Describe the brazing process</p> | <ul style="list-style-type: none"> • Principles • Applications • Filler alloys • Equipment • Safety requirements <ul style="list-style-type: none"> ○ Fire protection equipment ○ Ventilation |
| <p>2. Describe the procedures for braze welding</p> | <ul style="list-style-type: none"> • Joint preparation and design • Flux selection • Flame for brazing • Purging |
| <p>3. Describe air-fuel and oxy-fuel equipment</p> | <ul style="list-style-type: none"> • Cylinders • Regulators • Gauges • Spark arrestors • Torches • Inspection • Maintenance • Storage |
| <p>4. Use air-fuel and oxy-fuel equipment to braze and solder</p> | <ul style="list-style-type: none"> • Safety • Flammable material recognition • Applications • Procedures <ul style="list-style-type: none"> ○ Setup ○ Take down ○ Tip selection ○ Alloy selection ○ Flux selection ○ Flux removal |

Achievement Criteria

Performance The learner will be able to braze and solder.
Conditions To be assessed during technical training.

The learner will be given:

- Materials
- Tools and equipment
- Specifications/drawings

Criteria

The learner will be evaluated on:

- Set-up/shut down
- Technique
- Accuracy
- Penetration
- Appearance
- Pressure test
- Bend test

Line (GAC): B USE TOOLS AND EQUIPMENT

Competency: B6 Use Oxy-Fuel Cutting Equipment

Objectives

To be competent in this area, the individual must be able to:

- Use Oxy-Fuel cutting equipment.

LEARNING TASKS

1. Describe Oxy-Fuel cutting equipment and applications

2. Describe fuel gas precautions and procedures

3. Use Oxy-Fuel cutting equipment

CONTENT

- Regulators
- Flashback arrestors
- Hoses
- Torches
- Torch attachments
- Tips
- Inspection
- Maintenance
- Storage
- Characteristics
- Delivery systems
- Cylinder handling and storage

- Fire prevention equipment
- Hot work permit
- Set-up procedures
 - Leak test
- Safe operating practices
 - Personal Protective Equipment (PPE)
 - Flashback prevention
 - Ventilation
- Flame temperatures
- Techniques
- Delivery system removal and storage

Achievement Criteria

Performance The learner will be able to cut a pipe bevel with Oxy-Fuel equipment

Conditions To be assessed during technical training.
The learner will be given:

- Materials
- Tools and equipment
- Specifications/drawings

Criteria The learner will be evaluated on:

- Set-up/shut down
- Technique
- Accuracy
- Appearance

Line (GAC): B USE TOOLS AND EQUIPMENT
Competency: B7 Use Welding Equipment

Objectives

To be competent in this area, the individual must be able to:

- Identify common welding types, positions, joints, symbols and equipment.
- Use a grinder.

LEARNING TASKS

- Municipal bylaws
 - Permits
- Health Act
- Safety Standards Act
- Leadership in Energy and Environmental Design (LEED)
- American Society of Mechanical Engineers (ASME)

Line (GAC): D PREPARE PIPING AND COMPONENTS
Competency: D1 Prepare Pipe

Objectives

To be competent in this area, the individual must be able to:

- Describe piping and tubing.
- Prepare pipe for jointing and installation.

LEARNING TASKS

1. Describe piping and tubing

CONTENT

- Codes and regulations
 - AHJ
- Manufacturers' specifications
- Schedules/Standard Dimension Ratio (SDR)
- Characteristics
- Types
 - Steel
 - Carbon
 - Stainless
 - Galvanized
 - Copper
 - Plastic
 - Thermoplastic
 - Thermoset
 - Cast iron
 - Aluminum
 - Asbestos-cement
 - Application specific
 - Pyrex
 - Fibre-glass
 - Polypropylene
 - Duriron

2. Describe methods of pipe support

- Codes and regulations
 - AHJ
- Manufacturers' specifications
- Tools and equipment
- Types
 - Hangers
 - Supports
 - Seismic
 - Anchors
 - Guides
 - Slide plates
 - Bedding media

LEARNING TASKS

CONTENT

3. Describe methods of protecting piping and tubing

- Compatibility with piping
- Size
- Spacing
- Elevation
- Fasteners
 - Beam clamps
 - Drop-in anchors
 - Inserts
 - Draw bolts
 - Toggle bolts
- Structural restrictions
- Insulation thickness
- Codes and regulations
 - AHJ
- Manufacturers' specifications
- Water treatment
 - Softener
 - pH
 - Iron filters
- Frost protection
 - Insulation
 - Heat trace
 - Frost boxes
 - Circulating pumps
- Ultraviolet (UV) protection
- Corrosion protection
 - Coatings
 - Tape
 - Cathodic
 - Dielectric
 - Sleeving
- Mechanical damage
 - Protective plates/shield
 - Sleeving
 - Bollards

4. Pre-installation inspection of piping and tubing

- Codes and regulations
 - AHJ
- Manufacturers' specifications
- Applications
- Potential defects
 - Pin holes
 - Cracked fittings

LEARNING TASKS

CONTENT

5. Cut piping and tubing

- Bent ends
- Uneven casting
- Damaged pipe and coatings
- Debris
- Environmental effects
 - Ultraviolet (UV)
 - Thermal effects
 - Soil conditions
- Inspection techniques
 - Visual
 - Threads
 - Groove depth
 - Sounding of cast iron pipe and fittings
 - Tactile
- Interpretation of markings
- Safe work practices
- Codes and regulations
 - AHJ
- Manufacturers' specifications
- Tools and equipment
 - Cutting torch
 - Hacksaw
 - Bandsaw
 - Pipe/tube cutters
 - Reamers
 - File
 - Internal pipe cutters
 - Glass pipe cutters
 - Soil pipe cutters
 - Snap cutters
 - Ratchet cutters
 - Grinder
 - Cutting disks
 - Hammer/chisel
- Calculations
- Inspection
- Safe work practices
- Codes and regulations
 - AHJ
- Manufacturers' specifications
- Terminology

6. Bend piping and tubing

LEARNING TASKS

7. Prepare piping and tubing connections

CONTENT

- Tools and equipment
 - Tube benders
 - Bending springs
- Measurements
 - Angles
 - Offsets
 - Bends
- Inspection
- Safe work practices
- Codes and regulations
 - AHJ
- Manufacturers' specifications
- Tools and equipment
- Measuring
- Cutting burr removal
- Reaming
- Threading
- Sealant
- Priming
- Flaring
- Sanding/filing
- Flux
- Beveling
- Grooving
- Inspection

Line (GAC): **D PREPARE PIPING AND COMPONENTS**
Competency: **D2 Join Tube, Tubing and Pipe**

Objectives

To be competent in this area, the individual must be able to:

- Join piping and tubing.

LEARNING TASKS

1. Describe piping and tubing jointing methods

CONTENT

- Safe work practices
- Press-fit
- Soldered
- Brazed
- Grooved
- Flanged
- Compression
 - Ferule
 - Flared
 - CSST
- Swaged
- Corporation
- Push-fit
- Welded
 - Solvent
 - Fused
- Threaded
- Cut-grooved
- Roll-grooved
- Crimped
- Expanded
- Codes and regulations
 - AHJ
- Manufacturers' specifications
- Fittings
- Accessories
- Tools and equipment
- Assembly

2. Join piping and tubing

Line (GAC): **D** **PREPARE PIPING AND COMPONENTS**
Competency: **D3** **Install Pipe**

Objectives

To be competent in this area, the individual must be able to:

- Install carbon steel piping.

LEARNING TASKS

1. Describe the installation of piping and tubing

2. Install carbon steel piping

CONTENT

- Codes and regulations
 - AHJ
- Manufacturers' specifications
- Safe work practices
- Selection for application
- Tools and equipment
- Layout
- Codes and regulations
 - AHJ
- Manufacturers' specifications
- Selection
 - Application
- Tools and equipment
- Piping supports
- Structure penetration

Achievement Criteria (to be combined with D1, D2 & D5)

Performance	The learner will be able to prepare, join and install piping of the following types: <ul style="list-style-type: none"> • Plastic • Copper • Carbon steel
Conditions	To be assessed during technical training. The learner will be given: <ul style="list-style-type: none"> • Drawings and specifications • Tools and equipment • Materials
Criteria	The learner will be evaluated on: <ul style="list-style-type: none"> • Accuracy • Neatness

Line (GAC): D **PREPARE PIPING AND COMPONENTS**
Competency: D4 **Install Valves**

Objectives

To be competent in this area, the individual must be able to:

- Describe valve types.
- Describe the installation of valves.

LEARNING TASKS

1. Describe valve types

CONTENT

- Codes and regulations
 - AHJ
- Manufacturers' specifications
- Seating design
- Types
 - Butterfly
 - Plug
 - Ball
 - Gate
 - Globe
 - Needle
 - Check
 - Pressure Reducing (PRV)
 - Mechanical Safety Devices
 - Pressure Relief
 - Temperature and Pressure Relief
 - Pop Safety (PSV)
 - Safety Relief (SRV)
 - Vacuum relief
 - Ratings

2. Describe the installation of valves

- Application
- Materials
- Limitations
 - Temperature
 - Pressure
- Codes and regulations
 - AHJ
- Manufacturers' specifications
- Selection
 - Applications
 - Pressure limitations
- Orientation
- Relative placement

|----------|---|

Line (GAC): D **PREPARE PIPING AND COMPONENTS**
Competency: D6 **Penetrate Structures**

Objectives

To be competent in this area, the individual must be able to:

- Describe structure penetration.

LEARNING TASKS

1. Describe factors affecting penetrations in structures

CONTENT

- Codes and regulations
 - AHJ
- Manufacturers' specifications
- Structural integrity
- Fire separation
- Interference with other building components and systems
- Hidden components behind the surface
- Electrical wiring
- Reinforcing bars
- Piping
- Post tension cables
- Sleeve installation
 - Fabrication
 - Timing (canning)
 - Location
 - Sizing
 - Fastening
- Sealing
 - Fire stopping
 - Water-proofing
 - Isolating groundwater
 - Protecting pipe
 - Preventing oxidation
- Protection during concrete pour
- Codes and regulations
 - AHJ
- Manufacturers' specifications
- Fire stopping
 - Doughnut type
 - Gasket type
 - Caulking
 - Mineral wool
- Fire rating requirements
- Required gaps

2. Describe methods of structure penetration

LEARNING TASKS

CONTENT

- Fastening or wrapping fire stopping to pipes
- Sealing of vertical and horizontal penetrations
- Selection of sealants according to specifications

Line (GAC): F USE COMMUNICATION TECHNIQUES
Competency: F1 Use Communication Techniques

Objectives

To be competent in this area, the individual must be able to:

- Describe effective communication practices.

LEARNING TASKS

1. Describe effective communication practices

CONTENT

- Liability
 - Sources of information
 - Gas Act and Safety Regulations
 - AHJ
 - Codes and regulations
 - Company requirements
 - Architect
 - Engineers
 - Manufacturers requirements
 - Fire Department per jurisdiction
 - Health department
 - WorkSafeBC
 - Technical Safety BC (*formerly BC Safety Authority*)
 - Responsibilities
 - Employer
 - Apprentice
 - Client/end-user
 - Installer/contractor
 - Manufacturer
 - Testing agencies
- Verbal
- Non-verbal
 - Body language
 - Signals
- Active listening
 - Hearing
 - Interpreting
 - Reflecting
 - Responding
 - Paraphrasing
- Learning styles
 - See
 - Hear

LEARNING TASKS

- Try
- Workplace responsibilities
 - Personal
 - Attitude
 - Harassment
 - Discrimination
 - Supervisor
 - Human Resources (HR)
- Toolbox meetings
 - Field Level Risk Assessment (FLRA)

Line (GAC): **O APPLY ELECTRICAL CONCEPTS**
Competency: **O1 Use the Principles of Electricity**

Objectives

To be competent in this area, the individual must be able to:

- Describe electrical concepts.
- Solve simple problems using Ohm’s and Kirchhoff’s Laws.
- Describe single phase and three phase power supplies.
- Identify transformers.

LEARNING TASKS

1. Describe the fundamentals of electricity

2. Describe electrical circuits

CONTENT

- Basic principles
 - Atomic theory
 - Electron flow
 - Conductors - insulators
 - Kinds of electricity
 - AC current
 - DC current
 - Static electricity
 - Cathodic protection
 - Anode
 - Cathode
- Properties of wire
 - Resistance
 - Calculating resistance
- Codes and regulations
 - Effect of temperature
 - Types of wires and cables
- Electrical sources
 - AC
 - Single phase
 - Three phase
 - DC
- Parts of a circuit
 - Source
 - Switch
 - Load
- DC circuits and measurements
 - Ohm’s Law
 - Measurement of voltage and amperage
 - Resistors in parallel and series
 - Power and energy
 - Closing and opening DC

Line (GAC): C **PERFORM ROUTINE TRADE ACTIVITIES**
Competency: C2 **Interpret Drawings and Specifications**

Objectives

To be competent in this area, the individual must be able to:

- Identify types of drawings.
- Create a drainage, waste and vent (DWV) isometric projection to code requirements.
- Plan residential take-offs.

LEARNING TASKS

1. Identify types of drawings

CONTENT

- Types
 - Architectural
 - Structural
 - Mechanical
 - Electrical
 - Shop
- Specification sheets
- Parts
 - Plan
 - Plot
 - Foundation
 - Floor
 - Elevation
 - Sections
 - Details
 - Title block
 - Revisions
 - Schedules
 - Legends

- Detail required
- Dimensioning
- Relevant information
- Lettering
- Line type

2. Create isometric drawings of a piping system

LEARNING TASKS

3. Plan residential take-offs

CONTENT

- Pipe sizing
- Terminology
- Lists, calculations and formulas
- Site considerations

Achievement Criteria

Performance The learner will be able to:

- Create a drainage, waste and vent (DWV) isometric projection to code requirements.
- Plan a residential take-off.

Conditions To be assessed during technical training.

The learner will be given:

- Floor plan and specifications
- Drawing equipment

Criteria The learner will be evaluated on:

- Accuracy
- Neatness

Line (GAC): C PERFORM ROUTINE TRADE ACTIVITIES
Competency: C3 Use Codes, Regulations and Standards

Objectives

To be competent in this area, the individual must be able to:

- Interpret codes and standards for the National Plumbing Code (NPC).
- Interpret codes and standards for the B149.1 Gas Code series.

LEARNING TASKS

CONTENT

<p>1. Describe the application of codes and standards</p>	<ul style="list-style-type: none"> • Design • Planning • Installation • Maintenance • Decommissioning
<p>2. Identify environmental agencies associated with sewage disposal</p>	<ul style="list-style-type: none"> • BC Health Department • WorkSafeBC • BC Water and Waste Association (BCWWA) • BC Onsite Sewage Association (BCOSSA) • Authority having jurisdiction (AHJ)

<p>4. Interpret the National Plumbing Code (NPC)</p>	<ul style="list-style-type: none"> • Scope • Reference publications • Definitions • General • Appendices
<p>5. Describe the B149 Gas Code series</p>	<ul style="list-style-type: none"> • B149.1, B149.2, B149.3 • Layout • Sections • Contents • Index • Annexes

LEARNING TASKS

CONTENT

6. Interpret Sections of the B149.1 Gas Code

- Tables
- Definitions
- Scope
- Revisions
- Scope
- Reference publications
- Definitions
- General
- Piping and tubing systems, hose, and fittings
- Annexes A & B

Achievement Criteria

Performance The learner will be able to interpret codes and standards for sizing exercises.

Conditions To be assessed during technical training.
The learner will be given:

- Codes
- Standards
- Projects

Criteria The learner will be evaluated on:

- Accuracy
- Code compliance

Line (GAC): C PERFORM ROUTINE TRADE ACTIVITIES
Competency: C5 Perform Piping System Layout

Objectives

To be competent in this area, the individual must be able to:

- Layout piping systems.

LEARNING TASKS

1. Describe piping system layout

CONTENT

- Safe work hazards
- Codes and regulations
 - AHJ
- Manufacturers' specifications
- Routing
- Penetrations
- Site conditions
- Materials
- Components
- Supports
- Tools and equipment
- Interference with other systems
 - Electrical
 - Ventilation
 - Sprinkler
- Measure
- Calculate
- Tools and equipment

2. Layout piping systems

Achievement Criteria

Performance The learner will be able to layout a piping system.

Conditions To be assessed during technical training.
 The learner will be given:

- Drawing and specifications
- Tools and equipment

Criteria The learner will be evaluated on:

- Accuracy
- Neatness

Line (GAC): **H** **INSTALL DRAINAGE, WASTE AND VENT (DWV) SYSTEMS**
Competency: **H1** **Install Sanitary Drainage Systems**

Objectives

To be competent in this area, the individual must be able to:

- Interpret the National Plumbing Code (NPC) for DWV systems.
- Plan the layout of a commercial or institutional DWV system.
- Install piping and components for interior DWV systems.

LEARNING TASKS

CONTENT

- | | |
|--|---|
| <p>1. Describe drainage, waste and vent (DWV) systems</p> | <ul style="list-style-type: none"> • Terminology <ul style="list-style-type: none"> ○ National Plumbing Code (NPC) • Parts of a drainage, waste and vent (DWV) system <ul style="list-style-type: none"> ○ Function ○ Applications ○ Components |

LEARNING TASKS

CONTENT

5. Describe requirements of a trade-waste system

- Inspection
- Sealing of penetrations
- Application
- Interceptors
 - Types
 - Applications
 - Regulations
 - Venting
 - Manufactures specifications
 - AHJ

Achievement Criteria 1

Performance The learner will be able to plan the layout of a commercial or institutional drainage, waste and vent (DWV) system.

Conditions To be assessed during technical training.
The learner will be given:

- Specifications
- Schedule
- Drawings

Criteria The learner will be evaluated on:

- Code complianance
- Efficiency
- Accuracy

Achievement Criteria 2

Performance The learner will be able to install the drain, waste and vent (DWV) for a bathroom group.

Conditions To be assessed during technical training.
The learner will be given:

- Specifications
- Tools and materials

Criteria The learner will be evaluated on:

- Accuracy
- Grade
- Piping support
- Code requirements
- Testing requirements

Line (GAC): H INSTALL DRAINAGE, WASTE AND VENT (DWV) SYSTEMS
Competency: H2 Install Storm Drainage Systems

Objectives

To be competent in this area, the individual must be able to:

- Interpret code requirements for parts of storm drainage systems.
- Plan the layout of a storm drainage system.
- Describe the installation storm drainage systems.

LEARNING TASKS

1. Describe storm drainage systems

2. Interpret code requirements for parts of storm drainage systems

3. Plan the layout of a storm drainage system

4. Describe the installation of storm drainage systems

CONTENT

- Terminology
 - National Plumbing Code (NPC)
- Parts of a storm drainage system
 - Function
 - Applications
 - Components
- Types of piping
- Size
- Grades
- Fittings
 - Orientation
 - Prohibitions
- Traps
- Cleanouts
- Venting
- Hangers and supports
 - Spacing
 - Seismic
- Jointing practices
- Insulation
- Location of structure penetrations
- Routing
- Pipe supports
- Safety
- Tools and equipment
- Determination of grades
- Installation of components
- Location of cleanouts
- Testing
- Inspection

LEARNING TASKS

5. Describe the placement and operation of sumps and catch basins

6. Describe sub-soil drainage systems

7. Describe site retention systems

CONTENT

- Sealing of penetrations
- National Plumbing Code
 - AHJ
- Pumps
- Confined space requirements
- Purpose
- Material
- Perforation orientation
- Backwater valve
- Surge requirements
- Curtain drain
- Backfilling
- Location
- Overflow to municipal
- Green technology

Line (GAC): H INSTALL DRAINAGE, WASTE AND VENT (DWV) SYSTEMS
Competency: H3 Test Sanitary and Storm Drainage Systems

Objectives

To be competent in this area, the individual must be able to:

- Describe the testing of sanitary and storm drainage systems.

LEARNING TASKS

1. Identify code requirements affecting the testing of sanitary and storm drainage systems
2. Describe the testing of sanitary and storm drainage systems

CONTENT

- National Plumbing Code
 - AHJ
- Safety
- Equipment
- Procedure
- Duration
- Inspection
- Documentation

Line (GAC): L **INSTALL HYDRONIC SYSTEMS**
Competency: L1 **Interpret Heating and Cooling Systems**

Objectives

To be competent in this area, the individual must be able to:

- Describe the operation of residential forced air systems.
- Describe the operation of hydronic heating systems.
- Calculate volumetric thermal expansion.
- Describe low pressure steam piping systems.

LEARNING TASKS

1. Describe the operation of residential forced air systems

2. Describe the operation of residential hydronic heating systems

CONTENT

- Purpose
- Components
- Ducting configurations
 - Supply air
 - Return air
 - Zoning
- Controls
- Balancing
- Codes and regulations
 - AHJ
- Purpose
- Volumetric thermal expansion
 - Expansion coefficients
 - Temperature
 - ΔT
 - Volume
- Fluid fundamentals
 - Volumetric coefficient differences
 - Linear and volumetric expansion
 - Viscosity
- Components
 - Valves
 - Mixing
 - Zone
 - Closed loops circulators
 - Gauges and thermometers
 - Heat transfer units
 - Fan coil units
 - Radiators
 - Radiant panels

LEARNING TASKS

CONTENT

- Unit heaters
- Termination heat pumps
- In-floor heating
- Force flow units
- Perimeter radiation
- Expansion tank
- Air separator/eliminator
- Zone headers
- Air vents
- Feed water
- Water treatment
- Backflow preventor
- Piping system configurations
 - Zoning
 - Supply water
 - Return water
 - Balancing
 - High-temperature
 - Low-temperature
 - Mixing
- Process Flow Diagrams (PFD)
- Controls
- Heat transfer units
- Safety considerations
- Design
 - Drawings and specifications
 - Zoning
 - Point of no pressure change
- Pipe sizing
- Heating generating equipment
 - Boilers
 - High mass
 - Low mass
 - Bio-mass
 - Heat pumps
 - Heat exchangers
 - Solar panels
- Cooling generating equipment
 - Cooling towers
 - Heat pumps
 - Fluid coolers
 - Chillers

LEARNING TASKS

CONTENT

- 3. Calculate volumetric thermal expansion

- 4. Describe low pressure steam piping systems

- Dirt elimination devices
- Auxiliary equipment
 - Indirect fired hot water tanks
 - Heat exchangers
 - Make-up tanks
- Controls
- Fluids
 - Water
 - Chemical
 - Brine solutions
- Additives
 - Treatment chemicals
 - Rust inhibitors
 - Glycol
- Protection
 - Piping
 - Components
- Expansion coefficients
- Temperature
 - ΔT
- Volume
- Types
 - Counter flow
 - One-pipe
 - Two-pipe
 - Two-pipe gravity return
 - Sub-atmospheric
- Steam heating systems symbols
- Components

Line (GAC): L **INSTALL HYDRONIC SYSTEMS**
Competency: L2 **Install Piping and Components for Hydronic Systems**

Objectives

To be competent in this area, the individual must be able to:

- Install piping for a hydronic system.

LEARNING TASKS

1. Install piping and components for hydronic systems

CONTENT

- Pipe routing
- High and low points
- Tools and equipment
- Jointing methods
- Grade/pitch
- Supports
- Restraints
- Assembly

Achievement Criteria

Performance The learner will be able to install piping for a hydronic system.

Conditions To be assessed during technical training.
 The learner will be given:

- Drawings and specifications
- Tools and materials

Criteria The learner will be evaluated on:

- Safety
- Accuracy
- Function

Line (GAC): L **INSTALL HYDRONIC SYSTEMS**
Competency: L3 **Install Hydronic Heating and Cooling Generating Systems**

Objectives

To be competent in this area, the individual must be able to:

- Describe the installation of hydronic heat generating systems.
- Describe the installation of hydronic cooling generating systems.

LEARNING TASKS

 - Neutralizer

Line (GAC): P PLAN GAS-FIRED APPLIANCE SYSTEM INSTALLATIONS
Competency: P3 Select Gas-Fired Appliances

Objectives

To be competent in this area, the individual must be able to:

- Describe gas-fired appliances.

LEARNING TASKS

1. Describe gas-fired appliances

CONTENT

- Types
 - Boilers
 - Hot water
 - Steam
 - High mass
 - Low mass
 - Direct fired make-up air heaters
 - Direct vent appliances
 - Decorative appliances
 - Fireplace
 - Fire pit
 - Furnaces
 - Radiant heaters
 - Low intensity
 - High intensity
 - Ranges and/or Commercial cooking equipment
 - Rooftop units
 - Unit heaters
 - Water heaters
 - Tankless
 - Storage type
 - Gas fired refrigerators
- Characteristics
 - Appliance design
 - Direct-fired
 - Indirect-fired
- Applications
- Approval agencies

Level 3 Plumber

Line (GAC): C **PERFORM ROUTINE TRADE ACTIVITIES**
Competency: C2 **Interpret Drawings and Specifications**

Objectives

To be competent in this area, the individual must be able to:

- Design drainage, waste and vent (DWV), water distribution and fuel gas distribution systems.

LEARNING TASKS

CONTENT

- | | |
|--|--|
| <ol style="list-style-type: none"> 1. Design a drainage, waste and vent (DWV) system 2. Design a water distribution system 3.  - Shock arrestors

LEARNING TASKS

CONTENT

- Recirculating lines
- Fire stopping
- Cross connection control valves
- Expansion tanks
- Protection
- Jointing
- Pipe identification

Achievement Criteria

- Performance** The learner will be able to size a commercial potable water service and distribution system using the methods described in the National Plumbing Code (NPC).
- Conditions** To be assessed during technical training.
The learner will be given:
- National Plumbing Code (NPC)
 - Diagram of a potable water service and distribution system.
- Criteria** The learner will be evaluated on:
- Accuracy

Line (GAC): J INSTALL CROSS CONNECTION CONTROL DEVICES AND ASSEMBLIES

Competency: J1 Install and Test Cross Connection Control Devices and Assemblies

Objectives

To be competent in this area, the individual must be able to:

- Describe the installation of cross connection control devices and assemblies.
- Test cross connection control assemblies.

LEARNING TASKS

1. Describe cross connection control

CONTENT

- Hazards
 - Minor, moderate, severe
- Assemblies
 - Reduced pressure backflow preventer assembly (RPBA)
 - Double check valve assembly (DCVA)
 - Pressure Vacuum Breaker Assembly (PVBA)
 - Air gap
- Devices
 - Dual check Valve
 - Dual check Valve Backflow Preventer with Atmospheric Port
 - Dual check Valve Backflow Preventer with Vent
 - Atmospheric Vacuum Breaker
 - Hose Connection Vacuum Breaker
 - Laboratory Faucet Type Vacuum Breaker
- Inspection
- Methods
- Maintenance
 - Calibration
 - Annual verification
- Codes, regulations and permits
 - AHJ
 - NPC, Section 7, Non-Potable Water Systems
- Certification
- Hazard assessment
 - Minor, moderate, severe
- Installation requirements

2. Describe the installation of cross connection control devices and assemblies

LEARNING TASKS

CONTENT

3. Test cross connection control assemblies

- Height
- Location
- Accessibility
- Codes, regulations and permits
 - BCWWA
 - AHJ
 - National Plumbing Code (NPC)
- Tools and equipment
- Connections
- Pressures
- Inspection
- Testing
- Safe work practices
- Types
 - Reduced Pressure Backflow Assembly (RPBA)
 - Double-check Valve Assembly (DCVA)
 - Pressure Vacuum Breaker Assembly (PVBA)
- Test procedures
- Purpose
- Minimum requirements
- Test frequency
- Documentation

Achievement Criteria:

- | | |
|-------------|---|
| Performance | The learner will be able to test cross connection assemblies required for certification. |
| Conditions | To be assessed during technical training.
The learner will be given: <ul style="list-style-type: none"> • Assemblies • Test equipment • Documentation |
| Criteria | The learner will be evaluated on: <ul style="list-style-type: none"> • Current accepted certification test procedures and equipment |

Line (GAC): J INSTALL CROSS CONNECTION CONTROL DEVICES AND ASSEMBLIES

Competency: J2 Service Cross Connection Controls and Assemblies

Objectives

To be competent in this area, the individual must be able to:

- Describe the troubleshooting and repair of cross connection control assemblies.

LEARNING TASKS

1. Describe the troubleshooting and repair of cross connection control assemblies

CONTENT

- Troubleshoot
 - Isolation
 - Assemblies
 - Reduced pressure backflow preventer assembly (RPBA)
 - Double check valve assembly (DCVA)
 - Pressure Vacuum Breaker Assembly (PVBA)
 - Visual Inspection
 - Verify component
- Repair or replace
 - Safe work practices
 - Tools and equipment
 - Retest
 - Return to service
 - Documentation
 - Codes, regulations and permits
 - AHJ
 - Inspection

Line (GAC): L **INSTALL HYDRONIC SYSTEMS**
Competency: L2 **Install Piping and Components for Hydronic Systems**

Objectives

To be competent in this area, the individual must be able to:

- Size piping and components for hydronic systems.
- Design a residential hot water radiant floor heating system.

LEARNING TASKS

CONTENT

- | | |
|---|---|
| <p>1. Size piping and components for hydronic systems</p> | <ul style="list-style-type: none"> • Load requirements • Heat loss/gain calculations • Codes and regulations <ul style="list-style-type: none"> ○ AHJ • Manufacturers' specifications • Drawings and specifications • Expansion devices <ul style="list-style-type: none"> ○ Bladder ○ Diaphragm ○ Conventional air cushion ○ Open tank • Circuit balancing valves • Heating and cooling compatibility |
|---|---|

Achievement Criteria

Performance The learner will be able to design a residential hot water radiant floor heating system.

Conditions To be assessed during technical training.
 The learner will be given:

- Residential layout
- Design criteria
- Design materials

Criteria The learner will be evaluated on:

- Accuracy

Line (GAC): L **INSTALL HYDRONIC SYSTEMS**
Competency: L5 **Install Hydronic System Controls**

Objectives

To be competent in this area, the individual must be able to:

- Describe switches.
- Install relays.
- Install controls for hydronic systems.

LEARNING TASKS

1. Describe switches

2. Describe relays

3. Select relays

4. Install relays

5. Describe the principles of electrical controls

6. Describe control systems for hydronic systems

CONTENT

- Manual
- Temperature actuated
- Pressure actuated
- Liquid level actuated
- Flow
- Proximity/End
- Operation
- Ratings
- Contacts
 - Normally open
 - Normally closed
- 120 volt coils
- 24 volt coils
- Ratings
- Wiring base connections
- Symbols
- Terminal identification on wiring diagram
- Enclosures
- Test equipment
- Circuit diagrams
- Symbols
- Electronic
- Electro-mechanical
- Types
- Boilers
- Zoning
 - Location of controls and sensors
- Priority systems
- Reset

LEARNING TASKS

CONTENT

- Heat curves
- Circulators
- Multi-temperature systems
 - Control valves
 - Mixing
 - Diverting
 - Injection
- Purpose/Operation

Achievement Criteria

Performance The learner will be able to install/wire a relay.

Conditions To be assessed during technical training.
The learner will be given:

- Ladder diagram
- Double pole, single throw relay
- Power supply
- Switch
- Light bulbs
- Transformer

Criteria The learner will be evaluated on:

- Accuracy to the diagram
- Wiring techniques
- Neatness

Line (GAC): N **INSTALL SPECIALIZED SYSTEMS**
Competency: N1 **Install Piping for Specialized Systems**

Objectives

To be competent in this area, the individual must be able to:

- Describe irrigation, compressed air and green systems.
- Describe the installation of piping for compressed air systems.

LEARNING TASKS

1. Describe residential irrigation systems

CONTENT

- Safe work practices
- Types
 - Residential
 - Commercial
 - Agricultural
- Codes and regulations
 - AHJ
- Design criteria
- Pipe types
- Cross-connection hazards
- Trenching
- Coordination with underground utilities
- Tools and equipment
- Service testing

2. Describe compressed air systems

- Safe work practices
- Hazards
- Pipe types
- Codes and regulations
 - Vessels specific
 - AHJ
- Piping arrangements
 - Straight line
 - Loop
- Tools and equipment
- Jointing methods
- Draining of moisture
- Compressors
 - Types
 - Operation
- Safety devices

3. Describe green systems

- Types
 - Geo-thermal
 - Solar thermal

LEARNING TASKS

4. Describe piping installation for compressed air systems

CONTENT

- Grey water reuse
- Rainwater collection
- Codes and regulations
 - AHJ
- Hazards
 - Cross connection control issues
- Piping configurations
- Components
- Controls
- Applications
- Operation
- Sizing
 - Measurements
 - Calculations
 - Manufacturer's documentation
 - Engineered drawings
- Codes and regulations
 - AHJ
- Pipe routing/configurations
- Tools and equipment
- Assembly
- Jointing methods
- Pitch and grade
- Supports
- Allowances
- Protection
 - Mechanical damage
 - Seismic activity
 - Environmental conditions
- Structure penetration

LEARNING TASKS

CONTENT

- Location
- High and low points
- Tools and equipment
- Pumps
- Cross connection
- Supports
- Fasteners
- Installation method
 - Manual
 - Mechanical
- Clearances
- Alignment and leveling
- Anchoring
- Controls

Line (GAC): N **INSTALL SPECIALIZED SYSTEMS**
Competency: N3 **Test Specialized Systems**

Objectives

To be competent in this area, the individual must be able to:

- Describe the testing of irrigation, compressed air and green systems.

LEARNING TASKS

1. Describe the testing of specialized systems

CONTENT

- Safe work practices
 - Lock-out/tag-out
- Codes and regulations
 - AHJ
- Visual pre-check
- Types
- Applications
- Tools and equipment
- Test medium
 - Fluid
 - Compressed air
 - Inert gases
- Components
- Procedures
 - Filling
 - Draining
 - Purging
- Return to service
- Inspection
- Documentation

Line (GAC): N **INSTALL SPECIALIZED SYSTEMS**
Competency: N4 **Service Specialized Systems**

Objectives

To be competent in this area, the individual must be able to:

- Describe the servicing of irrigation, compressed air and green systems.

LEARNING TASKS

1. Describe maintenance procedures for specialized systems

2. Describe troubleshooting and repair procedures for specialized systems

CONTENT

- Schedules
- Sensory inspection
- Lubrication
- Chemicals
- Fluids
- Components
- Wear

- Safe work practices
- Lock-out/tag-out
- Verify reported problem
- Inspection/testing
 - Sensory
 - Diagnostic
 - Monitoring
- Tools and equipment
- Isolate components
- Conditions for repair/replacement
 - Temperature
 - Leaks
 - Corrosion
 - Control malfunction
 - Vibration
 - Irregular movement
- Procedures
 - Cleaning a system before, during, and after assembly
 - Blanking off all piping, tubing, and hoses when a system is opened
 - Flushing procedures for contaminants
 - Isolating equipment before testing the system
 - Gauges
 - Controls
 - Relief valves

LEARNING TASKS

CONTENT

- Flow control valves
- Reducing valves
- Faults
 - Flow
 - Pressure
 - Velocity
- Causes
- Repair/replace components
- Return to service
- Documentation

Line (GAC): N **INSTALL SPECIALIZED SYSTEMS**
Competency: N5 **Commission Specialized Systems**

Objectives

To be competent in this area, the individual must be able to:

- Describe the commissioning of irrigation, compressed air and green systems:

LEARNING TASKS

1. Describe the commissioning of specialized systems

CONTENT

- Safe work practices
- Codes, regulations and permits
 - AHJ
 - Manufacturer’s documentation
- Sensory inspection
- Hazards
- Purging/venting
- Flushing
- Chemical treatment
 - Disinfecting and sampling
- Commissioning equipment
- Electrical supply and connections
- Water supply
- Load
- Codes
- Valves test
- Leak test
- Hydrostatic test

Line (GAC): O **APPLY ELECTRICAL CONCEPTS**
Competency: O2 **Use Electrical Wiring Diagrams and Schematics**

Objectives

To be competent in this area, the individual must be able to:

- Identify electrical diagrams.
- Sketch a series and parallel circuit.
- Analyze simple circuits.
- Describe appliance circuits.
- Sketch a ladder diagram.

LEARNING TASKS

1. Identify electrical diagrams
2. Sketch a circuit
3. Analyze simple circuits

CONTENT

- Types of diagrams
 - Ladder
 - Schematic
 - Pictorial
 - Wiring
- Symbols used in schematic diagrams
- Read schematics
 - Identifying components
 - Determining function of circuit
 - Identifying control circuits
 - Parallel circuits
 - Series circuits
- Apply circuit diagrams
 - Troubleshooting techniques
- Parallel circuit
- Series circuit
- Safety
 - Lock-out and fuse removal
 - First aid for electrical shock
- Test circuits
 - Voltage test
 - Amperage test
 - Resistance test
 - Continuity test
- Analyze readings
 - Compare to manufacturer's data
 - Compare to previous readings
 - Compare to expected data
 - Reasons for unexpected

LEARNING TASKS

CONTENT

readings

4. Describe appliance circuits

- Transformer
- Limit/Safety
- Pump/fan
- Control

5. Sketch a ladder diagram

- Sequence of operation
- Components
 - Line voltage
 - Control voltage
 - Function
 - Source
 - Switch
 - Load
 - Conductors

Achievement Criteria

Performance The learner will be able to sketch a:

- Series circuit
- Parallel circuit
- Ladder diagram

Conditions To be assessed during technical training.
The learner will be given:

- Drawings and specifications
- Sketching equipment

Criteria The learner will be evaluated on:

- Accuracy
- Neatness

LEARNING TASKS

CONTENT

4. Size piping and tubing systems

- Tracer wire
 - Corrugated stainless steel tubing (CSST)
 - Hoses
 - Flexible connectors
- Schedules and grades
- Pressure ratings
- Nominal sizes
- Protective coatings
- Cathodic protection
- Identification markings
- Types
 - Black iron pipe
 - Copper tubing
 - Corrugated stainless steel tubing (CSST)
- Pressures
 - Low pressure
 - 2 psig (14 kPa)
 - High pressure
- Sizing factors
 - Appliance Rating
 - Distance
 - Allowable pressure drop
 - Piping or tubing type
 - Type of gas
 - Fittings
- Code requirements
- Procedures

Line (GAC): P PLAN GAS-FIRED APPLIANCE SYSTEM INSTALLATIONS
Competency: P4 Select Flame Safeguards

Objectives

To be competent in this area, the individual must be able to:

- Describe flame detectors.
- Describe the operation of standing pilot/thermocouple systems.

LEARNING TASKS

1. Describe flame detectors

2. Describe ignition systems
3. Describe standing pilot/thermocouple systems

CONTENT

- Thermocouple
- Thermopile
- Flame rectification (flame rod)
- Pilot types
 - Continuous
 - Intermittent
 - Interrupted
- Pilot
- Wiring circuit
- Sequence of operation
- Applications

Line (GAC): P PLAN GAS-FIRED APPLIANCE SYSTEM INSTALLATIONS
Competency: P5 Select Burners

Objectives

To be competent in this area, the individual must be able to:

- Describe burners.
- Describe the operation of atmospheric burners.
- Describe burner orifices.

LEARNING TASKS

1. Describe burners

2. Describe atmospheric burners

CONTENT

- Terminology
 - Turndown
 - High fire
 - Low fire
 - Modulation
 - Port loading
- Types
 - Forced draft
 - Fan assisted
 - Atmospheric
 - Insuperating
 - Asperating
- Gas properties
- Flame characteristics
 - Aerated
 - Oxidizing
 - Carbonizing
 - Neutral
 - Non-aerated
 - Bunsen
 - Luminous
 - Impingment
 - Flame retention
- High installations
- Pilot
 - Continuous
 - Intermittent
- Interrupted
- Types
 - Main burners
 - Pilot burners
- Parts
 - Burner port

LEARNING TASKS

3. Describe burner orifices

CONTENT

- Mixing tube
- Burner head
- Operation
 - Venturi effect (Bernoulli's principle)
 - Primary air control
 - Fuel control
- Application
- Types
 - Plug
 - Cap
 - Adjustable
- Sizing
 - Tables
 - Calculations
 - Orifice flow formula
 - Drilling
- Drill index

Line (GAC): Q **INSTALL GAS-FIRED SYSTEMS**
Competency: Q1 **Install Piping and Tubing Systems**

Objectives

To be competent in this area, the individual must be able to:

- Describe the installation of piping, tubing and hoses for fuel gas applications.

LEARNING TASKS

1. Describe the installation of piping, tubing and hoses for fuel gas applications

CONTENT

- Code and regulations
 - AHJ
- Manufacturers' specifications
- Types
- Methods
- Identification
- Procedures
- Fittings
- Valves
- Prohibited practice
- Location limitations
- Structural penetrations
 - Fire stopping
- Drip or dirt pockets
- Between buildings
- Concealment
 - Protection plates
 - In concrete
- Protective coatings
- Underground
- Support
- Tools
- Connectors

Level 4 Plumber

Line (GAC): C **PERFORM ROUTINE TRADE ACTIVITIES**
Competency: C2 **Interpret Drawings and Specifications**

Objectives

To be competent in this area, the individual must be able to:

- Describe contractual documents and record management.

LEARNING TASKS

1. Describe contractual documents

CONTENT

- Purpose
- Types
 - Agreements
 - General conditions
 - Drawings
 - Specifications
 - Master format
 - Divisions
- General requirements
- Responsibilities and obligations
 - Permits and requirements
 - Guarantees/warranties
 - Liability
 - Tests and inspections
 - Workmanship
- Change orders
- Paper based filing
- Electronic filing
- Service reports
- Invoices
- Time sheets
- Purchase orders
- Vehicle logs
- Maintenance logs
- Inventory
- Permits
- Statements of completion

2. Describe record management

Line (GAC): E **INSTALL PLUMBING FIXTURES AND APPLIANCES**
Competency: E3 **Commission Fixtures and Appliances**

Objectives

To be competent in this area, the individual must be able to:

- Describe the commissioning of fixtures and appliances.

LEARNING TASKS

1. Describe the commissioning of fixtures and appliances

CONTENT

- Tools and equipment
- System check/test
- Manufacturers' specifications
- Inspection
- Adjustments
- Documentation
- Inform end-user of operation

Line (GAC): E **INSTALL PLUMBING FIXTURES AND APPLIANCES**
Competency: E4 **Service Fixtures and Appliances**

Objectives

To be competent in this area, the individual must be able to:

- Describe the servicing of fixtures, trim and appliances.

LEARNING TASKS

1. Describe the servicing of fixtures, trim and appliances

CONTENT

- Interpret client information
- Inspection
- Tools and equipment
- System check/test
- Manufacturers' specifications
- Isolation
- Clean/repair/replace
- Adjustments
- Return to service
- Verify operation
- Documentation

Line (GAC): F **USE COMMUNICATION TECHNIQUES**
Competency: F2 **Use Mentoring Techniques**

Objectives

To be competent in this area, the individual must be able to:

- Use mentoring techniques.

LEARNING TASKS

1. Describe effective mentoring techniques

2. Describe learning strategies

CONTENT

- Verbal
- Non-verbal
 - Body language
 - Signals
- Active listening
 - Hearing
 - Interpreting
 - Reflecting
 - Responding
 - Paraphrasing
- Personal responsibilities
 - Attitude
 - Harassment
 - Discrimination
- Coaching
- Practice
- Assessing
 - Feedback
 - Correcting
- Reinforcement

Line (GAC): **G** **INSTALL SEWERS AND SEWAGE TREATMENT SYSTEMS**
Competency: **G3** **Test Manholes, Catch Basins and Piping for Sewers**

Objectives

To be competent in this area, the individual must be able to:

- Describe the testing of manholes, catch basins and piping for sewers.

LEARNING TASKS

1. Describe the testing of manholes, catch basins and piping for sewers

CONTENT

- Types
 - Sensory
 - Hydrostatic
 - Smoke and air
 - Mandrel
- Equipment
 - Balloons
 - Inflatable test balls
 - Test plugs
 - Mandrel
- Faults
 - Cracks
 - Corrosion
 - Inadequate flow
 - Piping failure
- Specifications, codes and regulations
- Leak checks
- Return to service
- Documentation

Line (GAC): **G INSTALL SEWERS AND SEWAGE TREATMENT SYSTEMS**
Competency: **G4 Service Manholes, Catch Basins and Piping for Sewers**

Objectives

To be competent in this area, the individual must be able to:

- Describe the servicing of manholes, catch basins and piping for sewers.

LEARNING TASKS

CONTENT

Line (GAC): G **INSTALL SEWERS AND SEWAGE TREATMENT SYSTEMS**
Competency: G5 **Install Sewage Treatment Systems and Components**

Objectives

To be competent in this area, the individual must be able to:

- Describe the installation of sewage treatment systems and component.

LEARNING TASKS

1. Describe private sewage disposal systems

CONTENT

- Purpose
- Operation
- Septic tank process
 - Conditions
- Disposal field process
 - Conditions
- Tanks
 - Holding
 - Septic
- Chambers
 - Pump
 - Siphon
- Codes and regulations
 - B.C. Health Act
 - Health Act Sewage Disposal Regulation
 - Onsite Sewage System Management
- Absorption field
- Limiting factors
 - Soil conditions
 - Type
 - Structure
 - Percolation rates
 - Property boundaries
 - Water table elevation
 - Proximity to potable water sources and courses
- Alternatives
 - Lagoons
 - Mounds
- Packaged sewage treatment plants
- Sewage volume calculations
- Pump sizing
- Plan preparation and submittal
- Purpose

2. Describe municipal sewage disposal systems and

LEARNING TASKS

sewage treatment plants

3. Describe a private sewage treatment system installation

CONTENT

- B.C. Health Act
- Codes and regulations
 - AHJ
- Site plan
- Permits
- Percolation tests
 - Procedure
 - Mandatory inspection of test
 - Maximum rate
- Components
 - Pumps
 - Controls
 - Distribution piping
 - Septic tanks
 - Location
 - Sizing
 - Elevation
 - Fields
 - Location
 - Sizing
 - Elevation
 - Distribution boxes
 - Bell-and-siphons
 - Tanks
 - Septic
 - Aeration
 - Holding
 - Pumping
- Soil conditions
- Bed preparation for tanks
- Lifting and hoisting
- Setting elevations
- Tools and equipment
- Positioning of components
- Application of gaskets and fittings

Line (GAC): **G** **INSTALL SEWERS AND SEWAGE TREATMENT SYSTEMS**
Competency: **G6** **Test Sewage Treatment System and Components**

Objectives

To be competent in this area, the individual must be able to:

- Describe the testing of sewage treatments systems and components.

LEARNING TASKS

1. Describe the testing of sewage treatment systems and components

CONTENT

- Testing equipment
 - Inflatable test balls
 - Test plugs
 - Compressed air
- System check
 - Leaks
 - Inadequate grade
- Specifications
- Pressure test
- Codes and regulations
- Sensory inspection
- Safe work practices

Line (GAC): G **INSTALL SEWERS AND SEWAGE TREATMENT SYSTEMS**
Competency: G7 **Service Sewage Treatment System and Components**

Objectives

To be competent in this area, the individual must be able to:

- Describe the servicing of sewage treatment systems and components.

LEARNING TASKS

Line (GAC): I **INSTALL WATER SERVICES AND DISTRIBUTION SYSTEMS**
Competency: I3 **Test Water Service and Distribution Systems**

Objectives

To be competent in this area, the individual must be able to:

- Describe the testing of water service and distribution systems.

LEARNING TASKS

1. Describe the testing of water service and distribution systems

CONTENT

- Safe work practices
- Types
 - Hydrostatic
 - Compressed gas
- Tools and equipment
 - Gauges
 - Pumps
 - Compressor
- Code and regulations
 - AHJ
- Components
 - Water meters
 - Isolation valves
 - Cross connection control devices
 - Check valves
 - Expansion devices
 - Pumps
 - Post indicator valves
 - Fire hydrants
- Inspection
- Documentation

Line (GAC): I **INSTALL WATER SERVICES AND DISTRIBUTION SYSTEMS**
Competency: I4 **Service Water Service and Distribution Systems**

Objectives

To be competent in this area, the individual must be able to:

- Describe the servicing of water service and distribution systems.

LEARNING TASKS

1. Describe the maintenance of water service and distribution systems

2. Describe the troubleshooting and repair of water service and distribution systems

CONTENT

- Maintenance schedules
- Inspection
- Component verification
- Specifications, codes, regulations
 - AHJ
- Tools and equipment
- Isolation
- Testing
- Return to service
- Documentation
- Troubleshoot
 - Verify reported problem
 - Inspection
 - Component verification
 - Isolation
- Repair
 - Safe work practices
 - Confined space
 - Point of access
 - Shoring
 - Tools and equipment
 - Isolation
 - Repair or replace components
 - Testing
 - Return to service
 - Documentation

Line (GAC): I **INSTALL WATER SERVICES AND DISTRIBUTION SYSTEMS**
Competency: I5 **Commission Water Service and Distribution Systems**

Objectives

To be competent in this area, the individual must be able to:

- Describe the commissioning of water service and distribution systems.

LEARNING TASKS

1. Describe the commissioning of water service and distribution systems

CONTENT

- Pre-check
- Hazards
- Safe work practices
- Chemical treatment
- Purging
 - Air
 - Chemical
 - Test water
- Flushing
- Commissioning equipment
- Start-up
 - Permits
 - AHJ
 - Electrical supply and connections
 - Hot water tanks
 - Water treatment equipment
 - Pumps
 - Heat tracing
 - Water meters
 - Codes and regulations
 - AHJ
 - Manufacturer’s documentation
 - Valves test
 - Cross connection control assemblies
 - Pressure reducing valve (PRV) set points

Line (GAC): **K** **INSTALL PRESSURE SYSTEMS**
Competency: **K1** **Install Piping for Pressure Systems**

Objectives

To be competent in this area, the individual must be able to:

- Size pressure systems and select a pump.
- Describe the installation of piping for pressure systems.

LEARNING TASKS

1. Describe pressure systems

CONTENT

- Types
 - Shallow well
 - Deep well
 - Boosted system
- Terminology
- Purpose
- Requirements
 - Pressure
 - Demand
- Head pressure
- Friction loss
- Pumps
 - Location
 - Voltage and horsepower requirements
 - Submersible
 - Recipricating
 - Centrifugal
 - Jet
 - Shallow well
 - Deep well
 - Installation procedures
- Torque arrestors
- Vibration isolation
- Locations
- Connection methods
 - Pitless adapter
 - Well seals
- Components
 - Drive point (screened)
 - Check valves
 - Strainers
 - Ejectors
 - Foot valves

LEARNING TASKS

CONTENT

- Venturi
 - Flow control valve
 - Pump support
 - Safety cable
 - Heat tracing
 - Pressure tanks
 - Electrical
 - Pumps
 - Wiring
 - Pressure switches
 - Control panels
 - Variable frequency drives (VFD)
 - Calculations
 - Peak flow demand
 - Elevations and distances
 - Total dynamic head
 - Codes and regulations
 - AHJ
 - Drawings and specifications
 - Manufacturers documentation
 - Components
 - Equipment
 - Water source factors
 - Drawdown
 - Yield
 - Depth
 - Pump selection
 - Layout/routing
 - Environmental
 - Site conditions
 - Safe work practices
 - Materials
 - Components
 - Tools and equipment
 - Codes and regulations
 - AHJ
 - Drawings and specifications
 - Connections
 - Protection
2. Size pressure systems
3. Describe the installation of piping for pressure systems

Achievement Criteria

Performance	The learner will be able to size a pressure system and select a pump.
Conditions	To be assessed during technical training. The learner will be given: <ul style="list-style-type: none">• Drawing and specifications• Pump performance curve
Criteria	The learner will be evaluated on: <ul style="list-style-type: none">• Accuracy

Line (GAC): **K** **INSTALL PRESSURE SYSTEMS**
Competency: **K2** **Install Equipment for Pressure Systems**

Objectives

To be competent in this area, the individual must be able to:

- Describe the installation of equipment for pressure systems.

LEARNING TASKS

1. Describe the installation of equipment for pressure systems

CONTENT

- Safe work practices
- Codes and regulations
 - AHJ
 - Manufacturers specifications
- Drawings and specifications
- Components
 - Hydropneumatic tank
 - Pressure relief valve
 - Pitless adapters
 - Cables for removal
 - Well seals
 - Torque arrestor
 - Electrical
 - Pressure switch
 - Load sensor
 - Pump control
 - Variable frequency drives (VFD)
- Tools and equipment
- Assembly
- Connection
 - Power
 - Controls
 - Water
- Protection methods
 - Pitless adapters
 - Pump house
 - Heat tracing

Line (GAC): **K** **INSTALL PRESSURE SYSTEMS**
Competency: **K3** **Test Pressure Systems**

Objectives

To be competent in this area, the individual must be able to:

- Describe the testing of pressure systems.

LEARNING TASKS

1. Describe the testing of pressure systems

CONTENT

- Safe work practices
- Tools and equipment
- Types
 - Fluid
 - Test air
- Purging
- Apply test
- Procedures
 - Filling
 - Draining
- Faults
 - Electrical
 - Leaks
- Lock-out/tag-out
- Return to service
- Sensory inspection
- Documentation

Line (GAC): **K** **INSTALL PRESSURE SYSTEMS**
Competency: **K5** **Commission Pressure Systems**

Objectives

To be competent in this area, the individual must be able to:

- Describe the commissioning of pressure systems.

LEARNING TASKS

1. Describe the commissioning of pressure systems

CONTENT

- Commissioning equipment
- Visual inspection
- Hazards
- Purging
- Flushing
- Chemical treatment
 - Disinfecting and sampling
- Codes, regulations and permits
 - AHJ
- Manufacturer's documentation
- Electrical supply and connections
- Water supply
- Start-up
- Leak test
- Documentation
- Instruct client in equipment operation

Line (GAC): L **INSTALL HYDRONIC SYSTEMS**
Competency: L6 **Test Hydronic Systems, Components and Controls**

Objectives

To be competent in this area, the individual must be able to:

- Describe testing procedures for hydronic systems, components and controls.

LEARNING TASKS

1. Describe testing procedures for hydronic systems, components and controls

CONTENT

- Safe work practices
 - Lock-out/tag-out
- Codes and regulations
 - AHJ
 - Manufacturers' specifications
- Visual pre-check
- Sensory inspection

Line (GAC):	L	INSTALL HYDRONIC SYSTEMS
Competency:	L8	Commission Hydronic Systems, Components and Controls

Objectives

To be competent in this area, the individual must be able to:

- Describe commissioning procedures for hydronic systems, components and controls.

LEARNING TASKS

1. Describe commissioning procedures for hydronic systems, components and controls

CONTENT

- Design requirements
 - Safety features
 - Limits
 - Temperature drop
 - System balancing
 - Flow rates (zones)
 - Air flow (forced convector)
 - Flow directions
 - Control sequence
 - Sensor checks
 - Piping configuration
 - Air removal
 - Cross connection controls
 - Make-up water line

Line (GAC): M **INSTALL WATER TREATMENT SYSTEMS**
Competency: M1 **Install Water Treatment Equipment**

Objectives

To be competent in this area, the individual must be able to:

- Describe the sizing and installation of water treatment equipment.

LEARNING TASKS

1. Describe water treatment equipment

CONTENT

- Types
 - De-ionizers
 - Filters
 - Mechanical removal (screen)
 - Adsorption
- Ionic exchange
 - Water softeners
 - Iron
 - Tannin
- Neutralizing
- Reverse osmosis systems
- Ultra-violet (UV) disinfection
- Chemical feed
 - Chlorination
 - pH adjustment
- Distillation
- Characteristics
 - Heat
 - Pressure
- Water quality
 - Hardness
 - Minerals
 - Iron
 - Calcium
 - Magnesium
 - Arsenic
 - Hydrogen Sulfide (H₂S)
 - Methane
 - Trihalomethane (THM)
 - Contamination/pollution
 - pH
 - Taste/odour
 - Turbidity
- Operation

- System verification
- Post-test
- Water samples
 - Collection
 - Testing
 - Analysis
- Adjustments
- Commissioning equipment
- Service/regeneration intervals
- Instruct client in equipment operation

Achievement Criteria

Performance The learner will be able to test a water sample.

Conditions To be assessed during technical training.
 The learner will be given:

- Water sample test kit
- Water samples

Criteria The learner will be evaluated on:

- Accuracy

Line (GAC): M **INSTALL WATER TREATMENT SYSTEMS**
Competency: M3 **Service Water Treatment Equipment**

Objectives

To be competent in this area, the individual must be able to:

- Describe the servicing of water treatment equipment.

LEARNING TASKS

1. Describe maintenance procedures for water treatment equipment

2. Describe troubleshooting and repair procedures for water treatment equipment

CONTENT

- Sensory inspection
- Replace Consumables
 - Filters
 - Regeneration materials
 - Ultra-violet (UV) lamps
 - Limestone chips
 - Reverse-osmosis (RO) membrane
- Components
 - Scale removal (distillers)
 - Cleaning
- Safe work practices
- Verify reported problem
- Tools and equipment
- Inspection/testing
 - Sensory
 - Diagnostic
 - Monitoring
- Lock-out/tag-out
- Isolate components
- Conditions for repair/replacement
 - Temperature
 - Leaks
 - Corrosion
 - Control malfunction
 - Vibration

Objectives

To be competent in this area, the individual must be able to:

- Describe single phase motors.

LEARNING TASKS

1. Identify motor components
2. Describe characteristics and operation of single phase motors

CONTENT

- Types of components
- AC theory
 - Electromagnetic theory
 - Induction motors

Line (GAC): **O** **APPLY ELECTRICAL CONCEPTS**
Competency: **O4** **Apply Three Phase Motor Theory**

Objectives

To be competent in this area, the individual must be able to:

- Describe three phase motors.

LEARNING TASKS

1. Describe three phase motors

CONTENT

- Three phase supplies
 - Delta supply
 - Wye (Y) supply
- Characteristics
- Components
- Operation

Line (GAC): **O** **Apply Electrical Concepts**
Competency: **O6** **Interpret the Canadian Electrical Code (CEC)**

Objectives

To be competent in this area, the individual must be able to:

- Interpret the Canadian Electrical Code Part 1.
- Interpret the Electrical Safety Regulations.

LEARNING TASKS

CONTENT

- | | |
|--|--|
| <ol style="list-style-type: none"> 1. Describe the Canadian Electrical Code Part 1
 2. Interpret the Electrical Safety Regulations
 3. Size conductors
 4. Describe wiring installation
 5. Describe grounding and bonding techniques | <ul style="list-style-type: none"> • Section <ul style="list-style-type: none"> ○ 0,2,4,8,10,12 ○ Appendix B ○ Appendix D

 • Section 12 CEC
 • Section 10 CEC |
|--|--|

Line (GAC): **P** **PLAN GAS-FIRED APPLIANCE SYSTEM INSTALLATIONS**
Competency: **P2** **Select Regulators, Valves, and Valve Train Components**

Objectives

To be competent in this area, the individual must be able to:

- Select valves.
- Describe the operation of gas valve trains for appliances rated at 400 MBH or less.
- Describe the purpose and operation of gas pressure regulators.

LEARNING TASKS

CONTENT

- | | |
|----------------------------------|---|
| 1. Describe manual valves | <ul style="list-style-type: none"> • Types <ul style="list-style-type: none"> ○ Plug valves ○ Butterfly ○ Ball valves ○ Needle valves • Construction • Operation • Pressure markings and ratings • Maintenance |
| 2. Describe automatic gas valves | <ul style="list-style-type: none"> • Electric <ul style="list-style-type: none"> ○ Solenoid ○ Diaphragm ○ Combination ○ Single stage ○ Two stage ○ Modulating ○ Pilot safety <ul style="list-style-type: none"> – Safety shut off • Non-electric <ul style="list-style-type: none"> ○ Rod and tube ○ Hydraulic |
| 3. Describe pressure regulators | <ul style="list-style-type: none"> • Types <ul style="list-style-type: none"> ○ Appliances ○ Line pressure ○ Service ○ Direct operated • Operating elements <ul style="list-style-type: none"> ○ Loading ○ Measuring ○ Restricting • Pressure adjustment <ul style="list-style-type: none"> ○ Gas line |

Line (GAC): P **PLAN GAS-FIRED APPLIANCE SYSTEM INSTALLATIONS**
Competency: P6 **Plan a Project**

Objectives

To be competent in this area, the individual must be able to:

- Plan a residential piping installation.

LEARNING TASKS

1. Determine load

2. Layout the system

3. Size the system

4. Determine material take-off

CONTENT

- Appliance rating plates
- Manufacturer’s documentation
- Pressure
- System Regulators
- Regulator locations
- Hangers and supports
- Valve placement
- Drip legs
- Routing
- Piping material
- Pressure
 - 7-14 in WC
 - 2 psig
- Lengths
- Type of gas
- Pressure drop
- Fittings
- Valves
- Hangers and supports
- Regulators
- Pipe and tubing
- Consumables

Achievement Criteria:

Performance	The learner will be able to: <ul style="list-style-type: none">• Plan a layout of a residential piping installation• Sketch an isometric piping drawing• Size the piping system• Generate a tools and material list.
Conditions	To be assessed during technical training. The learner will be given: <ul style="list-style-type: none">• Residential floor plan with meter and appliance location• Appliance model number• Piping material• Sketching equipment• Delivery pressure.
Criteria	The learner will be evaluated on: <ul style="list-style-type: none">• Material take-off<ul style="list-style-type: none">○ Accuracy• Isometric drawing<ul style="list-style-type: none">○ Neatness○ Accuracy• Code compliance<ul style="list-style-type: none">○ Sizing○ Hanger spacing○ Valves○ Drip legs○ Swing joints○ Pipe identification.

Line (GAC): Q **INSTALL GAS-FIRED SYSTEMS**
Competency: Q2 **Install Regulators, Valves and Valve Train Components**

Objectives

To be competent in this area, the individual must be able to:

- Describe manual shut-off valves installation.
- Describe gas pressure regulator installation.

LEARNING TASKS

 • Code requirements • Manufacturer’s specifications • Procedures |
|---|---|

Line (GAC): Q **INSTALL GAS-FIRED SYSTEMS**
Competency: Q3 **Install Air Supply Systems**

Objectives

To be competent in this area, the individual must be able to:

- Describe installation of passive air supply systems.

LEARNING TASKS

1. Describe installation of passive air supply

CONTENT

- Code requirements
- Structural penetrations
- Sealing
- Sheet Metal assembly
 - Drive cleats
 - Esses
 - Tools
- Opening and ducts
 - Terminations
- Traps
- Weather
- Equivalent length of air supply

Line (GAC): Q **COMMISSION GAS-FIRED APPLIANCES AND EQUIPMENT**
Competency: Q4 **Commission Fuel/Air Delivery Systems**

Objectives

To be competent in this area, the individual must be able to:

- Describe testing and purging procedures for pipe under 4 inch diameter.

LEARNING TASKS

	Total	100%	100%
In-school theory / practical subject competency weighting		85%	15%
Final in-school percentage score Apprentices must achieve a minimum 70% as the final in-school percentage score to be eligible to write the Interprovincial Red Seal exam.		IN-SCHOOL %	

All apprentices who complete Level 4 of the Plumber program with a FINAL level percentage score of 70% or greater will write the Interprovincial Red Seal examination as their final assessment.

SkilledTradesBC will enter the apprentices' Plumber Interprovincial Red Seal examination percentage score into SkilledTradesBC Portal.

A minimum percentage score of 70% on the examination is required for a pass.

Section 5

TRAINING PROVIDER STANDARDS

Facility Requirements

Classroom Area

- 350 square feet of floor space (22 square feet per learner)
- Compliance with the local and national fire code and occupational safety requirements
- Meets applicable municipal zoning bylaws for technical instruction and education facilities
- Comfortable seating and tables suitable for learning
- Overhead and multimedia projectors and screen
- Whiteboard with marking pens and erasers
- Windows with shades or blinds
- Heating/air conditioning
- Lighting controls (windows and fixtures) for screen viewing
- Acoustics that allow audibility of the instructor

Shop Area

- Minimum 3,000 square feet of shop area including a tool crib and work stations
- 10 foot ceiling height for shop and lab areas
- Adequate heating, lighting and ventilation
- Refuse and recycling bins
- First-aid equipment
- Shops will be equipped to support the practical lab exercises as outlined in this program outline

Lab Requirements

- See shop area requirements

Student Facilities

- Adequate eating area as per WorkSafeBC requirements (4.84 OHS Regulation and Guidelines)
- Adequate washroom facilities as per WorkSafeBC requirements (4.84 OHS Regulation and Guidelines)

Instructor's Office Space

- Adequate space for student consultation
- Desk and filing space
- Computer
- Internet access
- Printer
- Adequate storage facilities for material and training aids
- Access to photocopier
- Telephone

Other

- N/A

Tools and Equipment

Shop (Facility) Tools and Equipment

Hand Tools

Angle finder	PEX tools
Bench, power vise (power driver pliers)	Pliers (lineman, locking, needle nose, water pump, groove, lock)
Bending tools (hand and hydraulic)	Plumb bob
Bolt cutter	Pry bars
Bolt die	Pumps (hand-operated: cistern, diaphragm, transfer)
Bolt tap	Ratchet
Brushes (utility, wire)	Saws (dry wall, hand, hack, hole, portable band, large band)
Bucket pump	Scratch awl
C-clamp	Screwdrivers (complete set)
Caulking gun	Shear
Centre punch	Shrink-fit device
Chain pipe tongs	Shovel
Chalk line	Socket set (imperial and metric)
Cold chisels	Spacing tool
Contour markers	Squares (regular, T, tri)
Drafting accessories	Strapping device
Files	Stud finder
Flaring tool	Stud punch
Flashlight	Swaging tool
Freeze pack	Tin snips
Gasket cutter	Tip cleaner
Hammers (ball-peen, chipping, sledge, soft-face, claw, rubber mallet, sledge)	Tube cleaner
Hand beveller	Tube benders
Hand groover	Vise-grip pliers
Hand threader	Wheel and bearing pullers
Hex keys	Wrap-around
Hole punch	Wrenches (adjustable/crescent, basin, chain, combination (open/closed end), faucet seat, hammer, non-spark, pin, pipe, spud, strap, torque)
Knife	
Marking tool	
Pick	
Pin punch	
Pinch bars	
Pipe cutters (single-wheel, multi-wheel)	
Pipe reamer (spiral, fluted)	
Pipe tap	
Pipe threader	
Pipe vises (chain and jokes, tri-stand and bench)	

Power Tools

Air compressor (and accessories)	Hydraulic jacks
Beveling tools (hand and electric drive)	Hydraulic torque wrench
Compaction equipment	Impact driver
Concrete cutter	Inspection cameras
Coring machines	Mini-grinder
Cryogenic equipment	Portable end-prep milling (pneumatic, electric)
Die grinder	Powder-actuated tools
Drain cleaning equipment	Pumps (booster, hydrostatic)
Drills (electric, pneumatic, hammer, bench or	Rotary hammer

stand press, mag)
Facing tool
Generator
Grinders (electric or pneumatic) angle, bench, die
pedestal
Grooving machine
Heat gun
Heat lamp
Hydraulic flange spreaders

Saws (band, chain, chop, circular, cut-off, jig,
power hole, reciprocating, sabre)
Steamer
Task lighting equipment
Telescopic boom
Threading machine

Welding, Cutting and Jointing Equipment

Compressed gas cylinders (purge, shield cutting)
Copper tube cutter
Files
Flaring tools
Flashback arrestor
Fusion tools
Fusion welding equipment
Gas powered cut-off
Grooving machine
Hand-operated oiler
Hot air gun
Hot tap equipment
Hydraulic pipe cutter
Mechanical crimper
PEX crimper
PEX pipe expander (manual and power)
Pipe cutter
Pipe groover
Pipe reamer

Pipe roller
Pipe stand
Plastic tube cutters (set)
Propane tiger torches (preheating)
Ratchet cutter
Regulator
Snap cutter
Striker
Specialized assembly tools and equipment
T-extracting tool
Torches (oxy-fuel cutting, heating and welding)
Tube bender
Tube cutter
Welding machines (SMAW)

Measuring Tools

Ampere probe
Calculator
Calipers
Centre finder
Chart recorders
Dead weights
Feeler gauge
Gauges (temperature, pressure, liquid, vacuum,
specialty)
Geometry set
Hydrostatic test pump
Infrared temperature sensor

Levels (laser, standard, builder's (transit), digital
(smart))
Magnahelic gauge
Measuring tape
Manometers (incline, digital and u-tube)
Micrometer
Multimeter
Plumb bob
Rulers
Squares (24 in. combination, flange straightedge)
String line
Thermometer

Rigging and Hoisting Equipment

Access equipment (Ladders, man/material lift
(manual and power), scaffolding, scissor lift, stair
cart)
Beam clamps
Beam trolleys
Bridles
Cable clips

Grip hoist (Tirfor®)
Hooks
Jacks (hydraulic, ram and piston)
Plate clamp
Rope (nylon, synthetic)
Rugger
Shackles

Cable puller
Chain block hoist (endless chain)
Chain puller
Come-along
D-ring
Dolly
Equalizer beam
Eye bolts
Forklift , telescopic forklift

Skid steer loader
Slings (nylon, wire rope, wire mesh) and chokers
Snatch block
Softeners
Spreader bar
Tag line
Tuggers (power)
Winches

Ladders and Platforms (Access Equipment)

Combination ladder
Extension ladder
Manlifts (electrical, hydraulic, pneumatic, hand winch, power winch, one-man, platform, scissor lift, articulating boom)

Material lifts
Scaffolding (staging)

Personal Protective and Safety Equipment

Air quality tester
Arc flash protection
Barricades and caution tape
Confined space equipment
Dust mask
Eye wash kit
Face shield
Fire blanket
Fire extinguisher
Fire resistant clothing
First aid kit
Gloves (industrial rubber, leather)
Ground fault circuit interrupter

Hard hat
Health care and infectious control equipment
Hearing protection
Knee pads
Lock-out/tag out devices
Reflective vests
Respiratory mask
Rubber boots (CSA)
Safety boots (CSA)
Safety glasses/goggles (CSA)
Safety harness, lanyard, and life line (CSA)
Welding helmet

Testing, Measuring and Communication Equipment

Ampere probe
Calculator
Calipers
Centre finder
Chart recorders
Communication devices
Computer
Crimp gauge
Dead weights
Draft gauge
Drafting equipment
Electronic leak detector
Feeler gauge
Gauges (differential pressure and sight tube, temperature, pressure, liquid, vacuum, specialty)
GPS
Groove depth tape

Infrared temperature sensor
Manometers (incline and digital)
Markers
Micrometer
Multimeter
Nitrogen bottles and regulators
Pipe locator
Refractometer
Scanning equipment
Squares (24 in. combination, flange straightedge)
String line
Test strips and kits
Thermal imager
Thermometer

Hand pump and accessories

Student Tools (supplied by student)

Required

- Calculator
- Safety boots
- Hard hat
- Safety glasses

Recommended

- N/A

NOTE:

This list of Reference Materials is for training providers. Apprentices should contact their preferred training provider for a list of recommended or required texts for this program.

Instructor Requirements

Occupation Qualification

The instructor must possess:

- Plumber – Certificate of Qualification with Red Seal endorsement; and
- Minimum ‘B’ Level Gas Certification

Work Experience

A minimum of 5 years experience working in the industry as a Plumber journeyman after Red Seal certification.

Instructional Experience and Education

It is preferred that the instructor also possesses one of the following:

- Provincial (BC) Instructor Diploma or equivalent
 - Bachelor’s Degree in Education
 - Master’s Degree in Education
- AND
- 2 years supervisory or administrative experience
 - Cross connection Testing Certificate
 - Experienced user of relevant software
 - Word processing
 - Spreadsheets
 - Presentations
 - CAD

Appendices

**Appendix A
Acronyms**

AHJ	Authority having jurisdiction
ANSI	American National Standards Institute
ASME	American Society of Mechanical Engineers
ASOPE	American Society of Power Engineers
AST	Aboveground storage tank
ASTM	American Society of Testing and Materials
BCSA	British Columbia Safety Authority
BHP	Boiler horse power
Btuh	British thermal units per hour
CAPS	Combustion Air Proving Switch
CEC	Canadian Electrical Code
CEMS	Continuous emissions monitoring system
CPVC	Chlorinated polyvinyl chloride
CSA	Canadian Standards Association
CSST	Corrugated Stainless Steel Tubing
DFMA	Direct-Fired Make-up Air
ECM	Electronically commutated motors
ESP	External static pressure
EXV	Electronic expansion valve
FGR	Flue gas recirculation
HGPS	High gas pressure switch
HMI	Human-machine interface
HRT	Horizontal return tubular (boiler)
ICI	Industrial, commercial and institutional
IR	Infrared
ISO	International Organization for Standardization
kW	kilowatts
LAER	Lowest achievable emission rate
LEED	Leadership in Energy and Environmental Design
LGPS	Low gas pressure switch
LON	Local operation network
LP Gas	Liquified Petroleum Gas
mA	milliamps
MAWP	Maximum allowable working pressure
MCC	Motor control centre
MTFI	Mainflame Trial For Ignition
mV	millivolts
MSDS	Material safety data sheet
MSW	Municipal solid waste
NAAQS	National Ambient Air Quality Standards
NAPE	National Association of Power Engineers
NBC	National Building Code
NEMA	National Electrical Manufacturer's Association

NFPA	National Fire Protection Association
NSPS	New Source Performance Standards
NRR	Noise reduction rating number
OH&S	Occupational Health and Safety
OS&Y	Outside stem and yoke (valve)
PLC	Programmable logic controller
PPE	Personal protective equipment
PRV	Pressure reducing valve
PTFI	Pilot trial for ignition
PVC	Programmable logic controller
RPM	Revolutions per minute
RTD	Resistance temperature detector
SCR	Selective catalytic reduction
TDG	Transportation of dangerous goods
TXV	Thermostatic expansion valve
UL	Underwriters Laboratories
ULC	Underwriters Laboratories of Canada
UST	Underground storage tank
VFD	Variable frequency drive
VSD	Variable speed drive
WHMIS	Workplace Hazardous Materials Information System

Appendix B Previous Contributors

The Program Outline was prepared with the advice and direction of an industry steering committee convened initially by the Resource Training Organization (RTO). Members included:

- Steve Anderson Department of National Defense
- Danny Bradford BC Federation of Labour
- Larry Doskoch Teck
- Dana Goedbloed Kwantlen Polytechnic University
- Wayne Muzylowski West Fraser (Eurocan Pulp and Paper)
- James Piwek Teck
- Brad Smith Catalyst Paper
- Cindy Soderstrom CADODC (Rig Tech Trade)
- Gene Von Matt Elk Valley Coal
- Wayne Wetmore Enform Training
- Trevor Williams BC Institute of Technology

Industry Subject Matter Experts retained to assist in the development of the Program Outline (2012):

- Bill Johnston (Instructor) BC Institute of Technology
- Dave Sales (Instructor) Piping Industry Apprenticeship Board School
- Rick Vanier (Instructor) Pacific Vocational College
- Charlie Bowne Canadian Forces
- Glen Sanders Teck
- Rob English Canadian Maritime Engineering

Appendix C Technical Safety BC Requirements

(in support of Gasfitter – Class B training)

Gasfitter – Class B Exam administered by Technical Safety BC:

- Successful completion of Plumber Technical Training Levels 1 - 4
- SkilledTradesBC transcript demonstrating a minimum 1,500 work based training hours in the Gasfitter – Class B program (3,000 total); **AND**
- Be registered on an official class list provided by an approved training institution for **Gasfitter – Class B Level 2** technical training

Tools and Equipment

(to be used in coordination with the program Tools and Equipment list beginning on page 183)

Level One (Class B) Apprenticeship

- 1 threading machine (power drive with threading attachment) for every 4 students
- 1 oxy/acetylene cutting outfit for every 8 students
- 1 fuel/air brazing unit for every 4 students
- 1 flaring tool for every 8 students
- 1 tubing bender for every 8 students
